Learning To Eat Behavior Modification For Weight Control

Jeff Housman, Mary Odum

Learning To Eat Behavior Modification For Weight Control:

Learning to Eat James Mecham Ferguson, 1975 **International Handbook of Behavior Modification and Therapy** Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received. Moreover, now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field. Thus we are grateful to our friends, colleagues, and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured. Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first. The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version. Chapters 3, 9, 29, and 30 of the first edition either have been dropped or were combined, whereas 14 new chapters have been added. In effect, we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s. Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations. The most notable advances are taking place in such areas as cognitive approaches, geriatrics, and behavioral medicine, and also in the treatment of childhood disorders.

The Treatment of Obesity J.F. Munro, 2013-03-09 During the last few years there has been growing medical interest in the problem of obesity. Although this may not have resulted in a dramatic breakthrough in our understanding of the condition, at least we are now more aware of our ignorance. Possibly this partly explains the increasing medical concern for and sympathy in the management of the obese. In the introductory chapter John Garrow says that he believes it would be better to treat a few people well than many subjects unsuccessfully. This theme is developed in those chapters which deal with specific forms of therapy including exercise, protein sparing, fasting, and bypass surgery, while the chapters on pharmacological agents review our knowledge and our ignorance of the mode of action and efficacy of the currently available drugs. Almost in contrast, the chapter on behavioural therapy and group therapy suggests that obesity is a problem which could best be tackled on a community basis. Clearly such an approach is very attractive, and the combination of behavioural therapy and slimming organizations would appear to offer the best prospects of controlling most subjects' weight problems. There will always remain, however, the individual patient in whom there will be a place for the various special techniques now available. It is hoped that this book will contribute to a greater understanding of the various problems faced by the obese and the regimes that can be offered.
