Learning from Experience William R. Torbert,1972

Working with Experience David Boud,Nod Miller,1996

Everyday we are confronted with problems and challenges which we address by drawing on our experience and by using this experience to find ways of learning what to do in new circumstances Learning through experience is the normal commonplace approach to learning and we take it for granted Whilst much is known about teaching and being taught far less attention has been given to learning in context in particular to learning outside the classroom Yet this is in fact where most learning takes place One especially neglected area is the role which people other than the learner play in facilitating learning This role is undertaken not only by teachers trainers parents and counsellors but also by managers supervisors care givers and friends This book brings together the experiences of a number of practitioners who write from often strongly contrasting perspectives these include feminism Marxism critical pedagogy post modernism and Gestalt humanistic clinical and transpersonal psychology The authors also come from a wide range of international backgrounds including adult higher and teacher education community work organisational development and psychotherapy

Each chapter is grounded not only in professional practice and in theory but also in personal experience Overall then the book provides fascinating insights into what some good practitioners do to promote learning and how they make sense of this David Boud is professor in the School of Adult Education University of Technology Sydney Nod Miller is Professor in the Department of Innovation Studies University of East London

Informal Learning Lloyd Davies, 2017-03-02 In much of the developed world learning is synonymous with the formal structured processes that involve teachers lecturers or trainers Yet it is experience that is by far the most influential teacher that any of us will have from the very first moment we are born Lloyd Davies puts forward a new way of looking at experiential learning a model that identifies the elements and points to some of the dynamics The book highlights the characteristics that are common to the learning process explains how we learn from experience and why each of us sees our experiences in different ways and consequently learns different lessons It provides advice and guidance on how each of the various elements of the process can be used to greater effect both for individual and group learning as well as in mentoring and counselling The book which is based on the author's research is written for a wide readership that includes both learning practitioners and students If individuals and the organizations within which they work as students or as employees understand the basis on which they learn and can turn the process from a passive to an active one the implications for their development are profound Lloyd Davies model for Informal Learning provides a relevant flexible and significant tool that can offer a sea change in the way we all learn

Learning Experience, Designing the Online Learning Experience Simone C. O. Conceição, Les Howles, 2023-07-03 This book provides instructors with a holistic way of thinking about learners learning and online course design The distinctive strategies derived from an integrated framework for designing the online learning experience help create an experience that is more personalized engaging and meaningful for online learners The focus of this book is on the learners and the design of their online learning experiences The authors refer to learning design instead of instructional design which focuses on instruction and places the instructor at the center stage of the process Therefore the focus is on approaching a learner's online course experience as a journey consisting of a combination of learning interactions with content instructor and other learners In most online courses instructors and learners are separated in time and space and depend on technology to facilitate interactions that often lack a strong personal dimension As online learning continues to proliferate and mature the emphasis on simply making content available to students online is no longer acceptable Creating online courses now requires a new way of thinking that incorporates new design ideas and approaches from a variety of fields it also requires a new set of learning design skills for instructors and course designers Organized into eight chapters this volume focuses on enhancing online learning experiences for each of the major aspects of an online course providing evidence based principles and strategies to promote learner engagement and deep learning The concluding chapter provides an example illustrating a real world application of the principles and strategies covered in the book using Design Thinking to create learning experiences This book provides strategies for approaching the learning experience from an integrative perspective for both experienced online instructors and those new to online course design These strategies are based on evidence based learning design principles and encourage the reader to adopt an empathic mindset focused on the experience of the learner
