Leaving School Jon Wiles, John Lundt, 2004 *Educational Disadvantage and Early School Leaving (Demonstration Programme on Educational Disadvantage)*, 1998 **Secondary Education and the Raising of the School-Leaving Age** T. Woodin, G. McCulloch, S. Cowan, 2013-10-09 The progressive raising of the school leaving age has had momentous repercussions for our understanding of childhood and youth for secondary education and for social and educational inequality This book assesses secondary education and the raising of the school leaving age in the UK and places issues and debates in an international context Alternatives Education Models--interim Findings from the Replication of Career Intern Program, 1980 **The Condition of Education**, 1994 **Reframing Education Failure and Aspiration** Shaun Best, 2024-10 Education is considered central to social mobility and following a drive to raise learners aspirations an aspiration industry has emerged However the desire to leave school early should not be regarded as evidence of students lacking ambition This book traces the emergence of the aspiration industry and argues that to have ambitions that do not require qualifications is different but not wrong Reviewing the performance of six schools in England their Ofsted reports and responses it evaluates underpinning assumptions of what makes an effective school This book critically examines neo liberal education policy developments including the 1988 Education Reform Act and the political discourse around changing explanations of education failure with the rise in the marketisation of education The University of Michigan School of Education Bulletin University of Michigan.
