Generalized Nets:

Generalized Nets Krassimir T. Atanasov, 1991 The Generalized Nets GNs are extensions of Petri nets and of different Petri nets modifications introduced by the author 1982 In the book definitions and the basic properties of GNs are given The GNs extensions and reductions are discussed GNs which describe the functioning and results of the work of different types of petri nets different types of finite automata and of Turing machines are given Over the GNs are defined different operations relations and operators They can also be transferred onto other nets Many open problems in the GNs theory are given

Applications Of Generalized Nets Krassimir T Atanasov, 1993-03-31 This book discusses some applications of Generalized Nets GNs They include the functioning and results of the work of expert systems flexible manufacturing systems neuron networks computers medical transportation chemical and other processes Processes can be simulated controlled and optimized on the basis of these GNs A program package for GNs PPGN is described

Innovative Issues in Intelligent Systems Vassil Sgurev, Ronald R. Yager, Janusz Kacprzyk, Vladimir Jotsov, 2016-02-05 This book presents a broad variety of different contemporary IT methods and applications in Intelligent Systems is displayed Every book chapter represents a detailed specific far reaching and original research in a respective scientific and practical field However all of the chapters share the common point of strong similarity in a sense of being innovative applicable and mutually compatible with each other In other words the methods from the different chapters can be viewed as bricks for building the next generation thinking machines as well as for other futuristic logical applications that are rapidly changing our world nowadays

Multilayer Neural Networks Maciej Krawczak, 2013-04-17 The primary purpose of this book is to show that a multilayer neural network can be considered as a multistage system and then that the learning of this class of neural networks can be treated as a special sort of the optimal control problem In this way the optimal control problem methodology like dynamic programming with modifications can yield a new class of learning algorithms for multilayer neural networks Another purpose of this book is to show that the generalized net theory can be successfully used as a new description of multilayer neural networks Several generalized net descriptions of neural networks functioning processes are considered namely the simulation process of networks a system of neural networks and the learning algorithms developed in this book The generalized net approach to modelling of real systems may be used successfully for the description of a variety of

technological and intellectual problems it can be used not only for representing the parallel functioning of homogenous objects but also for modelling non homogenous systems for example systems which consist of a different kind of subsystems The use of the generalized nets methodology shows a new way to describe functioning of discrete dynamic systems

Uncertainty and Imprecision in Decision Making and Decision Support: New Challenges, Solutions and Perspectives Krassimir T. Atanassov, Vassia Atanassova, Janusz Kacprzyk, Andrzej Kaluszko, Maciej Krawczak, Jan W. Owsinski, Sotir Sotirov, Evdokia Sotirova, Eulalia Szmidt, Slawomir Zadrozny, 2020-06-26 This book gathers selected papers from two important conferences held on October 24-28 2018 in Warsaw Poland the Fifteenth National Conference of Operational and Systems Research BOS 2018 one of the leading conferences in the field of operational and systems research not only in Poland but also at the European level and the Seventeenth International Workshop on Intuitionistic Fuzzy Sets and General Nets IWIFSGN 2018 one of the premiere conferences on fuzzy logic The papers presented here constitute a fair and comprehensive representation of the topics covered by both BOS 2018 and IWIFSGN 2018 including extensions of the traditional fuzzy sets in particular on the intuitionistic fuzzy sets as well as other topics in uncertainty and imprecision modeling the Generalized Nets GNs a powerful extension of the traditional Petri net paradigm and InterCriteria Analysis a new method for feature selection and analyses in multicriteria and multi attribute decision making problems The Workshop was dedicated to the memory of Professor Beloslav Rie an 1936-2018 a regular participant at the IWIFSGN workshops

Angelov, K.T. Atanassov, L. Doukowska, M. Hadjiski, V. Jotsov, J. Kacprzyk, N. Kasabov, S. Sotirov, E. Szmidt, S. Zadrozny, 2014-09-23 This two volume set of books constitutes the proceedings of the 2014 7th IEEE International Conference Intelligent Systems IS or IEEE IS 2014 for short held on September 24-26 2014 in Warsaw Poland Moreover it contains some selected papers from the collocated IWIFSGN 2014 Thirteenth International Workshop on Intuitionistic Fuzzy Sets and Generalized Nets The conference was organized by the Systems Research Institute Polish Academy of Sciences Department IV of Engineering Sciences Polish Academy of Sciences and Industrial Institute of Automation and Measurements PIAP The papers included in the two proceedings volumes have been subject to a thorough review process by three highly qualified peer reviewers Comments and suggestions from them have considerably helped improve the quality of the papers but also the division of the volumes into parts and assignment of the papers to the best suited parts *Artificial Intelligence and Soft Computing - ICAISC 2006* Leszek Rutkowski, Ryszard Tadeusiewicz, Lotfi A. Zadeh, Jacek

Zurada,2006-06-27 This book constitutes the refereed proceedings of the 8th International Conference on Artificial Intelligence and Soft Computing ICAISC 2006 held in Zakopane Poland in June 2006 The 128 revised contributed papers presented are organized in topical sections on neural networks and their applications fuzzy systems and their applications evolutionary algorithms and their applications rough sets classification and clustering image analysis and robotics bioinformatics and medical applications various problems of artificial intelligence *Artificial Neural Networks: Formal Models and Their Applications - ICANN 2005* Wlodzislaw Duch,Erkki Oja,Slawomir Zadrozny,2005-08-25 This volume is the first part of the two volume proceedings of the International Conference on Artificial Neural Networks ICANN 2005 held on September 11 15 2005 in Warsaw Poland with several accompanying workshops held on September 15 2005 at the Nicolaus Copernicus University Toru Poland The ICANN conference is an annual meeting organized by the European Neural Network Society in cooperation with the International Neural Network Society the Japanese Neural Network Society and the IEEE Computational Intelligence Society It is the premier European event covering all topics concerned with neural networks and related areas The ICANN series of conferences was initiated in 1991 and soon became the major European gathering for experts in those fields In 2005 the ICANN conference was organized by the Systems Research Institute Polish Academy of Sciences Warsaw Poland and the Nicolaus Copernicus University Toru Poland From over 600 papers submitted to the regular sessions and some 10 special conference sessions the International Program Committee selected after a thorough peer review process about 270 papers for publication The large number of papers accepted is certainly a proof of the vitality and attractiveness of the field of artificial neural networks but it also shows a strong interest in the ICANN conferences

Uncertainty and Imprecision in Decision Making and Decision Support: Cross-Fertilization, New Models and Applications Krassimir T. Atanassov,Janusz Kacprzyk,Andrzej Kałuszek,Maciej Krawczak,Jan Owsinski,Sotir Sotirov,Evdokia Sotirova,Eulalia Szmidt,Slawomir Zadrozny,2017-10-06 This book presents selected papers from two important conferences held on October 12 14 2016 in Warsaw Poland the Fourteenth National Conference of Operational and Systems Research BOS 2016 one of the premiere conferences in the field of operational and systems research not only in Poland but also at the European level and the Fifteenth International Workshop on Intuitionistic Fuzzy Sets and General Nets IWIFSGN 2016 one of the foremost conferences on fuzzy logic notably addressing extensions of the traditional fuzzy sets as well as the Generalized Nets GNs a powerful extension of the traditional Petri net paradigm The scope of the BOS conferences includes all types of problems related to systems modeling systems analysis broadly perceived operational research optimization decision making and decision support to name but a few In all these areas virtually all models used have to take into account not only uncertainty in its traditional sense but also imprecision of information That is in addition to traditional probabilistic and statistical tools and techniques the use of methods based on fuzzy sets can also be sensible Even more so employing certain extensions of the classic concept of a fuzzy set can be very useful Applying intuitionistic fuzzy sets which are at the core of

the IWIFSGN conferences is a good example Both conferences BOS 2016 and IWIFSGN 2016 offered ideal venues for the exchange of ideas cross fertilization and mutual inspiration Interval-Valued Intuitionistic Fuzzy Sets Krassimir T.

Atanassov,2019-09-21 The book offers a comprehensive survey of interval valued intuitionistic fuzzy sets It reports on cutting edge research carried out by the founder of the intuitionistic fuzzy sets Prof Krassimir Atanassov giving a special emphasis to the practical applications of this extension A few interesting case studies such as in the area of data mining decision making and pattern recognition among others are discussed in detail The book offers the first comprehensive guide on interval valued intuitionistic fuzzy sets By providing the readers with a thorough survey and important practical details it is expected to support them in carrying out applied research and to encourage them to test the theory behind the sets for new advanced applications The book is a valuable reference resource for graduate students and researchers alike **Advanced**
