Resources in Education, 2000-10 Research in Education, 1974 *Practical Considerations in Computer-Based Testing* Cynthia G. Parshall, 2002 This book emphasizes the practical side of computer based testing and presents suggestions information and ideas for its actual implementation It provides information that can be used to make informed decisions including the type of computer based test that should be administered possible cost to examinees examinee reactions to the test scoring issues computer mode effects and many more *Automatic Item Generation* Mark J. Gierl, Thomas M. Haladyna, 2013 The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on Automatic Item Generation by organizing in one volume what is currently known about this research area **The Effects of Knowledge of Results and Test Difficulty on Ability Test Performance and Psychological Reactions to Testing** J. Stephen Prestwood, 1978 Students were administered one of three conventional or one of three stradaptive vocabulary tests with or without knowledge of results KR The three tests of each type differed in difficulty as assessed by the expected proportion of correct responses to the test items Results indicated that the mean maximum likelihood estimates of individuals abilities varied as a joint function of KR provision and test difficulty Students receiving KR scored highest on the most difficult test and lowest on the least difficult test students receiving no KR scored highest on the least difficult test and did most poorly on the most difficult tests Although the students perceived the differences in test difficulty there were no effects on mean student anxiety or motivation scores attributable to difficulty alone Regardless of test difficulty students reacted very favorably to receiving KR and its provision increased the mean level of reported motivation Author **Government Reports Annual Index**, 1985 **Computer-based Education**, 1987 *Proceedings of the 1977 Computerized Adaptive Testing Conference Held at the University of Minnesota, July 19-22, 1977* David J. Weiss, 1978 **Scientific and Technical Aerospace Reports**, 1979 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Educational Measurement* Robert L. Linn, 1993 A comprehensive standard reference on the theory and principles of testing this edition was originally published by ACE Macmillan in 1989 revising and updating the second edition of 1971 The volume is divided into three sections covering theory and general principles administration and scoring and applications Discussed in detail is how computer technology can be the primary tool for successfully integrating testing with instruction Each of the 18 in depth articles is followed by an extensive bibliography of references Annotation copyright by Book News Inc Portland OR *Handbook of Psychological Assessment* Gerald Goldstein, Michel Hersen, 2000-02-16 The field of psychological assessment has been undergoing rapid change The second edition of this Handbook published in 1990 appeared at the beginning of a decade marked by extensive advances in assessment in essentially all of its specialized areas There are many new tests new applications of established tests and new

test systems Major revisions have appeared of established tests notably the Wechsler intelligence scales The time seemed right for a third edition since even over the relatively brief period of ten years many tests described in the second edition have been replaced and are no longer commonly used Furthermore much new research in such areas as neuropsychology cognitive science and psychopathology have made major impacts on how many tests and other assessment procedures are used and interpreted This third edition represents an effort to give the reader an overview of the many new developments in assessment while still maintaining material on basic psychometric concepts in order for it to continue to serve as a comprehensive handbook for the student and professional

Behavior & Society, 1985 **Journal of Computer-based Instruction**, 1983 *Psychometrics for Educational Debates* Leo J. Th. van der Kamp, Willem F. Langerak, Dato N. de Gruijter, 1980 *Measurement and Assessment in Teaching* Robert L. Linn, M. David Miller, 2005 For Test and Measurement courses this volume introduces prospective teachers to all of the elements of measurement and assessment that are essential to good teaching including the techniques needed to create use evaluate and interpret the full spectrum of both published and self created assessment vehicles **Procedures for Instructional Systems Development** Harold F. O'Neil, 1979 **Proceedings of the ... ETS Invitational Conference**, 1978 *Alberta Journal of Educational Research*, 2005 **Computerised Psychological Testing** Lorraine D. Eyde, 1987 **New Horizon Testing** David J. Weiss, 1983-10-28

New Horizons in Testing Latent Trait Test Theory and Computerized Adaptive Testing provides an in depth analysis of psychological measurement espoused by the computer latent trait test theory item response theory and computerized adaptive testing The book is organized into five parts The first part addresses basic problems in estimating the parameters of the item response theory models that constitute a class of latent trait test theory models The second part discusses the implications of item response theory for measuring individuals using more than just simply a trait level e g ability score Part III describes the application of item response theory models to specific applied problems including the problem of equating tests or linking items into a pool a latent trait model for timed tests and the problem of measuring growth using scores derived from the application of item response theory models Part IV is concerned with the application of item response theory to computerized adaptive testing Finally Part V includes discussion of two special models beyond the standard models used in the rest of the book One of these models the constant information model is a simplification of the general latent trait models whereas the other is an extension of latent trait models to the problem of measuring change Psychometricians psychologists and psychiatrists will find the book useful
