Francis A. Schaeffer

Ecology And Man:

The Subversive Science Paul Shepard, 1969 Population explosion pollution suburban sprawl death of the city the vanishing wilderness we keep hearing of these threats but usually manage to ignore them In this book we find instead a number of clear calm discussions of environmental problems providing information and ideas without excessive emotional appeal The 37 papers chosen from a wide variety of journals such as Human Biology Daedalus Landscape American Scientist are obviously intended for the nonspecialist intelligent reader They are divided into five groups of which the first deals with population problems both human and animal The Environmental Encounter is the title of a group of papers discussing man's reaction to his environment what he sees and the way he feels about it Here are included comments on American front yards the shapes of roofs in different European countries the importance of sacred places and an essay by Alan Watts reprinted from The Psychedelic Review The third and fourth sections are called Man and Other Organisms and Man in Ecosystems Here we learn about the domestication of cattle sidelights on evolution Ren Dubos comments on the germ theory the possible unexpected effects of pesticides and radiation A hopeful note appears in a discussion of the use of solar energy The final part called Ethos Ecos and Ethics includes more philosophical commentaries Especially interesting is a discussion by Lynn White of the historical roots of our ecologic crisis from a review by Marjorie C Meehan in [jama.jamanetwork.com/articleid/345416](#)

Pollution and the Death of Man Francis A. Schaeffer, 2022-03-21 Francis A Schaeffer's Timeless Assessment of a Modern Ecological Crisis From the time of creation God placed the earth in our care Since then humans have had a strained relationship with the ecosystem We have often misused resources and polluted the water air and land But if God's plan for redemption includes the earth we must be good stewards of his creation now With environmental threats increasing how should Christians respond This classic work by Francis A Schaeffer looks at modern ecological crises through the lens of theology and Scripture Renowned for his work in applied philosophy and theology Schaeffer answers serious philosophical questions about creation and ecology He concludes that we must return to a profoundly and radically biblical understanding of God's relationship to the earth and of our divine mandate to exercise godly dominion over it A Christian Classic Written by renowned philosopher Francis A Schaeffer Cultural Analysis from a Biblical Perspective Looks at modern ecological threats through the lens of theology and Scripture Educational Includes appendices on The Historical Roots of Our Ecologic Crisis by the late American historian Lynn White Jr and Why Worry About Nature by the late sociologist Richard L Means **The Closing Circle** Barry Commoner, 2020-02-12 I regard him as right and compassionate on nearly every major issue Stephen Jay Gould Radical 1971 argument about the root causes of climate change remains a must read for environmentalists

Ecology ,1922 **Man's Nature and Nature's Man** Lee Dice,2016-10-30 In *Man s Nature and Nature s Man* Lee R Dice tells of the interrelationship of man in his communities of his plant and animal associates and of how they act one upon the other He describes the laws that govern their rise and decline and the regulatory mechanisms set up by nature and by man himself that promote human progress He deals with the dynamics of human populations and with the philosophical and moral bases of human communities Finally he casts his eye upon the prospects before us A series of well regulated world communities he writes is not likely to be constructed soon nor without tremendous effort and travail Nevertheless the evolutionary trend is in that direction Selfishness ignorance and bigotry may delay the discovery and application of these principles But no force will be able to prevent the evolution of world communities which will continually advance toward ever higher levels of culture If effective efforts are made to discover and apply the natural laws that affect human affairs the time required can be greatly shortened Our future is in our own hands
