Routledge Revivals: Economic Development and the Role of Women (1989) Ruth Taplin, 2016-09-13 First published in 1989 this book provides a macro micro approach to economic development taking account of multi level linkages both inter and intra that had been missed by previous analyses The author argues that these linkages demonstrate that social and economic change may occur from the bottom up household family level and not just from the top down economic order level using women as a vehicle to illustrate this In the first section the expansive body of development literature is summarised and critically reviewed isolating the primary strengths and weaknesses Case studies of Malaysia the Chinese Commune and the Israeli Kibbutz demonstrate that a theory which combines the analysis of the organisation of work kinship and ethnicity can accommodate the experience of women in an integrated manner that traditional development theory has failed to achieve
