Neither commonplace books nor diaries, but something of both, they contain notes on literary, theological, philosophical, scientific, social, and psychological matters, plans for and fragments of works, and many other items of great interest. Shortly after World War II, Kathleen Coburn, formerly of Victoria College in Toronto, rediscovered this great collection of unpublished manuscripts. With the support of the Coleridge estate, she embarked on a career of editing and publishing these volumes and was awarded with many honours for her work, including a Leverhulme Award (1948), a Guggenheim Fellowship (1953), a Fellowship in the Royal Society of Canada (1958), the Order of Canada (1974), and an honorary doctorate from her own university. 1935 To the wider public he is well known for the Robbins Report of the 1960s on Higher Education which recommended a major expansion of university education in Britain However throughout his academic career at Oxford and the London School of Economics in the 1920s and as Professor of Economics at the School from 1929 to 1961 he was renowned as an exceptionally gifted teacher Generations of students remember his lectures for their clarity and comprehensiveness and for his infectious enthusiasm for his subject Besides his famous graduate seminar his most important and influential courses at LSE were the Principles of Economic Analysis which he gave in the 1930s and again in the late 1940s and 1950s as well as the History of Economic Thought from 1953 until long after his official retirement This book publishes for the first time the manuscript notes Robbins used for his lectures on the Principles of Economic Analysis from 1929 30 to 1934 40 At the outset of his career he took the advice of a senior colleague to prepare his lectures by writing them out fully before he presented them the full notes for most of his pre war lectures survive and are eminently decipherable Since he made two major revisions of the lectures in the 1930s the Principles notes show both the development of his own thought and the way he incorporated the major theoretical innovations made by younger economists at LSE such as John Hicks and Nicholas Kaldor or elsewhere notably Joan Robinson He intended to turn his lecture notes into a book abandoning the project only when he was asked to chair the Committee on Higher Education in 1960 This volume is not exactly the book he wanted to write but it is a unique record of what was taught to senior undergraduate and graduate economists in those years of high theory It will be of interest to all economists interested in the development of economics in the twentieth century **Doubtful**

**Certainties** Jesús Padilla Gálvez, Margit Gaffal, 2013-05-02 To what extent can we doubt certainties How are certainties expressed in words Which language games convey certainty To answer these questions we have to recall the method Wittgenstein used in his investigations When we look at language games and forms of life as inseparable phenomena do forms of life then provide any certainty On the other hand do we automatically relapse into relativism once we doubt certainties Which formal structures underlie certainty and doubt The book is intended to answer these questions
