Appendix: Tank landing ships (LST)* United States. Naval History Division,1981 British Battleships 1914-18 (2) Angus Konstam,2013-12-20 In 1906 the Germans began building their own dreadnought fleet armed with larger guns word of which soon reached the British Admiralty This raised the spectre that the British dreadnought fleet would be outgunned and prompted the Admiralty to order the building of their own super dreadnoughts The first of these new dreadnoughts were laid down in 1909 and entered service three years later The British public supported this programme and the slogan we want eight and cannot wait became popular a reference to the building of eight of these super dreadnoughts Four more super dreadnoughts entered service in 1914 By then the Admiralty had developed a new programme of fast battleships armed with 15 inch guns These powerful warships entered service in time to play a part in the battle of Jutland in 1916 World War I broke out before the Royal Navy had fully evaluated these new warships and so lessons had to be learned through experience often the hard way Although none of these super dreadnoughts were lost in battle their performance at the battle of Jutland led to a re evaluation of the way they were operated Still for four years they denied control of the sea to the enemy and so played a major part in the final collapse of Imperial Germany **Dictionary of American Naval Fighting Ships: pt. A. Historical sketches** ,1991 The dictionary consists of an alphabetical index to over 10 000 ship histories documenting nearly every ship that the US Navy has put to sea Continental and Confederate vessels are also included Entries include physical information commissioning service record notable actions and decommissioning Drawings photographs and documents are also included The Web site is an electronic version of the previously published dictionary series Web entries may be corrected and updated from those that appeared in the printed series **Conway's All the World's Fighting Ships, 1922-1946** Roger Chesneau,1980 Conway s All The World s Fighting Ships series presents an international history of iron and steel warships from the first ironclad to the modern warship The acclaimed series involved a major revaluation of published information and the wide scale use of unpublished sources German High Seas Fleet 1914-18 Angus Konstam,2023-09-28 A superbly illustrated new account of how Germany s High Seas Fleet was built operated and fought as it challenged the world s most powerful navy in World War I Seven years before the outbreak of World War I the Imperial German Navy rebranded its Home Fleet as the Hochseeflotte

or High Seas Fleet It was a force designed to take on the Royal Navy then the world's most powerful and for the next four years the North Sea would be their battleground Drawing on extensive research Angus Konstam offers the reader a concise fully illustrated account of how the entire High Seas Fleet was designed and built how it operated and how it fought The fleet was a modern balanced force of dreadnought battleships battlecruisers cruisers and torpedo boats using Zeppelins and U boats for reconnaissance The ultimate test between them came in May 1916 when they clashed at Jutland Packed with spectacular original artwork maps 3D diagrams and archive photos it explains how and why the fleet was built its role and how and why it fought as it did From fighting doctrine and crew training to intelligence logistics and gunnery this book is an essential guide to the Kaiser's audacious bid for naval glory International Law and the World War James Wilford Garner,1920 **Ships Monthly** ,1988 **A Guide to the Military History of the World War, 1914-1918** Thomas Goddard Frothingham,1920 **All the World's Fighting Ships** Frederick Thomas Jane,1920 **Directory of the World's Capital Ships** Paul H. Silverstone,1984 **Bibliography of Nautical Books** Alan Obin,1999 **Royal Navy Grand Fleet 1914-18** Angus Konstam,2025-02-27 World War I was Britain's last moment as the world's naval superpower and its Grand Fleet was then the most powerful ever seen Fully illustrated this explores its fighting power At the start of World War I the Royal Navy's forces were amalgamated into a single entity the Grand Fleet and stationed in Scapa Flow Orkney The Grand Fleet was the largest amalgamation of modern naval power the world had seen with over 30 dreadnought battleships or battlecruisers and a plethora of cruisers and destroyers In 1917 it was reinforced further by a powerful American squadron In this book based on extensive primary source research naval expert Angus Konstam assesses the Grand Fleet's ships technology organization command and intelligence and how it fought While ship for ship its German counterparts were better designed as a combined fleet Admiral Jellicoe's armada was unstoppable It took part in several clashes with its German foe during the war but it was only at the Battle of Jutland in 1916 that Jellicoe finally had the chance to destroy the enemy Although the High Seas Fleet deftly avoided the trap laid for it the Grand Fleet's economic blockade then really began to bite which led to Germany's surrender in November 1918 Packed with battle diagrams spectacular artwork and archive photos this book is an essential guide to the last time the Royal Navy would be indisputably the world's most powerful **History of Texas World War Heroes** ,1919 **Warships in the Baltic Campaign 1918-20** Angus Konstam,2022-04-28 A fascinating look at the British naval intervention in the Baltic in 1918 20 and at the British Soviet and Baltic nationalist fleets that fought Following the Russian Revolution of October 1917 the Baltic states became a battleground between Russian Reds and Whites German troops and emerging Baltic independence forces In November 1918 the British government decided to intervene to protect British interests and to support the emerging Baltic states This initial small force of cruisers and destroyers was eventually augmented by other British warships including aircraft carriers a monitor as well as a handful of submarines and torpedo boats Opposing them was the far more powerful Russian Baltic Fleet

now controlled by the Bolsheviks The campaign that followed involved naval clashes between the two sides the most spectacular of which was an attack on the Soviet naval base of Kronstadt in June 1919 by a force of small British torpedo boats They torpedoed and sunk the Russian cruiser Oleg an action which effectively bottled the Baltic fleet up in port for the remainder of the campaign Finally in early 1920 the British squadron was withdrawn following Soviet recognition of Estonia Latvia and Lithuania This New Vanguard title explores the naval side of this little known but strategically crucial campaign fought by the war weary navies of Britain and Russia and by warships of the emerging Baltic states Describing the political background to the conflict and the key points of the naval campaign as well as the warships involved this is a concise and fascinating account of an overlooked naval campaign that helped reshape the map of Europe
