Richardson, William Henry Chaloner, 1996 Across the Borders Günter Dinohobl, 2017-03-02 Until now we have only had relatively narrow economic studies comparing investments in railways with investments in other fields of individual economies *Across the Borders* not only opens the door for fundamental new insights into a trans national view of railway history but also contributes to a breakthrough in the wider study of the subject providing the first extensive historical investigation of the worldwide system of railway financing This book provides a wide introduction to how financiers governments and entrepreneurs in Europe managed to face the challenges of constructing and maintaining an integrated railway network both in their own countries and their colonies This volume offers analysis from a selection of experts exploring the trans national investment policies of railway construction based on numerous historical case studies The chapters provide insight into the international opportunities that existed for railway financing from the perspective of economic social transport and railway history With contributions from authors from 19 countries the volume is a truly international work that will be of interest to academic researchers museum staff archivists and anyone who has an interest in the history and development of railways **The Rise and Fall of Modern Empires, Volume III** Sarah Stockwell, 2017-03-02 Few aspects of the history of modern empires are of such significance as their economics and politics These factors are inextricably linked in many analyses have generated extensive historiographical debate and are currently the subject of some of the freshest and liveliest scholarship The articles and chapters which are brought together in this volume relate not only to the European colonial empires but also to the Napoleonic Russian and Japanese empires The collection is strongly comparative in approach with the articles arranged into thematic sections on the place of politics and economics in the rise and fall of modern empires the causal relationship between modern empires and colonial global and metropolitan economic transformations and the technologies of rule which provided the frameworks through which colonial economies were managed and rights defined The collection reflects new approaches as well as the continuing importance of issues addressed in an older historiography and the thematic arrangement produces useful juxtapositions of older and newer literatures The substantial introduction explores the themes and identifies key historiographical trends in relation to each The Tentacles of Progress Daniel R. Headrick, 1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African
