Nine Professional Conversations to Change Our Schools William A. Sommers, Diane P. Zimmerman, 2018-05-02 Improve collective efficacy in schools through meaningful professional conversations In a landscape where technology can undermine personal connections even the most talented educator can

feel like they're practicing their craft in isolation. *Nine Professional Conversations to Change Our Schools* is a framework for revitalizing the art of the professional conversation. It guides educators through structures for collaboration, grants access to vast storehouses of applied wisdom, and facilitates a consensual knowledge base for standards of excellence. 9 conversational strategies designed to promote collective efficacy in education. Learning scenarios demonstrate the effectiveness of these conversations in action. Accessible Conversational Dashboard assists in analyzing conditions for success. *Learning in the Making* Margaret Carr, Carolyn Jones, Wendy Lee, Anne B. Smith, Kate Marshall, Judith Duncan, 2010-01-01. This book presents an international perspective on environmental education and specifically the influence that context has on this aspect of curriculum. The focus is on environmental education both formal and non-formal and the factors that impact upon its effectiveness, particularly in non-Western and non-English speaking contexts, i.e. outside the UK, USA, Australia, NZ, etc. An important feature of the book is that it draws upon the experiences and research from local experts from an extremely diverse cohort across the world: 25 countries and 2 regions in total. The book addresses topics such as the development of environmental education in different countries, its implementation, the influence of political, cultural, societal, or religious mores, governmental or ministerial drives, economic or other pressures driving curriculum reform, the influence of external assessment regimes on environmental education, and so on. Multimodal Conversation Analysis and Interpretative Phenomenological Analysis Kevin W. H. Tai, 2023-04-05. This book presents the methodological framework of combining Multimodal Conversation Analysis (MCA) with Interpretative Phenomenological Analysis (IPA) to interpretively analyse translanguaging practices in educational contexts. Beginning with an overview of the three uses of translanguaging: translanguaging as a theory of language, as a pedagogical practice, and as an analytical perspective, the book goes on to critically examine the different methodological approaches for analysing translanguaging practices in multilingual classroom interactions. It explains how MCA and IPA are useful methodologies for understanding how and why translanguaging practices are constructed by participants in the classroom and discusses types of data collected and data collection procedures. The author, Kevin W. H. Tai, shows how combining these approaches enables researchers to study how translanguaging practices are constructed in multilingual classrooms and how teachers make sense of their own translanguaging practices at particular moments of classroom interaction. This detailed and concise guide is indispensable for students, practitioners, policymakers, and researchers from across the globe, particularly those working in the fields of applied linguistics and language education. **Values Information from AI** The Values We Share Project, Values information from AI is a collection of information and images of values generated from an AI tool as part of The Values We Share Project to promote values.
