Ecology Science And Practice:

Ecology: Science And Practice Claude Faurie, 2001 **Ecology - Science and Practice** J. Devaux, C. Faurie, C. Ferra, P. Medori, 2001-01-01 Explaining all aspects of ecology and covering the interrelationships regulating the organization and functioning of ecosystems this manual synthesizes the science and methods of numerous other disciplines to help the reader better understand the logic of living Renewing Our Rivers Mark K. Briggs, Waite R. Osterkamp, 2021-01-05 Our rivers are in crisis and the need for river restoration has never been more urgent Water security and biodiversity indices for all of the world's major rivers have declined due to pollution diversions impoundments fragmented flows introduced and invasive species and many other abuses Developing successful restoration responses are essential *Renewing Our Rivers* addresses this need head on with examples of how to design and implement stream corridor restoration projects Based on the experiences of seasoned professionals *Renewing Our Rivers* provides stream restoration practitioners the main steps to develop successful and viable stream restoration projects that last Ecologists geomorphologists and hydrologists from dryland regions of Australia Mexico and the United States share case studies and key lessons learned for successful restoration and renewal of our most vital resource The aim of this guidebook is to offer essential restoration guidance that allows a start to finish overview of what it takes to bring back a damaged stream corridor Chapters cover planning such emerging themes as climate change and environmental flow the nuances of implementing restoration tactics and monitoring restoration results *Renewing Our Rivers* provides community members educators students natural resource practitioners experts and scientists broader perspectives on how to move the science of restoration to practical success **Law and Agroecology** Massimo Monteduro, Pierangelo Buongiorno, Saverio Di Benedetto, Alessandro Isoni, 2015-05-06 This book represents a first attempt to investigate the relations between Law and Agroecology There is a need to adopt a transdisciplinary approach to multifunctional agriculture in order to integrate the agroecological paradigm in legal regulation This does not require a super law that hierarchically purports to incorporate and supplant the existing legal fields rather it calls for the creation of a trans law that progressively works to coordinate interlegalities between different legal fields respecting their autonomy but emphasizing their common historical roots in *rus* in the process *Rus* the rural phenomenon as a whole reflects the plurality and interdependence of different complex systems based jointly on the land as a central point of reference Rural is more than agricultural if agriculture is understood traditionally as an activity aimed at exploiting the land for the production of material goods for use consumption and private exchange rurality marks the reintegration of agriculture into a broader sphere one that is not only economic but also social and cultural not only material but also ideal relational historical and symbolic and not only private but also public In approaching *rus* the natural and social sciences first became specialized multiplied and compartmentalized in a plurality of first order disciplines later they began a process of integration into Agroecology as a second order multi perspective and shared research platform Today Agroecology

is a transdiscipline that integrates other fields of knowledge into the concept of agroecosystems viewed as socio ecological systems However the law seems to still be stuck in the first stage Following a reductionist approach law has deconstructed and shattered the universe of law into countless disjointed legal elementary particles multiplying the planes of analysis and in particular keeping Agricultural Law and Environmental Law two separate fields

Connecting Ecologies Patrick Riordan,Gavin Flood,2024-06-03 *Connecting Ecologies* focuses on the environmental aspects of Pope Francis encyclical *Laudato Si* and the challenge to care for our common home It considers how best to devise and implement the new societal models needed to tackle the ecological problems facing the world today The book addresses the need for and complexity of an integral ecology one that looks not only at physical and biological processes but also allows for the contributions of theology philosophy spirituality and psychology including the implications for the human and social sciences The contributions document four categories of resonances resources requirements and responses evoked by a reading of *Laudato Si* and include consideration of other faith traditions They reflect on how care for our common home motivates people in different places cultures and professions to cooperate for myriad goods in common The volume is particularly relevant for scholars working in religious studies and theology with an interest in ecology the environment and the Anthropocene

Routledge Handbook of Ecological and Environmental Restoration Stuart K. Allison,Stephen D. Murphy,2017-05-18 Ecological restoration is a rapidly evolving discipline that is engaged with developing both methodologies and strategies for repairing damaged and polluted ecosystems and environments During the last decade the rapid pace of climate change coupled with continuing habitat destruction and the spread of non native species to new habitats has forced restoration ecologists to re evaluate their goals and the methods they use This comprehensive handbook brings together an internationally respected group of established and rising experts in the field The book begins with a description of current practices and the state of knowledge in particular areas of restoration and then identifies new directions that will help the field achieve increasing levels of future success Part I provides basic background about ecological and environmental restoration Part II systematically reviews restoration in key ecosystem types located throughout the world In Part III management and policy issues are examined in detail offering the first comprehensive treatment of policy relevance in the field while Part IV looks to the future Ultimately good ecological restoration depends upon a combination of good science policy planning and outreach all issues that are addressed in this unrivalled volume
