Lectures On Partial Differential Equatio:

Lectures on Partial Differential Equations Vladimir I. Arnold, 2003-10-29 Choice Outstanding Title January 2006 This richly illustrated text covers the Cauchy and Neumann problems for the classical linear equations of mathematical physics A large number of problems are sprinkled throughout the book and a full set of problems from examinations given in Moscow are included at the end Some of these problems are quite challenging What makes the book unique is Arnold's particular talent at holding a topic up for examination from a new and fresh perspective He likes to blow away the fog of generality that obscures so much mathematical writing and reveal the essentially simple intuitive ideas underlying the subject No other mathematical writer does this quite so well as Arnold
