## **Learning From Hiv And Aids:**

Learning from HIV and AIDS George Ellison, Melissa Parker, Catherine Campbell, 2003-10-30 Different professional and academic disciplines have addressed the HIV AIDS pandemic from a variety of perspectives using different analytical approaches. By bringing these together in one volume *Learning from HIV AIDS* provides a more complete picture of this multifaceted disease from the biological and social factors which facilitate HIV transmission to the powerful cultural and political forces which fuel the pandemic. Chapters from contributors working on the aetiology, treatment and prevention of HIV AIDS identify how their work has helped predict the spread of HIV and has improved the survival of those infected. Yet interventions to reduce the spread of HIV have had limited success and few HIV infected individuals have access to combination drug therapies. Written for students and researchers and taking an interdisciplinary perspective, this book demonstrates that progress in developing effective and acceptable interventions can only be achieved through collaboration between the biological, medical and social sciences.

Learning from HIV/AIDS George Ellison, Melissa Parker, Catherine Campbell, 2003 *Learning from HIV AIDS* brings together perspectives from different disciplines to assess what we have learnt about HIV AIDS and what methodological and theoretical advances have arisen from studying it. It presents a holistic overview of the disease and identifies why unidisciplinary interventions for HIV prevention have failed.

*Education and HIV/AIDS in the Caribbean* Michael J. Kelly, Brendan Bain, 2005 Whilst a cure for HIV AIDS continues to elude scientists, the number of HIV AIDS cases continues to increase. Education becomes the key to curtailing the spread of the disease. *Education and HIV AIDS in the Caribbean* describes the impact of HIV AIDS on education in both the global and Caribbean contexts and outlines the lessons to be learnt from the global experience. The aim of the book is not only to highlight the role of education in HIV AIDS prevention but also to look specifically at the education sector, its role and response as well as the management of the response. It also intends to ensure that the education sector recognises the crucial role it must play in reducing the impact of HIV AIDS. The text is complete with illustrations on the socioeconomic, health and gender aspects of the disease and is a useful resource for anyone wanting to obtain precise information about the impact of the disease in the Caribbean.

Learning to Trust Paul Sendziuk, 2003 2003 marks the twentieth anniversary of the first case of HIV AIDS in Australia. Working from an extensive array of documents and interviews with key participants, Australia's response to the epidemic is examined to establish why it has been one of the most effective responses in the world.
