Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe Stanisław Gomułka,2023 One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth from about zero to about 10% The papers published in this monograph show that this rate is strongly dependent on the rate of investment the quality of the labour force and the quality of institutions The rate of investment is in turn dependent on the rate of domestic savings In Poland domestic savings are shown to have been and continue to be very low by international standards The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies mainly thanks to the development of modern market institutions and a new private sector and partly thanks to foreign direct investments and a significant inflow of finance from the European Union EU The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine Author s Introduction Our discussion is limited to the Technology Frontier Area TFA of the world The central question is how the area s innovation rate changes over time in the course of centuries The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat shaped This Hat Shape Relationship is an empirical law that is given a theoretical interpretation It is in part a prediction based on the author s model of innovation and growth Its acceleration and steady growth segments correspond well to the past reality Its slowdown part is the central thesis of the book [Transition, Cohesion and Regional Policy in Central and Eastern Europe](#) Ruth Downes,2019-07-17 This title was first published in 2000 One of the most comprehensive overviews of regional development and policy emergence in the Central and East European countries to date this book focuses on economic and social cohesion bringing together a wide range of empirical research and discussion material **Lessons from the Economic Transition** Salvatore Zecchini,2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be In this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 No other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems It is this

transformation that has come to define the transition Early in the transformation process in November 1990 with the support of the Centre for Co operation with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries About six years have gone by and a new economic landscape has emerged in that part of the world The difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future *The Political Economy of Fiscal Reform in Central-Eastern Europe* Frank Bönker, 2006-01-01 Frank Bönker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review **Legacies of Change** John Lorne Campbell, Ove Kaj Pedersen, The essays in this volume examine institutional change in five of the most important areas of economic life in central and eastern Europe after 1989 international and regional economic reintegration the restructuring of the industrial base how economic interests are to be represented fiscal and budgetary reform and reform of the social welfare system The editors use these research findings to buttress a somewhat heterodox theory of institutional dynamics one pointing to discursive structures and governance structures as key dimensions that in combination affect institutional change in this part of the world so that an economic revolution becomes an evolutionary processes of gradual transition Out of the Red Mitchell Alexander Orenstein, 2001 A comprehensive parallel study of two critical East Central European transition economies **Economic Dynamics in Transitional Economies** Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe This book examines the economic dynamics of Central and Eastern European post Communist countries It illuminates the paths these countries are taking toward restructuring their markets increasing international trade and bettering their connections with the European Union and other countries Beginning with a comparative analysis of the three P governments Pigouvian Partisan and Paternalistic and continuing with a discussion of the interrelated political and economic difficulties of transition author Bruno Sergi proposes a surprising solution Inspired by the Bruxelles consensus he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post Communist economies Economic Dynamics in Transitional Economies also explores regional comparative macroeconomics the aftereffects of the Washington Consensus integration of Eastern and Western European economies interrelations between national and regional monetary activity political and economic policy reform involvement of European Union member countries We are living in historic times and Economic Dynamics in Transitional Economies will be a welcome guide to the rough roads ahead This thorough assessment of current political and economic realities will stimulate debate about new

European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region s success in the new century *Transition and Beyond* S. Leonard,2010-12-06 This book examines the history of reforms and major state interventions affecting Russian agriculture the abolition of serfdom in 1861 the Stolypin reforms the NEP the Collectivization Khrushchev reforms and finally farm enterprise privatization in the early 1990s It shows a pattern emerging from a political imperative in imperial Soviet and post Soviet regimes and it describes how these reforms were justified in the name of the national interest during severe crises rapid inflation military defeat mass strikes rural unrest and or political turmoil It looks at the consequences of adversity in the economic environment for rural behavior after reform and at long run trends It has chapters on property rights rural organization and technological change It provides a new database for measuring agricultural productivity from 1861 to 1913 and updates these estimates to the present This book is a study of the policies aimed at reorganizing rural production and their effectiveness in transforming institutions **Institutions, Human Development and Economic Growth in Transition Economies** P. Tridico,2011-07-19 This book analyses the development path of transition economies in European Countries and former Soviet Republics that have experienced the transformation from planned economies to market economies since the fall of the Berlin wall in 1989 It examines economic growth institutional change and human development performance *Fighting Europe's Unemployment in the 1990s* Herbert Giersch,2012-12-06 Following the five books listed above on an earlier page the Egon Sohmen Foundation herewith submits its sixth volume Once again it is a collection of academic papers that were discussed at a symposium sponsored by the Foundation and subsequently revised Readers not familiar with the Foundation may be interested to know that it was established in 1987 by Helmut Sohmen of Hong Kong in memory of his late brother Egon Sohmen 1930 1977 Egon Soh men was an international economist highly respected in North America and in Europe notably for his work on flexible exchange rates and on the economics of allocation and competition Born in Linz Austria and educated as an economist in Vienna Tiibingen and Cambridge Mass Egon Sohmen held teaching posts in several places M I T Yale Frankfurt Saarbrücken Minnesota and Heidelberg As an active participant in numerous international conferences and workshops he truly belonged

to the international research community of his time and age cohort His lasting reputation greatly helped me to convene the active participants of this symposium

Political Economy of Agrarian Reform in Central and Eastern Europe Johan F.M Swinnen, 2018-08-10 First published in 1997 this volume responds to the challenges faced in post Communist Eastern Europe in the privatization and decollectivisation of agriculture The contributors feature specialists in agriculture finance economics and political science They begin with discussions on the political economy of privatization and a historical overview and continue with thoughts on agricultural decollectivization in twelve countries across Eastern Europe including Albania the Baltic countries Bulgaria Slovakia and Hungary The project reflects the basic framework of endogenous institutional change and policy analysis and uses a political economy framework to explain and interpret these agricultural trends

Germany since Unification K. Larres, 2001-02-13 A decade after the fall of the Berlin Wall the collapse of the GDR and the end of the Cold War Germany has begun to cope with the political economic social and nationalistic challenges unification has posed to its institutions and way of life in both the western and eastern part of the once divided nation The books eleven authors all experts in their field analyse the way united Germany has tackled the many unforeseen problems and highlighted the gradually emerging short and long term patterns in Germany s slow adjustment to the new realities The country has not only become more populous and territorially bigger but also burdened with much underestimated problems particularly economic and social ones The emergence of a new economic political and perhaps military superstate as feared by many in 1990 has not materialised Instead Germany today is only just coping with the domestic and external challenges of unification The economic and social integration of the former East Germany into the Federal Republic has still not been completed and

may take yet another ten to fifteen years The book is a timely and well researched effort by a team of outstanding experts to evaluate Germany s performance to date It gives the reader ample and well analysed information to comprehend the many challenges facing Germany and its European neighbours in the post Cold War world
