Proceedings of a conference held by the International Rostow, 1964 Economic Association. Edited by W. W. Rostow, 1963 The Economics of Take-off Into Sustained Growth Walt Whitman Rostow.1965 Development Economics in the Twenty-First Century Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and <u>Development Economics</u> John Knapp, 2018-02-06 Interest in the problems of the Economics of Developing Countries underdeveloped economies has increased since the early 1950s and is now a primary topic in university courses When this book was originally published it reflected a sense among some economists that current orthodox economic theory is inadequate in this field The volume includes leading American and non American economists The discussion of the content of courses was in the nature of things an extension of the discussion on the state of knowledge and reflects the period immediately prior to initial publication Some of the issues continue to be debated including the balance of instruction between macro and micro economics the place of mathematics and econometrics the question of the desirability of linking

the study of economics with studies in administration languages political science sociology or even engineering Development economics is now an established subject in the teaching curricula of most universities. The attention of the volume is focused on the problems of creating courses of study in subjects relevant to development within some framework specially designed for the purpose The problems of organizing such courses concerned the length of courses the type of students to which they would cater the qualifications and standards required for admission and successful completion of courses and so on The balance of instruction between macro and micro economics the place of mathematics and econometrics the question of the desirability of linking the study of economics with studies in administration languages in connection with area studies political science sociology or even engineering the merits of methods like case studies workshops and training in field work are all discussed Economic Progress and Policy in Developing Countries Angus Maddison, 2013-10-16 First published in 2005 The central issue of our times is the unequal income of nations Its importance outweighs most of the domestic problems in rich countries and the division of the world into rich and poor has become more significant than the ideological cleavage between communism and capitalism There are twenty five rich countries but more than 100 countries who are in the where income range Two thirds of the world's population live in the latter group This study focuses on those countries and looks at economic policy and progress **Dictionary of Contemporary Chinese Economics** Hong Yinxing, 2025-05-26 This Dictionary provides the theoretical summary and conceptual framework around the milestones obtained through Chinese reform and development and highlights the research achievements of Chinese economics over the past 40 years It also presents Chinese economics to the world featuring the Belt and Road Initiative and the Chinese theory and Chinese system to be known and shared internationally with a Chinese intellectual foundation It sets out to frame the theoretical achievements of extraction and summary of practice experience from Chinese reform and development The choice of entries in the Dictionary seeks to embody the very Chinese characteristics of economics and the combination of theory and practice is illuminated Furthermore the dictionary explores examples of scientific achievements that traditional economics has brought forward and how they fit and unify within both a Chinese as well as an international context **Teaching of Development Economics** Kurt Martin, John Knapp, 2020-03-13 First Published in 1967 This volume includes papers and proceedings presented on the Teaching of development economics Its Position in the Present State of Knowledge at the MANCHESTER CONFERENCE ON TEACHING ECONOMIC DEVELOPMENT APRIL 1964 Social Science and National Security Policy Janeen M. Klinger, 2019-02-07 This book examines how deterrence coercion and modernization theory has informed U S policy addressing why former Defense Secretary Robert McNamara's famous description of the Vietnam War as the social scientist's war is so accurate By tracing the evolution of ties between social scientists and the government beginning in World War I and continuing through the Second World War and the early Cold War the narrative highlights the role of institutions like the RAND Corporation the Social Science Research Council and MIT's Center for International Studies that

facilitate these ties while providing a home for the development of theory. The author compares and contrasts the ideas of Bernard Brodie Herman Kahn Albert Wohlstetter Thomas Schelling Gabriel Almond Lucian Pye and Walt Rostow among others and offers a cautionary tale concerning the difficulties and problems encountered when applying social science theory to national security policy Essays on the Industrial Revolution in Britain Sidney Pollard, 2024-10-28 This volume has three main themes First there is the concept of the Industrial Revolution and its main characteristics and the author defends both the term and the notions behind it against attempts to play down their significance A particular interest is the comparison of what happened to Britain with similar processes in other European countries The second theme is the set of problems facing the early entrepreneurs and managers Their difficulties as pioneers in the economic as well as the social sphere are often underrated and are here explored in detail Last there is an emphasis on the characteristic feature of industrialisation as a regional phenomenon and on the significance of particular regions in the entire process All three themes have called forth extended debate in which these essays have played an important part **Exploration** in **Development Issues** Nurul Islam, 2017-11-30 This title was first published in 2003 Nurul Islam currently head of economic and social policy at the FAO UN and a key advisor at the International Food Policy Research Institute has been a renowned expert on economic development for the past thirty years Over that time he has researched and written about a wide range of economic development issues focusing mainly on policy For the first time ever his most important writings have been brought together in this volume reflecting not only Professor Islam's own views on particular issues but also providing a unique overview of the key debates and discussions taking place among academic economist and policy analysts over the past three decades The collection is divided into three main sections trade and aid development strategy and food security the section on food security being the most recent It discusses food security in a broad sense covering issues of availability and growth in food production access or entitlement of individuals or households to basic food and variability in food supplies and prices In the section on Development Strategy Professor Islam highlights how theoretical argument has veered away from organized development planning models which proved so important in the 1960s He questions the role of models and policies throughout the decades and following articles written in the 1970s or 80s he includes articles he has recently completed assessing the previous ones from his current perspective In the final section on Trade and Aid he follows the academic debate on trade and exchange rate policies in developing countries from the 1960s to the progress of the WTO forums of today This is a wide ranging and thought provoking volume No matter whether the subject in question was examined in the 1960s or currently Professor Islam provides a challenging and insightful analysis and even the earliest articles retain relevance and will be of continuing interest The Economics of Take-off Into Sustained Growth Walt Whitman Rostow, 1963
