of recreational trout fishing in a local and global context Globally she shows how the European sport of fly fishing came to be a defining tourist attracting feature of the expanding 19th century American West Locally she traces the way that the burgeoning fly fishing tourist industry shaped the environmental economic and social development of the Western United States introducing and stocking favored fish species eradicating the less favored native trash fish changing the courses of waterways and leading to conflicts with Native Americans fishing and territorial rights Through this analysis Brown demonstrates that the majestic trout streams often considered a timeless feature of the American West are in fact the product of countless human interventions adding up to a profound manipulation of the Rocky Mountain environment <https://www.youtube.com/watch?v=ZKMwEkKj9jg>
