Fighting Proliferation New Concerns For The Nineties:

Fighting Proliferation Henry D. Sokolski, 2000-09-01 Fighting Proliferation Henry Sokolski, 2002-04-01 Proliferation of dangerous weapons has been a problem for American foreign policy for many years at least since the first and worst case of proliferation the Soviet acquisition of nuclear capability in 1949 Although more realistic and hardheaded in its approach than much antiproliferation literature of earlier times this volume does not indulge in the unorthodox and blithe optimism about the consequences of proliferation that became fashionable in the past decade among some theorists The book is forthrightly in the mainstream of opposition to proliferation and the search for practical policy relevant approaches to dealing with it That combination of strategic realism and policy orientation is the right one and rare enough that it highlights the usefulness of this collection Proliferation is a new priority but an old issue Some strategists are discovering it for the first time So it is not surprising that to some seasoned observers much current literature on the subject seems to reinvent the wheel This book does not Readers interested in fresh approaches to the problem that could at any time turn into the principal crisis facing American foreign policy will do well to turn to this volume **Twenty-First Century Weapons Proliferation**

James M. Ludes, Henry Sokolski, 2014-01-14 Leading US security practitioners from the Ford Carter Reagan Bush and Clinton administrations plus other experts on proliferation clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider **Combating Proliferation** Jason D. Ellis, Geoffrey D. Kiefer, 2007-02-23 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community's flawed assessment of Iraq's weapons systems and the Bush administration's decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan's development of nuclear weapons North Korea's defiance of UN watchdogs Russia's transfer of nuclear and missile technology to Iran and China's to Pakistan the Soviet biological warfare program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration's policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers Prevailing in a Well-armed World Henry D. Sokolski, 2000 The Strategic Studies Institute is pleased to publish Prevailing In A Well Armed World Devising Competitive Strategies

Against Weapons Proliferation This work provides insights into the competitive strategies methodology Andrew Marshall notes that policymakers and analysts can benefit by using an analytical tool that stimulates their thinking more directly about strategy in terms of long term competition between nations with conflicting values policies and objectives Part I of this work suggests that the competitive strategies approach has value for both the practitioner and the scholar The book also demonstrates the strengths of the competitive strategies approach as an instrument for examining U S policy The method in this book focuses on policies regarding the proliferation of weapons of mass destruction In shaping the international environment in the next millennium no other national security issue seems as complex or important The imperative here is to look to competitive strategies to assist in asking critical questions and thinking broadly and precisely about alternatives for pitting U S strengths against opponents weaknesses Part II uses the framework to examine and evaluate U S nonproliferation and counterproliferation policies formed in the final years of the 20th century In Part III the competitive strategies method is used to analyze a regional case that of Iran

Prevailing in a Well-Armed World: Devising Competitive Strategies Against Weapons Proliferation , Consensus or Conflict? Huiyao Wang,Alistair Michie,2021-09-28 This open access book brings together leading international scholars and policy makers to explore the challenges and dilemmas of globalization and governance in an era increasingly defined by economic crises widespread populism retreating internationalism and a looming cold war between the United States and China It provides the diversity of views on those widely concerned topics such as global governance climate change global health migration S T revolution financial market and sustainable development It is a truly unique book Never before has such an authoritative group of essayists come together to develop deep new thinking about global governance that is relevant to current shared global challenges They express deep concerns about the historically unprecedented upheavals in the world They describe the unparalleled turbulence that mankind is facing in the form of multiple crises any one of which has the potential to bring civilization to its knees The most obvious of these is the threat posed by climate change They spell out why these perils pose a stark choice for the human race They stress how any path that leads to conflict increases the risk of catastrophe In this context the common thread is that a consensus must be reached about the future of our world They have put forward many ideas and potential new policies reflecting their vision of what this consensus should be and how it is the only way forward for the human race

Toward Normalizing U.S.-Korea Relations Edward A. Olsen,2002 Considering the future of U S Korea relations Edward Olsen first provides a rich assessment of the political economic and strategic factors that have shaped and flawed U S policy toward the Korean peninsula since World War II Olsen suggests that the prospect of permanent separation has become integral to U S policy toward both Korean states Offering counterintuitive recommendations for reinvigorating the in due course paradigm his analysis is firmly grounded in the current debate about the course of U S foreign policy in general and in particular its role in the East Asian context

Transforming NATO Ivan Dinev Ivanov,2011-07-16 Transforming NATO

New Allies Missions and Capabilities by Ivan Dinev Ivanov reveals that in order to understand the complexity of NATO's transformation one must explore the management of allied relations through two mutually reinforcing theoretical lenses club goods theory and the concept of complementarities The findings of this research have implications for international security alliance management NATO politics transatlantic relations and broader international relations theory **Air University Library Index to Military Periodicals**, 1997 **Technological Change and the Future of Warfare** Michael E. O'Hanlon, 2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia **Threat of Ballistic Missiles in the Middle East** Arieh Stav, 2004-06-01 This addresses the complex issue of defence against ballistic missiles by intercepting them at various stages of their trajectory The book poses both technical and conceptual questions regarding the issue of missile to missile interception and other options **The Impact of Missile Threats on the Reliability of U.S. Overseas Bases: A Framework for Analysis**, **Cooperative Threat Reduction, Missile Defense and the Nuclear Future** M. Krepon, 2003-01-17 In this book Michael Krepon analyzes nuclear issues such as missile defenses space warfare and treaties and argues that the United States is on a dangerous course During the Cold War Mutual Assured Destruction or MAD facilitated strategic arms control Now that the Cold War has been replaced by asymmetric warfare treaties based on nuclear overkill and national vulnerability are outdated and must be adapted to a far different world A new strategic concept of Cooperative Threat Reduction is needed to replace MAD A balance is needed that combines military might with strengthened treaty regimes **Deterrence in the 21st Century** Max G. Manwaring, 2001 This anthology argues that facing the diverse threats in the new world disorder requires a new look and new approaches The requirement is to establish that contemporary deterrence demands replacing the old nuclear theology with new policy and strategy to deal with the myriad state non state and trans national nuclear and non nuclear menaces that have heretofore been ignored or wished away

Deterrence in the Twenty-first Century Max G. Manwaring, 2013-02-01 This anthology argues that facing the diverse threats in the new world disorder requires a new look and new approaches The requirement is to establish that contemporary deterrence demands replacing the old nuclear theology with new policy and strategy to deal with the myriad state non state and trans national nuclear and non nuclear menaces that have heretofore been ignored or wished away

People's Liberation Army After Next , *The End of Grand Strategy* Simon Reich, Peter Dombrowski, 2018-01-15 In *The End of Grand Strategy* Simon Reich and Peter Dombrowski challenge the common view of grand strategy as unitary They eschew prescription of any one specific approach chosen from a spectrum that stretches from global primacy to restraint and isolationism in favor of describing what America's military actually does day to day They argue that a series of fundamental recent changes in the global system the inevitable jostling of bureaucratic politics and the practical limitations of field operations combine to ensure that each presidential administration inevitably resorts to a variety of strategies Proponents of different American grand strategies have historically focused on the pivotal role of the Navy In response Reich and Dombrowski examine six major maritime operations each of which reflects one major strategy One size does not fit all say the authors the attempt to impose a single overarching blueprint is no longer feasible Reich and Dombrowski declare that grand strategy as we know it is dead *The End of Grand Strategy* is essential reading for policymakers military strategists and analysts and critics at advocacy groups and think tanks

Cyber-Diplomacy Evan H. Potter, 2002 Potter communications U of Ottawa formerly a senior strategist in the Communications Bureau at the Canadian Department of Foreign Affairs and International Trade DFAIT argues that advances in information technology will act as catalysts for forces of fragmentation and integration in the current international system He presents seven contributions that explore the theoretical implications of the growth of information technologies and test their ideas on how the processes have manifested and the DFAIT Also discussed are the ability of NGOs and social movements to use communication technologies to resist multilateral trade agreements the impact of CNN and other global television phenomena and the possibilities that governments can use information technologies to enhance their public diplomacy and their soft power Annotation copyrighted by Book News Inc Portland OR

Trust in Nuclear Disarmament Verification Wyn Q. Bowen, Hassan Elbahtimy, Christopher Hobbs, Matthew Moran, 2018-01-23 This book explores how human factors in particular the contested notion of trust influence the conduct and practice of arms control verification In the nuclear arena disarmament verification is often viewed purely in terms of a dispassionate scientific process Yet this view is fundamentally flawed since the technical impossibility of 100 per cent verification opens the door to a host of complex issues and questions regarding the process and its outcomes Central among these is the fact that those involved in any verification inspection process must inevitably conduct their work in a space that falls well short of absolute certainty The lines between scientific enquiry and human psychology can become blurred and outcomes have the potential to be influenced by perceptions Drawing on extensive empirical evidence the authors explore the

complex interplay between evidence based judgements and perceptions of intentions that frames the science of verification. The book provides new insights into the role and influence of human factors in the verification process, shedding light on this blind spot of verification research. It is an invaluable resource for practitioners, academics, and students working in arms control and disarmament.
