## **Learning Centers For Child Centered Classrooms:**

**Learning Centers for Child-centered Classrooms** Janice Pattillo, Elizabeth Vaughan, 1992 A learning center is a defined space where materials are organized in such a way that children learn without the teacher's constant direction. This book offers guidelines that will help preprimary and primary school teachers organize and manage learning centers in the classroom. Chapter 1 describes the advantages of using learning centers and explains what a learning center classroom looks like. Chapter 2 focuses on organizational and management concerns such as arranging the room, scheduling the day, previewing and reviewing activities, limiting the number of children working in the centers, and monitoring their choices. Chapter 3 considers the role of the teacher in assessment, the planning and setting up of learning centers, interaction, and arbitration. In chapters 4 and 5, types of learning centers appropriate for preprimary and primary education are discussed in terms of the rationale for the center, the integration of developmental skills into learning in the center, organizational suggestions, and sample activities. Chapter 4 discusses preprimary centers for art, table games, discovery, dramatic play, blocks, music, and construction, and library and gross motor centers. Chapter 5 looks at learning centers appropriate for primary grades, including centers for creative writing, reading, spelling, handwriting, social studies, science, and mathematics, library centers, and active primary centers which function as extensions of the centers discussed in chapter 4. A list of resource books is included in both chapters 4 and 5. Chapter 6 suggests first steps for the teacher considering the conversion to a learning center classroom.

**AC** *Cultivating the Learner-Centered Classroom* Kaia Tollefson, Monica K. Osborn, 2007-12-06 A superb book that does exactly what it promises: takes the reader from theory to practice. Rich with clear prose, strong research, and thoughtful reflection, this useful tool is for teachers who want to engage students more deeply with each other, the content, and the world, all for the sake of real learning.

Parker J. Palmer, Author *The Courage to Teach: Facilitate the growth of successful learning communities both in the classroom and schoolwide.* Teachers at every level face the challenge of finding a balance between learner-centered philosophies and day-to-day classroom life. Aligned with progressive educational thought, this book shows teachers how to make the jump from theory to practice and cultivate learning communities in the classroom and in their schools. The authors help both new and experienced educators engage in a fundamental shift in their teaching approach: from behaviorism to constructivism, from following recipes to understanding the learning process, from standardized, age-based expectations to using standards for individualizing expectations and instruction, and from coercing obedience to facilitating students' authority and autonomy. Readers will find examples illustrating learner-centered strategies in action, information about how to work more effectively with students with special needs, and methods for organizing the classroom, planning instruction for individuals, small groups, or an entire class, building students' responsibility for their own learning, observing, assessing, and reporting student growth. Practical and accessible, *Cultivating the Learner-Centered Classroom* is an essential companion for teachers who want to empower and motivate students for lifelong learning.
