A photograph of Earl Holton, a man with glasses, wearing a white shirt and a red tie, sitting in a light-colored armchair. He is smiling and looking towards the camera. His hands are clasped in his lap. In the background, there is a Meijer store with a sign that reads "MEIJER'S THRIFT SUPER MARKET". The scene is set during sunset or sunrise, with a warm orange glow.

Grossman,John J. Cogan,2012-09-01 This book originates from a collaborative research initiative to examine how various societies in the Asia Pacific Region construct moral and civic education and to what extent these systems achieve the democratic objective of creating socially responsible citizens In many western societies there is at least a rhetorical tendency to separate the moral and civic dimensions of citizenship education and in some cases to exclude the moral dimension from the discourse of preparing citizens However as cross societal dialogues and research about citizenship education have increased in the past two decades scholars have identified differences in the emphasis put on the moral dimension of citizenship education across the Asia Pacific region In many predominantly Confucian Islamic and Buddhist societies for example the emphasis on the moral dimension of citizenship education is explicit and in some cases central While awareness of a divide or perhaps more appropriately a continuum in the role of moral versus civic education in democratic societies has been recognized for some time to our knowledge this book marks the first effort of this scope to address the issue of the moral civic divide in citizenship education Thus through a cross cultural dialogue across societies in the Asia Pacific Region this book addresses the issue of whether elements of both civic and moral education can be effectively joined to create a socially responsible citizen **From Teacher Thinking to Teachers and Teaching** Cheryl J. Religious Education in a World of Religious Diversity Wilna A.J. Meijer,Siebre Miedema,Alma Lanser-van der Velde,2009 This volume brings together a selection of papers presented at the Fifteenth Session of the International Seminar on Religious Education and Values ISREV which took place in 2006 in Driebergen the Netherlands addressing the theme Religious Education in a World of Religious Diversity The authors were invited to combine the concept of diversity with the dimensions of temporality of time and history in reworking their contributions for this book This temporal aspect is in a sense inherent in educational thinking On the one hand education as intergenerational transmission has a conservative aspect tradition being what is actually and presently transmitted from the past and or what is considered worthwhile to be passed on On the other hand acknowledging the activity of students themselves as a prerequisite for any education to happen brings the open endedness and therefore the future into the pedagogical arena in terms of development learning reflection edification et cetera So the question answered in this volume is what does this inherent historicity mean for religious education as well as for the concept religion and religious diversity In answering this question the contributions represent the global character of the concern with religious diversity in relation to religious education and originate respectively from the following countries Canada Bhikkhu English United States Moran Latvia Ilishko Russia Kozyrev Germany Pirner South Africa Roux du Preez Ferguson Japan Omori Australia de Souza Turkey Sel uk and the Netherlands Meijer Miedema

Professional Learning in the Work Place for International Students Georgina Barton, Kay Hartwig, 2017-06-28. This book shares a range of examples where international students have undertaken a work placement practicum internship or participated in work integrated learning. Contributions reflect on the successes and challenges that this particularly diverse group of students experience when undertaking work placement programs in a variety of disciplines such as education, engineering and health. The book explores these experiences via three main conceptualisations: 1 Internationalisation and interculturalisation including the diversity of international student cohorts and the associated policy practices and assessment related to international students in higher education; 2 Multi socialisation of international students with a focus on new cultural contexts, professional learning and disciplinarity; and 3 Reflection and reflective practice acknowledging that for improvement and change to occur those involved need to reflect on current and possible future practice. A working model of effective practice is introduced which can inform prospective international students, their mentors, supervisors, work placement coordinators and other relevant university staff.
