A Broken Chain pursues a central theme in English historical thinking over seven centuries Covering more than half a millennium this first volume explains how and why the experience of the Norman Conquest prompted both an unprecedented campaign in the early twelfth century to write or create the history of England and to excavate and fabricate pre Conquest English law Garnett traces the treatment of the Conquest in English historiography legal theory and practice and political argument through the middle ages and early modern period examining the dispersal of these materials from libraries after the dissolution of the monasteries and the attempts made to rescue edit and print many of them in the late sixteenth and early seventeenth centuries These preservation efforts enabled the Conquest to become still more contested in the constitutional cataclysms of the seventeenth century than it had been in the eleventh and twelfth The seventeenth century resurrection of the Conquest will be the subject of a second volume

College Lectures on Ecclesiastical History William Bates, 1852 *Liberalism, Imperialism, and the Historical Imagination* Theodore Koditschek, 2011-02-10 This book examines the ways in which imperial agendas informed the writing of history in nineteenth century Britain and how historical writing transformed imperial agendas Using the published writings and personal papers of Walter Scott J A Froude James Mill Rammohun Roy T B Macaulay E A Freeman W E Gladstone and J R Seeley among others Theodore Koditschek sheds light on the role of the historical imagination in the establishment and legitimation of liberal imperialism He shows how both imperialists and the imperialized were drawn to reflect back on the Empire's past as a result of the need to construct a modern multi national British imperial identity for a more economically expansive and enlightened present By tracing the imperial lives and historical works of these pivotal figures Theodore Koditschek illuminates the ways in which discourse altered practice and vice versa as well as how the history of Empire was continuously written and re written

Charles John Abraham (bp. of Wellington, N.Z.), 1845 *Notes on books* Longmans, Green and co, 1909 **Historians and the Church of England** James Kirby, 2016-03-03 Historians and the Church of England explores the vital relationship between the Church of England and the development of historical scholarship in the Victorian and Edwardian era It draws upon a wide range of sources from canonical works of history to unpublished letters from sermons to periodical articles to give a clear picture of the influence of religion upon the rich and flourishing world of English historical scholarship The result is a radically revised understanding of both historiography and the Church of England It shows that the main historiographical topics at the time the nation the constitution the Reformation and increasingly socio economic history were

all imprinted with the distinctively Anglican concerns of leading historians. It brings to life the ideas of time, progress and divine providence which structured their understanding of the past. It also shows that the Church of England remained a learned church concerned not just with narrowly religious functions but also with scholarly and cultural ones. In the early twentieth century, intellectual secularization was a slower and more fragmented process than accounts focused on natural science, especially Darwinism, to the exclusion of the humanities have led us to believe. This is not just the history of a coterie of scholars but also of a wealth of texts and ideas that had a truly global circulation at a time when history was second only to the Bible and perhaps the novel in its cultural status and readership.
