

What is Rhetoric?

It's a long story ("what is rhetoric? It's about 20 lectures," one of my teachers once said). Rhetoric began 2500 years ago as the study of the **forms of communication and argument essential to public, political and legal life** in Ancient Greece. It has since evolved a rich and diverse body of research, texts, and pedagogies.

There are thirty lectures in the collection all on rhetoric and the different kinds or characteristics of style. The book is divided into an examination of the several ways of communicating our thoughts by speech and an attention to the principles of those literary compositions which contribute to persuasion or entertainment. The species of communication discussed include descriptive and narrative or historical composition, poetry, demonstrative oratory, panegyric, didactic or scientific language, deliberative oratory and judicial or forensic oratory. The subjects addressed in his teachings include the style and genius of some of the best of the ancient writers and poets especially the historians and the English classics.
