Social Capital, Professionalism and Diversity, 2009-01-01 Social Capital Professionalism and Diversity is a response to the challenges faced by teachers and other public sector professionals in attempting to manage an increasingly diverse population whilst simultaneously being subjected to public scrutiny through measures of performance Social capital has increasingly been seen by policy makers and academics as a possible resource for education allowing children and young people and the professionals who work with them to do better as a result of having strong networks relationships and trust There has however been little attention to how social capital might actually be used by professionals within educational contexts or to the benefits of enhanced social capital for children and young people their families and the professionals themselves The contributors to this volume provide commentaries on what is known about social capital and its use in educational contexts the engagement of teachers and other professionals with diversity and social capital and diversity among children young people and families Social Capital Professionalism and Diversity will appeal to teacher educators and policymakers with concerns about the challenges faced by teachers and other public sector professionals and with an interest in how social capital might enable an effective response to diversity in educational contexts The book will be of particular interest and use to student and beginning teachers in responding to diversity as they develop their own professional identities and to practising teachers with an interest in pursuing new forms of professional renewal

Waters, 2011-04-01 One fifth of the population of the United States belongs to the immigrant or second generations While the US is generally thought of as the immigrant society par excellence it now has a number of rivals in Europe The Next Generation brings together studies from top immigration scholars to explore how the integration of immigrants affects the generations that come after The original essays explore the early beginnings of the second generation in the United States and Western Europe exploring the overall patterns of success of the second generation While there are many striking similarities in the situations of the children of labor immigrants coming from outside the highly developed worlds of Europe and North America wherever one looks subtle features of national and local contexts interact with characteristics of the immigrant groups themselves to create variations in second generation trajectories The contributors show that these issues are of the utmost importance for the future for they will determine the degree to which contemporary immigration will produce either durable ethno racial cleavages or mainstream integration Contributors Dalia Abdel Hady Frank D Bean Susan K Brown Maurice Crul Nancy A Denton Rosita Fibbi Nancy Foner Anthony F Heath Donald J Hernandez Tariqul Islam Frank Kalter Philip Kasinitz Mark A Leach Mathias Lerch Suzanne E Macartney Karen G Marotz Noriko Matsumoto Tariq Modood Joel Perlmann Karen Phalet Jeffrey G Reitz Rub n G Rumbaut

Paul Christesen,2012-10-15 This book explores the relationship between sport and democratization Drawing on sociological and historical methodologies it provides a framework for understanding how sport affects the level of egalitarianism in the society in which it is played The author distinguishes between horizontal sport which embodies and fosters egalitarian relations and vertical sport which embodies and fosters hierarchical relations Christesen also differentiates between societies in which sport is played and watched on a mass scale and those in which it is an ancillary activity Using ancient Greece and nineteenth century Britain as case studies Christesen analyzes how these variables interact and finds that horizontal mass sport has the capacity to both promote and inhibit democratization at a societal level He concludes that horizontal mass sport tends to reinforce and extend democratization The Paradox of Diversity

Wahideh Achbari,2016-09-09 This book is about ethnic diversity in voluntary organizations and seeks to explain whether intergroup contact contributes to the development of generalized trust It relies on a novel multilevel design and data from Amsterdam in which 40 voluntary organizations and 463 participants have been sampled Contrary to conventional wisdom this book argues that cognitive processes are contributing more toward the evaluation of strangers or generalized trust than interethnic contact Since trusting unknown people is essentially a risky endeavor this suggests that participants of both association types who report trusting strangers can afford to do so because they are better educated have a more positive worldview and have had fewer negative life experiences That is to say they are socially more successful and view their future as more promising Previous findings are inconclusive since most studies that conclude diversity has led to less generalized trust do not include interethnic contact directly in their analyses These studies also downplay the importance of cognitive processes which may shape generalized trust What is more people join ethnically diverse civic groups because they already have more trustful attitudes rather than learning to trust through interethnic contact Despite the recent

multiculturalist backlash this book demonstrates that participation in ethno national organizations does not pose a threat to social cohesion The analysis in this book serves to build a general theory of trust that moves beyond emphasizing interaction between people who are different from each other but one that includes the importance of cognition Your Money J.
