*View from a Foxhole* Leonard "len" Warmington, 2011-07-30      *Derricks' Bridgehead* Lt. Col. Major Clark, 2023-08-31  
Finalist 2023 Army Historical Foundation Distinguished Writing Awards The author saw firsthand the unit's hardships and setbacks but also its successes and victories His brings this direct knowledge to bear in this detailed and fascinating look at the experiences of African American military units during the war WWII History Magazine The 597th Field Artillery Battalion 92nd Division was the first last and only all black officered direct support field artillery battalion committed to combat in the history of the U S Army It was the first all black unit in a combat division and together with the 600th Field Artillery Battalion constituted the only all black units in any combat division Alongside impressive achievements on the battlefield in Italy in 1944-45 the unit provided more key command and staff positions exclusively for black field artillery officers than any other U S Army unit in combat giving combat training and experience to more senior black field artillery officers than any of the other 16 black field artillery battalions during World War II Colonel Wendell Derricks worked to shelter his troops from the worst of the racism exhibited during the war and due to his ability to envision an integrated postwar army he provided unique leadership opportunities for his senior officers The alumni of the 597th Field Artillery Battalion have an impressive record of success many of them were inducted into the Field Artillery Hall of Fame some served at the Pentagon including Lieutenant Colonel Clark and others forged successful careers in the civilian world      **They Laughed at Galileo** Albert Jack, 2015-09-22 A humorous account of great inventors and their critics who predicted failure They Laughed at Galileo takes a humorous and reflective look at one thousand years of the development of humankind those who dreamt those who taught those who opposed and those who ultimately did At some point in modern history each and every one of our inventions and discoveries was first envisioned and then developed by a single person or a handful of people who dreamt of the seemingly impossible For them the future was clear and obvious but for the vast majority including the acknowledged experts of their days such belief was sheer folly For just about everything that has improved our modern lifestyles in a way that our ancestors could not possibly imagine there was once a lone dreamer proclaiming It can be done That dreamer was nearly always opposed by a team of enlightened contemporaries publicly declaring It cannot be done Well yes it could Marconi's wireless radio transmissions were initially deemed pointless Edward L Drake's eventual success on August 27 1859 was called the day the crazy man first struck oil Louis Pasteur's theory of germs was considered a ridiculous fiction Each of these inventions has had a profound effect on the course of human history and each one was rejected resisted and ridiculed in its day Ultimately the innovators who brought these into existence provided invaluable contributions to science and the culture of humankind  
Selected Soviet Military Writings, 1970-1975 Andrei Antonovich Grechko, 1977      All Hands, 1976      **First and Last Shots Fired in World War II** Mack Abbott, 2001      **Guilty Knowledge, Guilty Pleasure** William Logan, 2014-04-08  
William Logan has been a thorn in the side of American poetry for more than three decades Though he has been called the

most hated man in American poetry his witty and articulate reviews have reminded us how muscular good reviewing can be These new essays and reviews take poetry at its word often finding in its hardest cases the greatest reasons for hope Logan begins with a witty polemic against the wish to have critics announce their aesthetics every time they begin a review The Unbearable Rightness of Criticism is a plea to read those critics who got it wrong when they reviewed Lyrical Ballads or Leaves of Grass or The Waste Land Sometimes he argues such critics saw exactly what these books were they saw the poems plain yet often did not see that they were poems In such wrongheaded criticism readers can recover the ground broken by such groundbreaking books Logan looks again at the poetry of Wallace Stevens Frank O Hara and Philip Larkin at the letters of T S Eliot Elizabeth Bishop and Robert Lowell and at new books by Louise Glück and Seamus Heaney Always eager to overturn settled judgments Logan argues that World War II poets were in the end better than the much lauded poets of World War I He revisits the secretly revised edition of Robert Frost's notebooks showing that the terrible errors ruining the first edition still exist The most remarkable essay is Elizabeth Bishop at Summer Camp which prints for the first time her early adolescent verse along with the intimate letters written to the first girl she loved

**The Complete Unraveling of the JFK Assassination** Brian T. Kelleher, 2014-12-19 The new evidence in this book is amazing and changes everything Applying the skills he has honed as a court consultant for the past two decades Author Brian Kelleher discovered that the government experts and their critics alike completely overlooked the most important evidence in the case the visual shot identifiers in the six motion pictures that were taken as the shots rang out With one startling revelation after another Kelleher presents irrefutable scientific photographic proof showing exactly when the shots were fired where they came from and which bullets hit whom He then shows how all the wound ballistics evidence and eyewitness testimony ties in Finally we now know what really happened and where to find the Lost Bullet

**The New Battle for the Atlantic** Magnus F Nordenman, 2019-06-15 In this book Magnus Nordenman explores the emerging competition between the United States and its NATO allies and the resurgent Russian navy in the North Atlantic This maritime region played a key role in the two world wars and the Cold War serving as the strategic link between the United States and Europe that enabled the flow of reinforcements and supplies to the European Allies Nordenman shows that while a conflict in Europe has never been won in the North Atlantic it surely could have been lost there With Vladimir Putin's Russia threatening the peace in Europe following the annexation of Crimea in 2014 the North Atlantic and other maritime domains around Europe are once again vitally important But this battle will in many ways be different Nordenman demonstrates due to an overstretched U S Navy the rise of disruptive technologies a beleaguered NATO that woke up to the Russian challenge unprepared for high end warfighting in the maritime domain and a Russia commanding a smaller but more sophisticated navy equipped with long range cruise missiles Nordenman also provides a set of recommendations for what the United States and NATO must do now in order to secure the North Atlantic in this new age of great power competition
