Transform Your Life Dr John Tibane, 2012-06-05 Everything begins with a thought. You cannot do anything, say anything, or be anything without having a thought about it first. The thought might not be obvious; it can be subtle; it can be years old; or it can be part of someone else's belief system. You also cannot change what you do, say, or become without changing your thoughts. This is why learning how to improve your thinking is the first and most important step in reshaping yourself and your life. In *Think It, Become It*, Dr John Tibane offers his expert advice and some powerful tools to help you shift your mental gears and have a more positive impact on the world around you. By working through the methods outlined in this book, you will slowly, thought by thought, action by action, begin to change both who you are and the kind of life experiences you encounter. This interactive book is filled with practical exercises, information that is easy to follow, and plenty of useful tips. You will learn: How to think rich and get rich; How to think performance and perform; How to think time and get the most of your time. The ten dimensions of thinking including: Billboard Thinking, Zero Based Thinking, Harvest Thinking, and Outcomes Based Thinking. *Think It, Become It* teaches that by claiming the power of your thinking, you too can master your own destiny.

The Civil War in the Age of Nationalism Duncan A. Campbell, Niels Eichhorn, 2024-04-10 While historians have acknowledged that the issues of race, slavery, and emancipation were not unique to the American Civil War, they have less frequently recognized the conflict's similarities to other global events. As renowned historian Carl Degler pointed out, the Civil War was one among many such conflicts during the mid-nineteenth century. Understanding the Civil War's place in world history requires placing it within a global context of other mid-nineteenth century political, social, and cultural issues and events. In *The Civil War in the Age of Nationalism*, Niels Eichhorn and Duncan A. Campbell explore the conflict from this perspective, taking a transnational and comparative approach with a particular focus on the period from the 1830s to the 1870s. Eichhorn and Campbell examine the development of nationalism and its frequent manifestation, secession, by comparing the American experience with that of several other nations, including Germany, Hungary, and Brazil. They compare

the Civil War to the Crimean and Franco German wars to determine whether the American conflict was the first modern war To gauge the potential of foreign intervention in the Civil War they look to the time s developing international debate on the legality of intercession and mediation in other nations insurgencies Using the experiences of Indigenous peoples in the Americas Africa and the Antipodes Eichhorn and Campbell suggest the extent to which the United States was an imperial project To examine realpolitik they study four vastly different practitioners Otto von Bismarck Louis Napoleon Count Cavour and Abraham Lincoln Finally they compare emancipation in the United States to that in Peru and the end of forced servitude in Russia closing with a comparison of the memorialization of the Civil War with the experiences of other post emancipation societies and an examination of how other nations mythologized their past conflicts and ignored uncomfortable truths in the pursuit of reconciliation The Civil War in the Age of Nationalism avoids the limitations of American exceptionalism making it the first genuine comparative and transnational study of the Civil War in an international context The Protectionist ,1913

After Patrick Henry Neal Q. Herrick, 2009 Neal Herrick demonstrates in a lucid manner that government corruption is the predominant problem facing society today Although bribery and influence peddling are the most visible aspect of this corruption they are not in Herrick's analysis the most serious For Herrick the more serious aspect of government corruption is the laws that bribery and influence peddling produce laws that favour the corporations resulting in what he calls a kind of delusional corruption that leads for example to unjust and unnecessary wars Tracing both forms of corruption back through American history Herrick gives a brief account of governmental descent into lawlessness identifies the constitutional flaw that led to this lawlessness and discusses some of the issues that must be considered in devising remedies Book jacket
