Deterritorializing Language, Teaching, Learning, and Research, 2019-12-16 It is now recognized that language teachers and learners are both users and creators of knowledge in socially culturally politically materially complex and unpredictable environments With this in mind an increasing number of researchers in Second Language Education have progressively broken away from traditional ways of studying educational practices to find novel and more complex ways to conceptualize and study language teachers and learners teaching and learning practices and knowledge development This book is in line with these trends and should be considered as the actualization of experimentations with novel ways to apprehend the interrelationships between language and education by drawing on the conceptual repertoire of French philosopher Gilles Deleuze and his collaborator Félix Guattari To guide us through this reflexive journey ten scholars specialized in the field of Second Language Education call on their experiences as language educators and researchers to explore the intersections between language teaching learning and research focusing on the experiences of diverse populations e g students immigrants teachers etc in multiple settings e g Canada Japan United Kingdom universities and family literacy intervention programs Through this book new insights and lines of thought are

generated on how research and educative practices can be transformed to reimagine second language teaching learning and research to think differently about the experiences of language teachers learners and researchers and disrupt the processes that may prevent us from innovating and seizing future opportunities Contributors are Francis Bangou Maria Bastien Valenca Joff P N Bradley Martina Emke Douglas Fleming Roumiana Ilieva Brian Morgan Enrica Piccardo Aisha Ravindran Gene Vasilopoulos and Monica Waterhouse

Discipline and Learn Megan Watkins, 2012-03-24 *Discipline and Learn* Bodies Pedagogy and Writing explores how discipline is typically construed as a form of subjection in contemporary educational thought and in critical and cultural theory more broadly It provides a critique of this emphasis on the repressive aspects of discipline highlighting its enabling potential and role in the development of dispositions to learning The book engages with the work of a range of theorists Foucault Bourdieu Merleau Ponty Mauss and Spinoza and considers their usefulness in theorizing embodiment and learning in the teaching of writing in the early years of school Emphasis however is placed on the work of Bourdieu and his notion of habitus melding theory and practice in an ethnography of contemporary classrooms This text is invaluable reading for students and academics across the social sciences and humanities interested in questions of embodiment affect and their relation to learning This is the most thought provoking book to be published on pedagogy in a long long time Conceptually elegant and empirically rich it undercuts conventional wisdom and potentially rearranges how we think about teaching learning and writing It argues that students bodies not just their minds matter in learning explaining how in practice the desire to learn is a mindful bodily disposition And it shows how through an enabling form of discipline teachers can produce a scholarly habitus in all students including the educationally disadvantaged and defiant Jane Kenway Professor of Education Monash University *Discipline and Learn* Bodies Pedagogy and Writing an excellent book which makes an important contribution to our understanding of both pedagogy and the body and which is sure to spark debate in both fields It is careful and judicious in its approach but still manages to be provocative and original Nick Crossley Professor of Sociology University of Manchester

Encyclopedia of the Mind Harold Pashler, 2013-01-14 It s hard to conceive of a topic of more broad and personal interest than the study of the mind In addition to its traditional investigation by the disciplines of psychology psychiatry and neuroscience the mind has also been a focus of study in the fields of philosophy economics anthropology linguistics computer science molecular biology education and literature In all these approaches there is an almost universal fascination with how the mind works and how it affects our lives and our behavior Studies of the mind and brain have crossed many exciting thresholds in recent years and the study of mind now represents a thoroughly cross disciplinary effort Researchers from a wide range of disciplines seek answers to such questions as What is mind How does it operate What is

currently see it is like two sides of the same coin we learn in order to be workers who produce and learn we have a need to consume We then devour the commodities we have produced whilst others take the profits One of the greatest paradoxes of the human condition has been the place of the individual in the group community or conversely how the groups allow the individual to exist rather than stifle individuality Modernity is flawed and the type of society that we currently have which we in the West call a learning society is in need of an ethical overhaul in this late modern age There is a need to bring a different perspective both political and ethical on lifelong learning and the learning society in order to try to understand what the good society and the good life might become In Democracy Lifelong Learning and the Learning Society the third volume of his trilogy on lifelong learning Professor Jarvis expertly addresses the issues that arise from the vision of the learning society The book concludes that since human beings continue to learn so the learning society must be a process within the incomplete project of humanity All three books in the trilogy will be essential reading for students in education HRD and teaching and learning generally in addition to academics and informed practitioners The Lifelong Learning and the Learning Society Trilogy Volume 1 Towards a Comprehensive Theory of Human Learning Volume 2 Globalisation Lifelong Learning and the Learning Society Volume 3 Democracy Lifelong Learning and the Learning Society Peter Jarvis is an internationally renowned expert in the field of adult learning and continuing education He is Professor of Continuing Education at the University of Surrey UK and honorary Adjunct Professor in Adult Education at the University of Georgia USA
