Legitimizing Human Rights NGOs Obiora Chinedu Okafor,2006 A claim and empirical demonstration that if human rights NGOs in Nigeria are to popularly legitimise themselves then almost all of them must undergo a fundamental revision of form concept and activist methods Legitimising NGOs in Africa will grant a greater achievement of influence to those organisations this volume argues that only a transition to a mass movement model will ensure the legitimisation of most Nigerian and African human rights NGO communities Okafor builds a list of recommendations designed to be used as a blueprint for successfully popularising NGOs

Copyright Reconstructed: Rethinking Copyright's Economic Rights in a Time of Highly Dynamic Technological and Economic Change P. Bernt Hugenholtz,2018-04-11 About this book Copyright Reconstructed is the result of a collaborative research project Reconstructing Rights funded by Microsoft Europe that normatively examined the core economic rights protected under EU copyright law with the aim of realigning these rights with economic and technological realities It follows an interdisciplinary approach combining economic and legal methods The book presents various concurring future models of reconstructed copyright law The historical evolution of copyright has led to a growing

disconnect between the legal definitions of economic rights and the business and technological realities they regulate eroding copyright's normative content and distorting the scope of its economic rights. What's in this book: This book is structured as follows: Following a historical chapter that illustrates how a structure of media-specific economic rights has developed in international copyright law, as copyright's catalogue of rights, a number of alternative models for reconstructing rights are presented in the form of chapters by Europe's most respected copyright scholars and economists focusing on potentially copyright-relevant acts that lie at the borders of exclusive rights: digital resale, private copying, hyperlinking and embedding, cable retransmission, and text and data mining. How this will help you: Offering the most incisive current thinking on copyright's economic rights in an increasingly networked world where acts of usage of works occur on a global or regional scale rather than on a purely national territorial basis, this book will be of immeasurable value not only to academics but also to practitioners and professionals in intellectual property law. This book guides copyright lawyers and scholars in the fields of international and EU copyright law in understanding the nexus between copyright law and technological and economic change. It also helps lawmakers and judges at the European national and international levels formulate legislative responses to the challenges of the digital environment.

The book includes chapters by leading scholars in economics, law, and political science. Unlike many other books on the subject, this one includes a substantial introduction and

is tightly organized around three themes concepts measurement and policy implementation of economic rights **The Oxford Handbook of Irish Politics** David M. Farrell,Niamh Hardiman,2021-09-01 Ireland has enjoyed continuous democratic government for almost a century an unusual experience among countries that gained their independence in the 20th century But the way this works in practice has changed dramatically over time Ireland s colonial past had an enduring influence over political life for much of the time since independence enabling stable institutions of democratic accountability while also shaping a dismal record of economic under development and persistent emigration More recently membership of the EU has brought about far reaching transformation across almost all aspects of Irish life But if anything the paradoxes have only intensified Now one of the most open economies in the world Ireland has experienced both rapid growth and one of the most severe crashes in the wake of the Great Recession On some measures Ireland is among the most affluent countries in the world yet this is not the lived experience for many of its citizens Ireland is an unequivocally modern state yet public life continues to be marked by formative ideas and values in which tradition and modernity are held in often uneasy embrace It is a small state that has ambitions to leverage its distinctive place in the Atlantic and European worlds to carry more weight on the world stage Ireland continues to be deeply connected to Britain through ties of culture and trade now matters of deep concern in the context of Brexit And the old fault lines between North and South between Ireland and Britain which had been at the core of one of Europe s longest and bloodiest civil conflicts risk being reopened by Britain s new hard edged approach to national and European identities These key issues are teased out in the 41 chapters of this book making this the most comprehensive volume on Irish politics to date *International Human Rights* Philip Alston,Ryan Goodman,2013 The successor to *International human rights in context law politics and morals* *International Human Rights, Social Policy and Global Development* Gerard McCann,Féilim Ó hAdhmaill,2020-04-29 With international human rights under challenge this book represents a comprehensive critique that adds a social policy perspective to recent political and legalistic analysis Expert contributors draw on local and global examples to review constructs of universal rights and their impact on social policy and human welfare With thorough analysis of their strengths weaknesses and enforcement it sets out their role in domestic and geopolitical affairs Including a forward by Albie Sachs this book presents an honest appraisal of both the concepts of international human rights and their realities It will engage those with an interest in social policy ethics politics international relations civil society organisations and human rights based approaches to campaigning and policy development

Cerna, 2016-12-05 Over the past sixty years the regional human rights systems have surpassed the UN human rights bodies in affording protection to the victims of human rights violations Most of these systems have courts that are empowered to issue legally binding judgments and reparations for violations of human rights which states have been unwilling to accord the UN system The essays selected for this volume examine the structure and functioning of the principal regional human rights systems in the world today 1 the Inter American Commission and Court of Human Rights 2 the European Court of Human Rights 3 the African Commission and Court of Human and Peoples Rights and 4 the ASEAN Intergovernmental Human Rights Commission These systems guarantee primarily civil and political rights Central to all four systems is the necessity of a democratic form of government to guarantee these rights although not all governments parties to these regional treaties are democracies These articles trace the history of these systems in particular the expansion of their membership to include almost all independent countries in the region and their evolution towards recognition of a right to democracy *Equality and Non-discrimination in South Africa* Shadrack Gutto, 2001 This study explores and critiques law and law making in the nascent constitutional democracy in the new South Africa with a focus on the complex roles of the executive parliament political parties the media and civil society The capacity and potential in the judiciary and the legal profession in promoting and protecting values and rights of equality and non discrimination is examined Substantive equality and non discrimination law in theory and in practice is considered critically from a broad historical and social context that highlights areas of race gender disability harassment and hate speech socio economic rights and legal services International human rights law and comparative law aspects are skillfully interwoven in this pioneering scholarly work **Human Rights as War by Other Means** Jennifer Curtis, 2014-07-28 Combining firsthand ethnographic reportage with historical research Human Rights as War by Other Means traces the use of rights discourse in Northern Ireland s politics from the local civil rights campaigns of the 1960s to
