Genesis And Structure Of Hegels Phenomenology Of Spirit:

Genesis and Structure of Hegel's "Phenomenology of Spirit" Jean Hyppolite, 1974 Jean Hyppolite produced the first French translation of Hegel's Phenomenology of Spirit His major works the translation his commentary and Logique et existence 1953 coincided with an upsurge of interest in Hegel following World War II Yet Hyppolite's influence was as much due to his role as a teacher as it was to his translation or commentary Foucault and Deleuze were introduced to Hegel in Hyppolite's classes and Derrida studied under him More than fifty years after its original publication Hyppolite's analysis of Hegel continues to offer fresh insights to the reader

Hegel's Phenomenology of Self-Consciousness Leo Rauch, David Sherman, 1999-05-27 Offering a new translation of the famous chapter IV Self Consciousness of Phenomenology of Spirit this book reflects the far reaching insights of contemporary Hegelian scholarship Included is extensive commentary as well as a review of its reception by such important twentieth century thinkers as Kojève Heidegger Sartre Gadamer Bataille Deleuze Lacan and Habermas Interest in Hegel has historically centered around the Phenomenology of Spirit In particular chapter IV including Hegel's celebrated master slave dialectic has influenced philosophers political theorists social psychologists cultural anthropologists and literary theorists alike Hegel began this chapter with an influential discussion of the nature of human desire and then described a hypothetical encounter between two pre social human beings who engage in a life and death struggle for recognition Out of this struggle that gave rise to self identity emerged such forms of consciousness as master and slave stoicism skepticism and what Hegel referred to as the unhappy consciousness which he took to be paradigmatic of early Christianity These forms of consciousness in turn are transcended by other more comprehensive forms of consciousness that ultimately come to reflect the highest elaborations of societal life The impetus for these dynamic changes comes from the dialectical contradictions that inhere within our most basic conceptions of personhood

Genesis and structure of Hegel's phenomenology Jean Hyppolite, 1974 **Hegel and the Logical Structure of Love** Toula Nicolacopoulos, George Vassilacopoulos, 2010 This study presents an original interpretation of the meaning and complex inter relationship of the concepts of love sexuality family and the law It argues that they should be understood as forms of interplay between the subjective and the objective necessity and contingency and unity and difference A comprehensive elaboration of these forms is to be found in Hegel's Science of Logic the conclusions of which he used to organise his ethical and political thought The argument is introduced with a discussion of the relevance of Hegel's speculative philosophy to modernity The authors then explore the relationship between thought being and recognition in Hegel's philosophical system and offer an interpretation of the Science of Logic This interpretation forms the basis of a re assessment of Hegel's treatment of love sexual relationships the family and law A Hegelian account of familial love is employed to review recent debates within a range of discourses including feminism family law and gay and lesbian studies As well as addressing current concerns about sexual difference and the ontology of homosexuality the study provides a guide to reading Hegel in an

original and productive way It will be of interest to philosophers feminists theorists of sexualities ethical and legal theorists

The Narrative Shape of Truth Ilya Kliger,2011 Draws on philosophical and novelistic texts from the Western European and Russian canons to explore a crucial moment in the epistemological history of narrative and present a nonreductive way of conjugating the histories of philosophy and the novel Provided by publisher **Dialectic and Gospel in the**

Development of Hegel's Thinking Stephen Crites,2010-11-01 **The Oxford Handbook of Hegel** Dean

Moyar,2017-05-15 The Oxford Handbook of Hegel is a comprehensive guide to Hegel s philosophy from his first published writings to his final lectures There are six chapters each on the Phenomenology of Spirit and The Science of Logic in depth analyses of the Encyclopedia and essays on the major parts of the Philosophy of Right Several chapters cover the many newly edited lecture series from the 1820s bringing new clarity to Hegel s conception of aesthetics the philosophy of religion and the history of philosophy The concluding part focuses on Hegel s legacy from his role in the formation of Marx s philosophy to his importance for contemporary liberal political philosophy The Handbook includes many essays from younger scholars who have brought new perspectives and rigor to the study of Hegel s thought The essays are marked by close engagement with Hegel s difficult texts and by a concern to highlight the ongoing systematic importance of Hegel s philosophy **Hegel and**

Greek Tragedy Martin Thibodeau,2013 The present study is dedicated to the different interpretations of Greek tragedy proposed in the writing of G W F Hegel It explicates how and in what sense Hegel s investigation in tragedy parallels the development of his philosophy from his early theological writings to his Marx's Discourse with Hegel N.

Levine,2012-02-21 The end of Stalinist Russia China s change under Deng Xiaoping and the publication of previously unexplored documents of Marx in the MEGA2 opened a new epoch in the analysis of Marx Marx s Discourse With Hegel is both a product and contribution to this rebirth of Marxism by its reformulation of the relationship between Hegel and Marx

Hegel, Kant and the Structure of the Object Robert Stern,2002-09-11 Hegel s holistic metaphysics challenges much recent ontology with its atomistic and reductionist assumptions Stern offers us an original reading of Hegel and contrasts him with his predecessor Kant **Lenin, Hegel, and Western Marxism** Kevin Anderson,1995 This first full length treatment of Lenin s studies of Hegel presents Lenin as a major figure in Hegelian Marxism providing a more nuanced portrait of his work than that of either official Marxist Leninism or most Western accounts With impressive argumentation and wide ranging scholarship Anderson presents us with a Lenin that no one seriously interested in current debates over the relevance of Marxist theory to socialist practice can afford to miss Bertell Ollman author of *Dialectical Investigations* An important contribution to grasping the conceptual roots of Marxist theory and practice Tom Rockmore author of *Hegel s Circular Epistemology* Today Lenin looks like he did little more than prepare the way for Stalin You will find the opposite view in this novel study I recommend the book to anyone seriously interested in Russia and revolution George Uri Fischer author of *The Soviet System and Modern Society* *History at the Limit of World-History* Ranajit Guha,2003-08-27 The past

is not just as has been famously said another country with foreign customs it is a contested and colonized terrain Indigenous histories have been expropriated eclipsed sometimes even wholly eradicated in the service of imperialist aims buttressed by a distinctly Western philosophy of history Ranajit Guha perhaps the most influential figure in postcolonial and subaltern studies at work today offers a critique of such historiography by taking issue with the Hegelian concept of World history That concept he contends reduces the course of human history to the amoral record of states and empires great men and clashing civilizations It renders invisible the quotidian experience of ordinary people and casts off all that came before it into the nether existence known as Prehistory On the Indian subcontinent Guha believes this Western way of looking at the past was so successfully insinuated by British colonization that few today can see clearly its ongoing and pernicious influence He argues that to break out of this habit of mind and go beyond the Eurocentric and statist limit of World history historians should learn from literature to make their narratives doubly inclusive to extend them in scope not only to make room for the pasts of the so called peoples without history but to address the historicity of everyday life as well Only then as Guha demonstrates through an examination of Rabindranath Tagore s critique of historiography can we recapture a more fully human past of experience and wonder *Islamic Ethos and the Specter of Modernity* Farzin Vahdat,2015-06-15 Drawing on the work of Hegel this book proposes a framework for understanding modernity in the Muslim world and analyzes the discourse of prominent Muslim thinkers and political leaders Chapter by chapter the book undertakes a close textual analysis of the works of Mohammad Iqbal Abul Ala Maududi Sayyid Qutb Fatima Mernissi Mehdi Haeri Yazdi Mohammad Mojtaehd Shabestari Mohammad Khatami Seyyed Hussein Nasr and Mohamad Arkoun drawing conclusions about contemporary Islamic thought with reference to some of the most significant markers of modernity Starting with Derrida Sean Gaston,2007-01-01 This is an important new introduction to Derrida offering a brand new reading of his key works through an examination of his relationship with Plato and Aristotle **Hegel & the Infinite** Slavoj Žižek,Clayton Crockett,Creston Davis,2011 Here 13 major scholars reassess the place of Hegel in contemporary theory and the philosophy of religion The contributors focus not only on Hegelian analysis but also on the transformative value of his thought in relation to our current turn to religion *Pierre Macherey and the Case of Literary Production* Warren Montag,Audrey Wasser,2022-08-15 This collection revisits A Theory of Literary Production 1966 to show how Pierre Macherey s remarkable and still provocative early work can contribute to contemporary discussions about the act of reading and the politics of formal analysis Across a series of historically and philosophically contextualized readings the volume s contributors interrogate Macherey s work on a range of pressing issues including the development of a theory of reading and criticism the relationship between the spoken and the unspoken the labor of poetic determination and of literature s resistance to ideological context the literary relevance of a Spinozist materialism the process of racial subjectification and the ontology of Blackness and a theorization of the textual surface Pierre Macherey and the Case of Literary Production also includes three new texts by Macherey presented here in

English for the first time his postface to the revised French edition of *A Theory of Literary Production* Reading Althusser in which Macherey analyzes the concept of symptomatic reading and a comprehensive interview in which Macherey reflects on the historical conditions of his early work the long arc of his career at the intersection of philosophy and literature and the ongoing importance of Louis Althusser's thought Recent translations of Macherey's work into English have introduced new readers to the critic's enduring power and originality Timely in its questions and teeming with fresh insights Pierre Macherey and the Case of Literary Production demonstrates the depths to which his work resonates now more than ever **The**

Concept of World from Kant to Derrida Sean Gaston, 2013-09-20 In the mid eighteenth century metaphysics was broadly understood as the study of three areas of philosophical thought theology psychology and cosmology This book examines the fortunes of the third of these formidable metaphysical concepts the world Sean Gaston provides a clear and concise account of the concept of world from the mid eighteenth century to the end of the twentieth century exploring its possibilities and limitations and engaging with current issues in politics and ecology He focuses on the work of five principal thinkers Kant Hegel Husserl Heidegger and Derrida all of whom attempt to establish new grounds for seeing the world as a whole Gaston presents a critique of the self evident use of the concept of world in philosophy and asks whether one can move beyond the need for a world like vantage point to maintain a concept of world From Kant to the present day this concept has been a problem for philosophy and it remains to be seen if we need a new Copernican revolution when it comes to the concept of world Madness and Death in Philosophy Ferit Guven, 2012-02-01 Ferit Guven illuminates the historically constitutive roles

of madness and death in philosophy by examining them in the light of contemporary discussions of the intersection of power and knowledge and ethical relations with the other Historically as Guven shows philosophical treatments of madness and death have limited or subdued their disruptive quality Madness and death are linked to the question of how to conceptualize the unthinkable but Guven illustrates how this conceptualization results in a reduction to positivity of the very radical negativity these moments represent Tracing this problematic through Plato Hegel Heidegger and finally in the debate on madness between Foucault and Derrida Guven gestures toward a nonreducible disruptive form of negativity articulated in Heidegger's critique of Hegel and Foucault's engagement with Derrida that might allow for the preservation of real otherness and open the possibility of a true ethics of difference *The Decolonial Abyss* An Yountae, 2016-10-03 The

Decolonial Abyss probes the ethico political possibility harbored in Western philosophical and theological thought for addressing the collective experience of suffering socio political trauma and colonial violence In order to do so it builds a constructive and coherent thematization of the somewhat obscurely defined and underexplored mystical figure of the abyss as it occurs in Neoplatonic mysticism German Idealism and Afro Caribbean philosophy The central question An Yountae raises is How do we mediate the mystical abyss of theology philosophy and the abyss of socio political trauma engulfing the colonial subject What would theopoetics look like in the context where poetics is the means of resistance and survival This

book seeks to answer these questions by examining the abyss as the dialectical process in which the self's dispossession before the encounter with its own finitude is followed by the rediscovery or reconstruction of the self **Immanence and the Vertigo of Philosophy** Christian Kerslake, 2019-07-31 No detailed description available for Immanence and the Vertigo of Philosophy
