**Choice of Pursuits, Or, What to Do and why** Nelson Sizer, 1888      **The Phrenological Journal and Science of Health**, 1887      Popular Phrenologist, 1896      *Science and Christianity in Pulpit and Pew* Ronald L. Numbers, 2007-09-10  
As past president of both the History of Science Society and the American Society of Church History Ronald L Numbers is  
uniquely qualified to assess the historical relations between science and Christianity In this collection of his most recent  
essays he moves beyond the clichés of conflict and harmony to explore the tangled web of historical interactions involving  
scientific and religious beliefs In his lead essay he offers an unprecedented overview of the history of science and Christianity  
from the perspective of the ordinary people who filled the pews of churches or loitered around outside Unlike the elite  
scientists and theologians on whom most historians have focused these vulgar Christians cared little about the discoveries of  
Copernicus Newton and Einstein Instead they worried about the causes of the diseases and disasters that directly affected  
their lives and about scientists preposterous attempts to trace human ancestry back to apes Far from dismissing opinion  
makers in the pulpit Numbers closely looks at two the most influential Protestant theologians in nineteenth century America  
Charles Hodge and William Henry Green Hodge after decades of struggling to harmonize Gods two revelations in nature and  
in the Bible in the end famously described Darwinism as atheism Green on the basis of his careful biblical studies concluded  
that Ussher's chronology was unreliable thus opening the door for Christian anthropologists to accommodate the subsequent  
discovery of human antiquity In *Science without God* Numbers traces the millennia long history of so called methodological  
naturalism the commitment to explaining the natural world without appeals to the supernatural By the early nineteenth  
century this practice was becoming the defining characteristic of science in the late twentieth century it became the central  
point of attack in the audacious attempt of intelligent designers to redefine science Numbers ends his reassessment by  
arguing that although science has markedly changed the world we live in it has contributed less to secularizing it than many  
have claimed Taken together these accessible and authoritative essays form a perfect introduction to Christian attitudes  
towards science since the 17th century      **Private Lectures on Perfect Men, Women and Children, in Happy Families**
