Benedict J. Kerkvliet

Generating Inequality Mechanisms Of Distribution In The Us Economy:

Generating Inequality Lester C. Thurow, 1979 **Generating Inequality** Lester C. Thurow, 1975-12-15 Monograph analysing distribution mechanisms in the USA by means of two economic models favoured over marginal productivity theory discusses income distribution employment opportunities equal opportunities competition wages and employment examines the market system in general the distribution of wealth and economic policy implications Graphs and references

Generating Inequality Paper Lester C. Thurow, 1975-12-15 An economist constructs models to explain the existing distribution of earnings and wealth in the United States *The Palgrave Companion to MIT Economics* Robert A. Cord, 2025-07-10 The Massachusetts Institute of Technology has been and continues to be one of the most important global centres for economics With four chapters on themes in MIT economics and 38 chapters on the lives and work of MIT economists this book shows how economics became established at the Institute how it produced some of the world's best known economists including Paul Samuelson Franco Modigliani and Robert Solow and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of MIT economics **Handbook of the Sociology of Education** Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system **Everyday Politics in the Philippines** Benedict J. Kerkvliet, 2002 Focusing on a rice farming village in central Luzon Kerkvliet argues that the faction and patron client relationships dealt with by conventional studies are only one part of Philippine political life Redress for Historical Injustices in the United States Michael T. Martin, Marilyn Yaquinto, 2007-07-16 A collection of seminal essays that examines the arguments in favor of the redress movement in the

United States **Rewards to skill supply, skill demand and skill match-mismatch** Richard Desjardins,2014-03-28 This book is a collection of three independent but closely related studies The focus is on the potential causes of skill mismatch the extent of skill mismatch the socio demographic make up of skill mismatch and the consequences of skill mismatch in terms of earnings as well as employer sponsored adult education training A distinction is made between skill mismatch and education mismatch All three studies use data from the Adult Literacy and Lifeskills Survey ALLS to investigate the relationships between select outcomes and skill supply demand characteristics as well as their interactions which materialize into skill match mismatch situations The dataset contains direct measures of literacy skills as well as measures of the use of these skills at work which allow for a direct measure of literacy match mismatch The analysis points to the complex ways in which mismatch is generated and the need for an accurate and up to date measure of mismatch one that reflects the possibilities for skill gain and skill loss over the lifespan and reflects differences in the quality of qualifications It also emphasizes that addressing mismatch requires a careful consideration of both the demand and supply sides of the labour market so as to understand better the variety of factors which may have a negative impact on the effectiveness of skill formation skill maintenance and also skill use Among the key findings Skill demand characteristics appear to be as important as skill supply characteristics in explaining observed variation in earnings There is a substantive association between the requirement to read at work and earnings which is independent of whether individuals have high or low levels of literacy proficiency Premiums associated with literacy skills are strongest in occupation types where they are most relevant but premiums associated with the requirement to use those skills are nevertheless found to be strong within all occupational groups The requirement to read at work seems to have a strong association with the incidence of participation in employer supported adult education training This has important implications for understanding better the relationship between how work is organized and the decision to further invest in human capital *Assets and the Poor* Michael Sherraden,2016-09-16 This work proposes a new approach to welfare a social policy that goes beyond simple income maintenance to foster individual initiative and self sufficiency It argues for an asset based policy that would create a system of saving incentives through individual development accounts IDAs for specific purposes such as college education homeownership self employment and retirement security In this way low income Americans could gain the same opportunities that middle and upper income citizens have to plan ahead set aside savings and invest in a more secure future Labour Market Theory Ben Fine,2002-09-11 This book is a commanding assessment of labour market theory across the social sciences It provides a radically original critique of labour market theory which draws constructively but critically on existing literature The work contributes to the debates on key issues in labour economics such as unemployment gender equal pay and the minimum theory illustrates the policy implications in empirical studies supplements existing orthodox labour market theory texts

Work, Pay, and Sustainability Daphne T. Greenwood,2024-12-09 Daphne Greenwood presents the first comprehensive

introduction to pluralist labor economics She expands the economics toolbox with theories taken from institutionalist feminist social ecological and stratification economists Pluralists she explains focus on how formal and informal institutions affect the distribution of productivity dividends and how this has evolved over time Pluralists are concerned with job quality as well as financial compensation They acknowledge the modern day abundance created by technology but advocate for institutional changes to direct it in equitable and sustainable ways Building on the work of many heterodox economists Greenwood introduces wage and employment models that are embedded in the economy environment and society Beginning with evidence on work and pay in the US today she explains why tools for analyzing commodity exchange are not sufficient for analyzing labor relationships She brings bargaining power to the fore analyses dynamic monopsony and looks at the role of wealth as well as income in framing opportunities Throughout the book Greenwood addresses threats to sustainability and equity from unpaid social costs institutional changes such as financialization and fissured workplaces as well as race ethnicity and gender Among the possibilities explored for improving work and pay are sectoral bargaining job guarantees worker owned cooperatives and universal basic income The first undergraduate friendly book on its topic Work Pay and Sustainability is an important resource for students and scholars alike

The Death of Human Capital? Phillip Brown, Hugh Lauder, Sin Yi Cheung, 2020-09-11 Human capital theory or the notion that there is a direct relationship between educational investment and individual and national prosperity has dominated public policy on education and labor for the past fifty years In The Death of Human Capital Phillip Brown Hugh Lauder and Sin Yi Cheung argue that the human capital story is one of false promise investing in learning isn't the road to higher earnings and national prosperity Rather than abandoning human capital theory however the authors redefine human capital in an age of smart machines They present a new human capital theory that rejects the view that automation and AI will result in the end of waged work but see the fundamental problem as a lack of quality jobs offering interesting worthwhile and rewarding opportunities A controversial challenge to the reigning ideology The Death of Human Capital connects with a growing sense that capitalism is in crisis felt by students and the wider workforce shows what's at stake in the new human capital while offering hope for the future

College for All? David Boesel, 1999 **The Myth of Black Corporate Mobility** Ulwyn L. Pierre, 2021-11-18 First Published in 1999 This book addresses one such needed change in the corporate arena the continuing inequality of opportunities for success that blacks experience relative to their similarly qualified white peers in the U S Through interviews and research the author tries to find the answers that still need explanation due to the stereotypes of blacks and other minorities that were kept alive through various media **Borderlands of Economics** Nahid Aslanbeigui, Young B. Choi, 2005-06-23 In recent years there has been increasing discontent with the abstract nature of mainstream economics Not only does this make the subject less relevant to real issues it drives a wedge between economics and other disciplines ostensibly addressing the same issues Borderlands of Economics explores the ways in which economics might be reconnected

both with the real world and with other disciplines Persistent Poverty In Rural America Rural Sociological Society,2019-05-28 A team of anthropologists economists geographers political scientists social workers and sociologists examine the leading explanations for why poverty persists in rural America Their findings discredit established theories such as the culture of poverty and suggest new explanations for rural poverty and new directions for antipoverty programs

Occupational Demand and the Rise of Postsecondary Vocational Education W. Norton Grubb,1983 **First Book in Economics** Emanuel Polioudakis,2008-09-16 Want to know how capitalism works so well yet why we have unemployment where profits come from and what the Fed is This is a popular book on economics and capitalism It uses only simple words and examples no charts or formulas It is pro market while also admitting problems such as with health care and poverty Unlike similar books it explains economic theory explains ideologies accepts social classes sees a role for morality and sometimes uses biological ideas about human nature It prepares you to understand modern issues read further and take a course *Social, Economic, And Institutional Issues In Third World Irrigation Management* R. K. Sampath,Robert A. Young,2019-09-05 This volume number 15 in the Studies in Water Policy and Management Series and joins two other volumes 8 and 10 that collectively summarize a significant part of the post World War II experience of Western experts and donors with the development and management of irrigation in Third World countries The evolution of understanding of Third World irrigation issues has been toward a greater appreciation of the potential for augmenting traditional production and water allocation systems with improved institutional arrangements for achieving allocative efficiency and equity The need for local inputs for planning system operation and system maintenance is now widely recognized as is the need for providing proper motivation for system administrators The authors of this volume offer improved conceptual frameworks and analytic techniques applied to specific country and regional problems in hopes of edifying future experts and donors *The Economics Anti-Textbook* Rod Hill,Professor Tony Myatt,2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements that settles disputes by testing hypotheses that applies a pre determined body of principles and contains policy prescriptions supported by a consensus of professional opinion The Economics Anti Textbook argues that this is a myth one which is not only dangerously misleading but also bland and boring It challenges the mainstream textbooks assumptions arguments models and evidence It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study one which is more an art of persuasion than it is a science The Economics Anti Textbook s chapters parallel the major topics in the typical text beginning with a boiled down account of them before presenting an analysis and critique Drawing on the work of leading economists the Anti Textbook lays bare the blind spots in the texts and their sins of omission and commission It shows where hidden value judgements are made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren t mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students

guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on

Unveiling the Energy of Verbal Artistry: An Emotional Sojourn through **Generating Inequality Mechanisms Of Distribution In The Us Economy**

In a world inundated with monitors and the cacophony of immediate connection, the profound power and psychological resonance of verbal art frequently disappear in to obscurity, eclipsed by the regular onslaught of sound and distractions. Yet, set within the lyrical pages of **Generating Inequality Mechanisms Of Distribution In The Us Economy**, a interesting work of literary brilliance that pulses with raw thoughts, lies an unique trip waiting to be embarked upon. Published with a virtuoso wordsmith, this mesmerizing opus manuals visitors on an emotional odyssey, gently revealing the latent possible and profound influence stuck within the delicate web of language. Within the heart-wrenching expanse with this evocative evaluation, we shall embark upon an introspective exploration of the book is key styles, dissect their charming publishing type, and immerse ourselves in the indelible impression it leaves upon the depths of readers souls.
