Learning To Care:

Learning to Care Robert Wuthnow, 1995-11-02 Urgent calls have gone forth from the White House and Congress from schools churches synagogues and other agencies for Americans to become more involved in caring for the needy and in serving their communities And as federal and state governments across the nation cut back on aid to the poor and disabled the role of volunteerism can only grow in importance But how can we inspire caring behavior in our young when so many adults seem indifferent to the problems of the needy when many problems such as homelessness seem beyond individual effort and when agencies often come under fire for ineffectiveness if not corruption Drawing on deeply moving personal accounts from young people who have become involved in community service as well as on data from recent national surveys *Learning to Care* looks at why teenagers become involved in volunteer work what problems and pressures they face and what we can do to nurture caring in our youth Robert Wuthnow's intimate interviews bring to life the stories of high school student volunteers teenagers such as Tanika Lane a freshman who works with Literacy Education and Direction LEAD a job training program for inner city kids and Amy Stone a homecoming queen and student body president at a suburban southern school who organizes rallies for AIDS awareness Through these profiles Wuthnow shows that caring is not innate but learned in part from the spontaneous warmth of family life and in part from finding the right kind of volunteer work He contends that volunteers sense of service is shaped by what they find in school service clubs in shelters for the homeless in working with AIDS victims or in tutoring inner city children And Wuthnow also argues that the best environment to nurture the helping impulse is the religious setting where in fact the great bulk of volunteering in America takes place In these organizations as well as in schools and community agencies teenagers can find the role models and moral incentives that will instill a sense of service that they can then carry into their adult life Robert Wuthnow is one of our leading commentators on religious life in America the author of *Acts of Compassion* which was nominated for both a Pulitzer Prize and a National Book Award *Learning to Care* the sequel to that highly acclaimed volume offers an eye opening and somewhat reassuring portrait of volunteerism among America's youth as it helps lay the groundwork for teaching our children to care

and experienced teachers developing curricula for this group Unreasonable Men Victor J. Seidler, 2013-07-23 This much needed book is the first to show how dominant forms of masculinity are implicated in the traditions of social theory that have emerged since the Enlightenment The author shows how an unreasonable form of reason has emerged from the separation of reason from emotion mind from body nature from culture public from private matter from spirit the dualities that have shaped our vision of modernity The book argues that men need to explore critically their power and experience which has been rendered invisible by the dominant traditions of social theory Instead of legislating for others they have to learn to speak more personally for themselves **Rethinking Education and Poverty** William G. Tierney, 2015-11-01 How can new ways of thinking about education improve the lives of poor students In Rethinking Education and Poverty William G Tierney brings together scholars from around the world to examine the complex relationship between poverty and education in the twenty first century International in scope this book assembles the best contemporary thinking about how education can mediate class and improve the lives of marginalized individuals In remarkably nuanced ways this volume examines education's role as both a possible factor in perpetuating and a tool for alleviating entrenched poverty Education has long been seen as a way out of poverty Some critics however argue that educational systems mask inequality and perpetuate cycles of poverty and wealth others believe that the innate resilience or intellectual ability of impoverished students is what allows those individuals to succeed Rethinking Education and Poverty grapples in turn with the ramifications of each possibility Throughout these compelling far reaching and provocative essays the contributors seek to better understand how local efforts to reduce poverty through education interact or fail to interact with international assessment efforts They take a broad historical view examining social economic and educational policies from the postWorld War II period to the end of the Cold War and beyond Although there is no simple solution to inequality this book makes clear that education offers numerous exciting possibilities for progress **Clinical Perspectives on Meaning** Pninit Russo-Netzer, Stefan E.
