## **Learning Can Be Child's Play:**

Educational Child's Play Paul Mackie, 2017-02 A child Daycare program to help children be the best that they can be using stories the sensory environment and developmental exercises      **Child's Play** Laurence R. Goldman, 2020-05-28 This innovative book finally takes seriously the need for anthropologists to produce in depth ethnographies of children's play In examining the subject from a cross cultural perspective the author argues that our understanding of the way children transform their environment to create make believe is enhanced by viewing their creations as oral poetry The result is a richly detailed thick description of how pretence is socially mediated and linguistically constructed how children make sense of their own play how play relates to other imaginative genres in Huli life and the relationship between play and cosmology Informed by theoretical approaches in the anthropology of play developmental and child psychology philosophy and phenomenology and drawing on ethnographic data from Melanesia the book analyzes the sources for imitation the kinds of identities and roles emulated and the structure of collaborative make believe talk to reveal the complex way in which children invoke their experiences of the world and re invent them as types of virtual reality Particular importance is placed on how the figures of the ogre and trickster are articulated The author demonstrates that while the concept of imagination has been the cornerstone of Western intellectual traditions from Plato to Postmodernism models of child fantasy play have always intruded into such theorizing because of children's unique capacity to throw into relief our understanding of the relationship between representation and reality      **Child-Initiated Play and Learning** Annie Woods, 2013-03-05 Planning is central to the role of any early years practitioner and involves careful consideration of resources and the learning environment learning outcomes observation and assessment and the unique abilities of individual children This is a big ask and in a busy setting it can be a challenge to adopt a flexible creative approach to planning that embraces the unexpected rather than relying on templates or existing schemes of work This book takes a fresh look at planning to consider the possibilities that should be encouraged when playing alongside young children It shows how a creative approach that allows for spontaneous adventures in play through child led projects leads to rich learning experiences that build on children's own interests Drawing on practice from Reggio Emilia New Zealand Scandinavia and settings in the UK the book covers all aspects of planning including using observations of children to enable them to lead projects organisation of indoor and outdoor learning environments inclusive practice learning through risk taking and adventure play working with parents and carers encouraging the team to consider different ways of working Including encounters from authentic settings and provocative questions for reflective practice this timely new text aims to give students and practitioners the confidence to adopt a flexible approach to planning that will better meet the needs of the children in their care The authors are experienced lecturers practitioners mentors and assessors Working with students visiting placements training teachers and early years professionals they provide a sense of real purpose in their writing and enjoyment in the themes made explicit

throughout this book      **Mathematics Can be Child's Play** James Harry Humphrey, Joy N. Humphrey, 1990      *ICSS 2019*

Adi Fahrudin, Ali Noer Zaman, Ibnu Sina Chandranegara, 2020-03-11 We are proudly presenting the proceedings of the 2nd International Conference on Social Sciences 2019 ICSS 2019 It has focus on the relation of governance and sustainable development The issue of governance politics policy and sustainable development is important today Not only globally but also Indonesia nationally to the local level There are several important issues relating to this both institutionally and the relationships between individuals and groups in supporting the agenda of sustainable development More than 100 manuscripts were presented at this conference with more than 50 of them selected to be published in proceedings We hope by this conference discussions on the importance of sustainable development will increasingly become an important concern together Brings better response from the government and social relations for development      Play and Early Literacy Development James F. Christie, 1991-01-01 This book overviews the sociolinguistic and psychological approaches to studying play and literacy It offers research studies that relate different aspects of play to emergent reading and writing behaviors The use of certain language structures storybook reenactments literacy activities during play and notions of reality and pretense are considered It also presents applied research on how manipulation of play environments teacher involvement in play and play training can promote literacy growth      **Child's Play** Sabine Fröhstück, Anne Walthall, 2017-10-24 Few things make Japanese adults feel quite as anxious today as the phenomenon called the child crisis Various media teem with intense debates about bullying in schools child poverty child suicides violent crimes committed by children the rise of socially withdrawn youngsters and forceful moves by the government to introduce a more conservative educational curriculum These issues have propelled Japan into the center of a set of global conversations about the nature of children and how to raise them Engaging both the history of children and childhood and the history of emotions contributors to this volume track Japanese childhood through a number of historical scenarios Such explorations some from Japan's early modern past are revealed through letters diaries memoirs family and household records and religious polemics about promising rambunctious sickly happy and dutiful youngsters      **Making Sense of the Learning Turn** Anders Örtengren, Professor of Working Life Science Anders Örtengren, 2024-08-20 The main focus of this volume is to increase our understanding of the learning turn referring in this book to the frequent occurrence and usage of terms in the last few decades where the word learning is the premodifier such as learning city and learning organization      Supporting Child-initiated Learning Sally Featherstone, 2013-06-20 Why is it that when children play some behave like butterflies flitting around among the flowers of the activities on offer landing for a moment before moving on to the next attractive flower activity while others behave with the single minded concentration of bees As children grow and learn they acquire skills through play and practical activities This recently acquired learning is tenuous and is secured through practice repeating the skills in different contexts with different people Only then will learning be hard wired for life It is now evident that where children are able to select

resources play companions and activities for themselves they can practise emerging skills and concepts by selecting the resources they need and using them in ways which are unique to them This book written by a group of experts in early years practice explores the place and purpose of child initiated learning in high quality early years practice Child initiated learning is a key feature of the Early Years Foundation Stage **Play and Learning in the Early Years** Angela Glenn,2013-05-24 Focusing on the crucial area of play this book has been put together from course notes and materials used by the authors in their work with pre school practitioners It includes photocopiable record sheets practical case studies and much more

**Child's Play Re-envisioned through Virtual Reality** Rene Novak,2025-06-12 In this book Dr Rene Novak reveals new ways of understanding children's play by liberating it from the constraints of standardised educational agendas Drawing on Heidegger's concepts of Enframing and poiesis and phenomenological inquiry this innovative study explores how immersive virtual reality VR videos can serve as metaphysical laboratories Through vivid embodied experiences early childhood educators cross the cybernetic looking glass to become one with play and discover transformative insights for holistic child development Dr Rene Novak investigates the potential of immersive pedagogy by merging visual pedagogy with embodiment theory to highlight the critical role of teacher presence in educational phenomena Educators become invisible observers stepping inside the flow of play while relinquishing preconceived enframed discourses and misconceptions The result is a reshaping of pedagogy and policy steering away from prescriptive goals toward play as a self actualising educational experience By reconceptualising how free play unfolds this book challenges educators policymakers and parents to embrace the true essence of play in early learning This book is an essential resource for anyone seeking to understand how to foster creativity social emotional growth and deeper engagement in a play based curriculum Play as Therapy Karen Stagnitti,Rodney Cooper,2009 While paediatric healthcare professionals view play as the treatment tool of choice for children under school age the theory and practice underpinning play based therapeutic approaches often remain less clear to individual practitioners Paediatric intervention approaches are increasingly being questioned and individual practitioners constantly asked to provide evidence based practice In response a more coherent understanding and fresh discussion on children's play and utilisation of play for therapeutic purposes is needed especially as societal expectations and lifestyles change Play as Therapy provides background theory and practical applications of original research on play assessment and interventions used in therapy The book offers a solid foundation for identifying and assessing play dysfunction understanding play in different cultural contexts and considerations when intervening with play The practical approach is underpinned by theory research and case vignettes to explain how to utilise play as therapy with challenging children **Child Development Within Contexts** Nikolai Veresov,Sarika Kewalramani,Junqian Ma,2024-04-02 This book examines the pedagogical encounters within children's ecological and socio cultural historical contexts and aspects of playful learning and development within these contexts It addresses research and practices varying across learning contexts providing easily

adaptable exemplary practices leading to children's positive learning and development. The book offers a unified general cultural historical theoretical model for exploring new contexts at different stages of children's learning and development. It suggests studying contexts as a source of development as social situations of development. It analyzes play, early learning and the transition from play to school learning. It also explores the role of teachers and parents in supporting the development of executive functions, digital literacy, creative inquiries, problem solving and creativity as necessary and important prerequisites of children's school academic achievements. This volume contributes to the discourse on how children's learning is shaped in the 21st century era. It equips educators and parents with new and effective methods of creating developing contexts in their daily practice and to fully utilize the developing potential of existing contexts.

*The Art of Parenting* Linda Jackson, *International Handbook of Early Childhood Education* Marilyn Fleer, Bert van Oers, 2017-10-10. This international handbook gives a comprehensive overview of findings from longstanding and contemporary research, theory and practices in early childhood education in the Northern and Southern hemispheres. The first volume of the handbook addresses theory, methodology and the research activities and research needs of particular regions. The second volume examines in detail innovations and longstanding programs, curriculum and assessment and conceptions and research into child, family and communities. The two volumes of this handbook address the current theory, methodologies and research needs of specific countries and provide insight into existing global similarities in early childhood practices. By paying special attention to what is happening in the larger world contexts, the volumes provide a representative overview of early childhood education.
