## **Economic History And The Social Sciences Problems Of Methodology:**

**Economic History and the Social Sciences** Elias H. Tuma,1971      **Economic History and the Social Sciences** Allen W. Trelease,1971      **Comparative Methods in the Social Sciences** Neil J. Smelser,2013-02-28 Even after teaching generations of social scientists Neil Smelser s classic book remains the most definitive statement of methodological issues for all comparative scholars and in political science anthropology sociology economics and psychology Such issues are timeless and therefore Smelser s lucid analysis remains timely and relevant Smelser posits a methodological continuity between the comparative studies of past masters and the more recent flow of contemporary comparative work To that end he takes a pragmatic critical look at the classic studies of Alexis de Tocqueville Emile Durkheim and Max Weber His analyses respect the historical specifics and contexts of their work but at the same time raise general issues such as cross unit comparability empirical representation of theoretical concepts and measures and historical causality The book also deals with the ongoing flows of comparative study in the social sciences which while methodologically more self conscious than past work nevertheless face a common set of issues including causation and classification The book s unique clarity makes it particularly useful for working scholars as well as students fighting their way through the methodological thickets of comparative studies      **Methodology of the Social Sciences, Ethics, and Economics in the Newer Historical School** Peter Koslowski,2012-12-06 The volume at hand gives an exposition of the tradition of the Historical School of Economics and of the Geisteswissenschaften or human sciences the latter in their development within the Historical School as well as in Neo Kantianism and the sociology of knowledge It continues the discussion started in the year 1994 on the Older Historical School of Economics and the 19th century German contribution to an ethical theory of economics with the Newer Historical School of the 20th century Economists social scientists and philosophers examine the contribution of this tradition and its impact for present theory The schools of thought and their approaches to economics as well as to the cultural and social sciences are examined here not as much for their historical interest as for their potential systematic contribution to the contemporary debates on economic ethics economics sociology and philosophy The volume at hand contains the proceedings of the Fourth Annual SEEP Conference on Economic Ethics and Philosophy in 1996 Economics and Ethics in the Historical School Part B Max Weber Heinrich Rickert Max Scheler Werner Sombart Arthur Spiethoff John Commons Alfred Marshall and Others held at Marienrode Monastery near Hannover Germany on March 27 30th 1996 together with several additional invited papers      *Methodology and Method in History (RLE Accounting)* Lee Parker,Finley Graves,2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since

the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals      Economic History and the Social Sciences Elias Hanna Tuma,1971      **The Blackwell Dictionary of Modern Social Thought** William Outhwaite,2008-04-15 Modern social thought ranges widely from the social sciences to philosophy political theories and doctrines cultural ideas and movements and the influence of the natural sciences Provides an authoritative overview of the main themes of social thought Long essays and entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text      **Methodological Misconceptions in the Social Sciences** Angelo Fusari,2014-03-31 This book offers a systematic view of social analysis that will advance the communication of results between different academic disciplines It overcomes misunderstandings that are due to the use of an unstructured variety of methodological traditions in the analysis of complex socioeconomic and political processes The book focuses on the special features of human society humans as subjects non repetitiveness and irreversibility of social actions and the peculiar relations between necessity and possibility in human action It defines methodological criteria procedures and rules that enable researchers to select and classify realistic hypotheses to derive general principles and basic organizational features It then applies these criteria in critical reviews of major theories and interpretations of society and history offering clarifications and alternative proposals with regard to crucial aspects of anthropological political juridical sociological and religious thought      **How Economics Forgot History** Geoffrey M Hodgson,2001-08-23 Hodgson calls into question the tendency of economic method to explain all economic phenomena using the same catch all theories He argues that you need different theories and that historical contexts must be taken into account      **Investigations into the Method of the Social Sciences ,      The New History and the Social Studies** Harry Elmer Barnes,1925 Adopted by woodchucks at birth a baby goose never feels she truly belongs until the day she discovers she can fly      **Critical Rationalism, the Social Sciences and the Humanities** I.C. Jarvie,N. Laor,1994-12-31 An outstanding feature of this book is the broad range of the contributors drawn from Europe the Middle East and North America testifying both to the range of Professor Agassi s interests and the geographical spread of his influence Most contributors use Agassi s ideas as a springboard to engage in debate on issues or offer a contribution in an area that interests him In this volume contributors consider such questions as Agassi s philosophy of education in practice as well as in theory the impact of psychologism in philosophy the origins of critical rationalism in the Bible the debates in economics stimulated by the work of Popper and Agassi and many other topics Besides the special topics the reader gains some sense of the fruitfulness of critical rationalism in the hands of Agassi s

friends and colleagues      *Routledge Handbook of Global Economic History* Francesco Boldizzoni, Pat Hudson, 2015-12-22

The Routledge Handbook of Global Economic History documents and interprets the development of economic history as a global discipline from the later nineteenth century to the present day Exploring the normative and relativistic nature of different schools and traditions of thought this handbook not only examines current paradigmatic western approaches but also those conceived in less open societies and in varied economic political and cultural contexts In doing so this book clears the way for greater critical understanding and a more genuinely global approach to economic history This handbook brings together leading international contributors in order to systematically address cultural and intellectual traditions around the globe Many of these are exposed for consideration for the first time in English The chapters explore dominant ideas and historiographical trends and open them up to critical transnational perspectives This volume is essential reading for both academics and students in economic and social history As this field of study is very much a bridge between the social sciences and humanities the issues examined in the book will also have relevance for those seeking to understand the evolution of other academic disciplines under the pressures of varied economic political and cultural circumstances on both national and global scales      **Study of Economic History** N.B.
