Economics By Hodgetts:

Economics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-06-30 Organizations governments and corporations are all concerned with distributing their goods and services to those who need them most consequently benefiting in the process Only by carefully considering the interrelated nature of social systems can organizations achieve the success they strive for Economics Concepts Methodologies Tools and Applications explores the interactions between market agents and their impact on global prosperity Incorporating both theoretical background and advanced concepts in the discipline this multi volume reference is intended for policymakers economists business leaders governmental and non governmental organizations and students of economic theory **Dog Economics** David L. Weimer, Aidan R. Vining, 2024-02-01 Archaeologists anthropologists and evolutionary biologists study the origins of our relationship with dogs and how it has evolved over time Sociologists and legal scholars study the roles of dogs in the modern family Veterinarian researchers address the relationship in the context of professional practice yet economists have produced scant scholarship on the relationship between humans and dogs Dog Economics applies economic concepts to relationships between people and dogs to inform our understanding of their domestication It interprets their contemporary role as both property and family members and explores factors that affect the demand for dogs as well as market failures of the American puppy market Offering economic perspectives on our varied relationships with dogs this book assesses mortality risks and addresses end of life issues that commonly arise It develops a framework for classifying canine occupations considers the impact of pet insurance on euthanasia and assesses the social value of guide dogs **The Archaeology of Human-Environmental Dynamics on the North American Atlantic Coast** Leslie Reeder-Myers, John A. Turck, Torben C. Rick, 2019-11-04 Using archaeology as a tool for understanding long term ecological and climatic change this volume synthesizes current knowledge about the ways Native Americans interacted with their environments along the Atlantic Coast of North America over the past 10 000 years Leading scholars discuss how the region s indigenous peoples grappled with significant changes to shorelines and estuaries from sea level rise to shifting plant and animal distributions to European settlement and urbanization Together they provide a valuable perspective spanning millennia on the diverse marine and nearshore ecosystems of the entire Eastern Seaboard the icy waters of Newfoundland and the Gulf of Maine the Middle Atlantic regions of the New York Bight and the Chesapeake Bay and the warm shallows of the St Johns River and the Florida Keys This broad comparative outlook brings together populations and areas previously studied in isolation Today the Atlantic Coast is home to tens of millions of people who inhabit ecosystems that are in dramatic decline The research in this volume not only illuminates the past but also provides important tools for managing coastal environments into an uncertain future A volume in the series Society and Ecology in Island and Coastal Archaeology edited by Victor D Thompson

Educational Innovation in Economics and Business IV Jeanette Hommes, 1999-07-31 The fourth volume in the series

Educational Innovation in Economics and Business brings together sixteen articles to reflect the way in which educational thinking in higher education has undergone a rapid change. The book is divided into four sections. The first section, Learning Objectives and Programme Structures, addresses the theme of the book. It examines how to ensure that the objectives and structures employed are appropriate in the modern environment. The second section, The Structure of the Learning Environment, is a continuation of the first section but focuses on how the learning environment is designed to facilitate the student's learning. The third section, Information Technology in the Learning Environment, contains two articles examining the use of Information Technology as a learning tool. The final section, Evaluating Student Skills, deals with the important issue of developing the student's skills and how they can be evaluated. This volume addresses issues faced by teachers in higher and further education but also those involved in programmes of study for continuing professional development.

The Routledge Handbook of State-Owned Enterprises Luc Bernier, Massimo Florio, Philippe Bance, 2020-05-27. State-owned enterprises make up roughly 10 percent of the world economy yet they are woefully understudied. This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation. The authors provide a detailed explanation of the theory that underpins the expansion of state-owned enterprises in the 21st century. Each chapter delivers an overview of current knowledge as well as identifying issues and relevant debates for future research. The authors explain how state-owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states. New modes of governance and regulation have been invented to make sure they act in the public interest. This handbook brings together a wealth of international scholars offering multiple theoretical perspectives to help shape a brave new world. It will be of interest to teachers and students of Economics, Public Administration and Business academics, established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs as well as practitioners and decision makers in international organizations.

The Social Psychology of Everyday Politics Caroline Howarth, Eleni Andreouli, 2016-11-03. The Social Psychology of Everyday Politics examines the ways in which politics permeates everyday life from the ordinary interactions we have with others to the sense of belonging and identity developed within social groups and communities. Discrimination, prejudice, inclusion and social change politics is an on-going process that is not solely the domain of the elected and the powerful. Using a social and political psychological lens to examine how politics is enacted in contemporary societies, the book takes an explicitly critical approach that places political activity within collective processes rather than individual behaviors. While the studies covered in the book do not ignore the importance of the individual, they underscore the need to examine the role of culture, history, ideology and social context as integral to psychological processes. Individuals act but they do not act in isolation from the groups and societies in which they belong. Drawing on extensive international research with contributions from leaders in the field as well as emerging scholars, the book is divided into three interrelated

parts which cover The politics of intercultural relations Political agency and social change Political discourse and practice Offering insights into how psychology can be applied to some of the most pressing social issues we face this will be fascinating reading for students of psychology political science sociology and cultural studies as well as anyone working in the area of public policy

Macroeconomic Performance in a Globalising Economy Robert Anderton, Geoff Kenny, 2010-11-25 The process of globalisation has been ongoing for centuries but few would doubt that it has accelerated and intensified in recent decades

This acceleration is evidenced as much by the strong synchronicity in the rapid transmission of financial crises starting in late 2007 as it is by the decade of almost unprecedented growth in international trade and financial market liberalisation that preceded it. This book shows how the international economy has become more connected via increased production trade capital flows and financial linkages. Using a variety of methodologies including both panel econometrics and DSGE modelling a team of experts from academia central banks and the IMF examine how this increased globalisation has affected competitiveness productivity inflation and the labour market. This timely contribution to the globalisation literature provides a longer term perspective while also evaluating some of the potential implications for policy makers particularly from a European perspective.

The New Geography of Innovation Xavier Tinguely, 2013-11-19 Innovation is the main engine of competitiveness. However in a world in which everything goes faster the inherent nature of the innovation process has changed. This book assesses both the theoretically and empirically intertwined relationship between innovation clusters and multinational enterprises in today's economy.

The Economics of International Integration Miroslav N. Jovanović, 2007-01-01 International economic integration has played a significant part in economic policy decisions for most countries and regions throughout the world over decades. This text looks at why the success of integration schemes has been so variable and what the prospects are for integration in the future.
