Hartley,1976      **Economic Development and Planning** Spencer Rogers & Sammy Gentry,2018-04-07 Economic development transforms a traditional dual system society into a productive framework in which everyone contributes and from which receives benefits accordingly Economic development occurs when all segments of the society benefit from the fruits of economic growth through economic efficiency and equity Economic efficiency will be present with minimum negative externalities to society including agency transaction secondary and opportunity costs An economic development plan is a carefully built framework that s long term in scope It s used to help communities across diverse situations When planning for economic development the goal is to create and maintain a strong vibrant local economy Local government economic development planning is part of a region s overall economic development strategy and involves intergovernmental coordination The economic development plan provides a comprehensive overview of the economy sets policy direction for economic growth and identifies strategies programs and projects to improve the economy Economic planning the process by which key economic decisions are made or influenced by central governments It contrasts with the laissez faire approach that in its purest form eschews any attempt to guide the economy relying instead on market forces to determine the speed direction and nature of economic evolution Finally the author reminiscences on the excitement that was aroused during the initial period of development planning as well as decline in the expectations from the planning process and its importance This book imparts the basic information about the economic development and planning of the world      Economic Development Through Innovation Pennsylvania.
