White,1992 The concept of generation as a historical category has never been used more effectively than in *Lost Comrades* The socialists of the Front Generation young men in 1914 were driven into politicalactivity and ideological exploration by the experience of the First World War Their efforts torenew socialism to carry it beyond Marxism andbeyond the working class were profound andoriginal yet ultimately they failed *Lost Comrades* follows

the Front Generation socialists from their questioning of Marxist orthodoxies in the 1920s into their confrontations with the twin challenges of fascism and world depression in the early 1930s. Responding to these dangers they devised with little success counterpropaganda against the fascists and planning blueprints for the economy. Eventually some of the most prominent Sir Oswald Mosley in Britain, Hendrik de Man in Belgium, Marcel Datin in France shifted their hopes to fascism or during the Second World War to collaborationism in Hitler's Europe. Others however like Carlo Mierendorff and Theodor Haubach in Germany ended as martyrs in the anti-Nazi resistance. Yet even these divergent paths showed parallels reflecting their common starting point. In tracing these unfulfilled careers White brings a new clarity to the hopes and limitations of European socialism between the two world wars.

Children Gerhard Rempel, 2015-07-15 Eighty two percent of German boys and girls between the ages of ten and eighteen belonged to Hitlerjugend Hitler Youth or one of its affiliates by the time membership became fully compulsory in 1939. These adolescents were recognized by the SS as an exclusive cadre of Nazi zealots as a source of future recruits to its own elite ranks which were made up largely of men under the age of thirty. In this book Gerhard Rempel examines the special relationship that developed between these two most youthful and dynamic branches of the National Socialist movement and concludes that the coalition gave nazism much of its passionate energy and contributed greatly to its initial political and military success. Rempel centers his analysis of the HJ-SS relationship on two branches of the Hitler Youth. The first of these the Patrol Service was established as a juvenile police force to pursue ideological and social deviants, political opponents and non-conformists within the HJ and among German youth at large. Under SS influence however membership in the organization became a preliminary apprenticeship for boys who would go on to be agents and soldiers in such SS-controlled units as the Gestapo and Death's Head Formations. The second the Land Service was created by HJ to encourage a return to farm living. But this battle to reverse the flight from the land took on military significance as the SS sought to use the Land Service to create defense peasants who would provide a reliable food supply while defending the Fatherland. The transformation of the Patrol and Land services like that of the HJ generally served SS ends at the same time that it secured for the Nazi regime the practical and ideological support of Germany's youth. By fostering in the Hitler Youth as national community of the young the SS believed it could convert the popular movement of nazism into a protomilitary program to produce ideologically pure and committed soldiers and leaders who would keep the movement young and vital. **Predigten vom heiligen Ostersonntage** ... , 1861
