Ishi In 2 Worlds:

Ishi's Brain: In Search of Americas Last "Wild" Indian Orin Starn, 2005-06-17 From the mountains of California to a forgotten steel vat at the Smithsonian this eloquent and soul searching book is a compelling account of one of American anthropology's strangest saddest chapters Archaeology After the Yahi were massacred in the mid nineteenth century Ishi survived alone for decades in the mountains of northern California wearing skins and hunting with bow and arrow His capture in 1911 made him a national sensation anthropologist Alfred Kroeber declared him the world's most uncivilized man and made Ishi a living exhibit in his museum Thousands came to see the displaced Indian before his death of tuberculosis Ishi's Brain follows Orin Starn's gripping quest for the remains of the last of the Yahi *Indigenous Rhetoric and Survival in the Nineteenth Century* Elizabeth Schleber Lowry, 2018-09-07 In 1916 Lucy Thompson an indigenous woman from Northwestern California published *To the American Indian Reminiscences of a Yurok Woman* The first book to be published by a member of the California Yurok tribe it offers an autobiographical view of the intricacies of life in the tribe at the dawn of the twentieth century as well as a powerful critique of the colonial agenda Elizabeth Schleber Lowry presents a rhetorical analysis of this iconic text investigating how Thompson aimed to appeal to diverse audiences and constructed arguments that still resonate today Placing Thompson's work in the context of nineteenth century Native American rhetoric Lowry argues that Thompson is a skillful rhetor who has much to teach us about our nation's violent past and how it continues to shape our culture and politics In *To the American Indian* Thompson challenges negative stereotypes about indigenous cultures and contrasts widespread Euroamerican abuse of natural resources with Yurok practices that once effectively maintained the region's ecological and social stability As such Thompson's text functions not only as a memoir but also as a guide to sustainable living

A Skeptic Among Scholars August Frugé,1993-09-15 When August Frug joined the University of California Press in 1944 it was part of the University s printing department publishing a modest number of books a year mainly monographs by UC faculty members When he retired as director 32 years later the Press had been transformed into one of the largest most distinguished university presses in the country publishing more than 150 books annually in fields ranging from ancient history to contemporary film criticism by notable authors from all over the world August Frug s memoir provides an exciting intellectual and topical story of the building of this great press Along the way it recalls battles for independence from the University administration the Press s distinctive early style of book design and many of the authors and staff who helped shape the Press in its formative years

Experimental Natalia Cecire,2019-12-30 A compelling revision of the history of experimental writing from Pound and Stein to Language poetry disclosing its uses and its limits In this bold new study of

twentieth century American writing and poetics Natalia Cecire argues that experimental writing should be understood as a historical phenomenon before it is understood as a set of formal phenomena This seems counterintuitive because at its most basic level experimental writing can be thought of as writing which breaks from established forms Touching on figures who are not typically considered experimental such as Stephen Crane Jacob Riis Busby Berkeley Ursula K Le Guin and Gottlob Frege *Experimental* offers a fresh look at authors who are often treated as constituting a center or an origin point of an experimental literary tradition in the United States including Gertrude Stein Ezra Pound William Carlos Williams and Marianne Moore In responding to a crisis of legitimization in the production of knowledge this tradition borrows and transforms the language of the sciences Drawing upon terminology from the history of science Cecire invokes the epistemic virtue which tethers ethical values to the production of knowledge in order to organize diverse turn of the century knowledge practices feeding into experimental writing Using these epistemic virtues as a structuring concept for the book's argument Cecire demonstrates that experimental writing as we now understand it does not do experiments as in follow a method but rather performs epistemic virtues Experimental texts embody the epistemic virtues of flash objectivity precision and contact associated respectively with population sciences neuroanatomy natural history and toolmaking and anthropology Yet which virtues take precedence may vary widely as may the literary forms through which they manifest Bringing it up to the 1980s Cecire reveals the American experimental literary tradition as a concerted and largely successful rewriting of twentieth century literary history She shows how the Language poets a group of primarily white experimental writers restored to the canon what they saw as modernism's true legacy whose stakes were simultaneously political and epistemological it produced a poet who was an intellectual and a text that was experimental

Gods of the Upper Air Charles King, 2019-08-06 NEW YORK TIMES BESTSELLER 2020 Anisfield Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it a sweeping chronicle of discovery and the fascinating origin story of our multicultural world A century ago everyone knew that people were fated by their race sex and nationality to be more or less intelligent nurturing or warlike But Columbia University professor Franz Boas looked at the data and decided everyone was wrong Racial categories he insisted were biological fictions Cultures did not come in neat packages labeled primitive or advanced What counted as a family a good meal or even common sense was a product of history and circumstance not of nature In *Gods of the Upper Air* a masterful narrative history of radical ideas and passionate lives Charles King shows how these intuitions led to a fundamental reimagining of human diversity Boas's students were some of the century's most colorful figures and unsung visionaries Margaret Mead the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time Ruth Benedict the great love of Mead's life whose research shaped post Second World War Japan Ella Deloria the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains and Zora Neale

Hurston whose studies under Boas fed directly into her now classic novel *Their Eyes Were Watching God*. Together they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets and unearthed an essential fact buried by centuries of prejudice: that humanity is an undivided whole. Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today. Rich in drama, conflict, friendship, and love, *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind.

Survivance Gerald Vizenor, 2008-11 In this anthology, eighteen scholars discuss the themes and practices of survivance in literature, examining the legacy of Vizenor's original insights and exploring the manifestations of survivance in a variety of contexts. Contributors interpret and compare the original writings of William Apess, Eric Gansworth, Louis Owens, Carter Revard, Gerald Vizenor, and Velma Wallis, among others.

Indigenous Celebrity Jennifer Adese, Robert Alexander Innes, 2021-04-09 *Indigenous Celebrity* speaks to the possibilities, challenges, and consequences of popular forms of recognition, critically recasting the lens through which we understand Indigenous people's entanglements with celebrity. It presents a wide range of essays that explore the theoretical, material, social, cultural, and political impacts of celebrity on and for Indigenous people. It questions and critiques the whitestream concept of celebrity and the very juxtaposition of Indigenous and celebrity, and casts a critical lens on celebrity culture's impact on Indigenous people. Indigenous people who willingly engage with celebrity culture or are drawn up into it enter into a complex terrain of social relations informed by layered dimensions of colonialism, racism, sexism, homophobia, transphobia, and classism. Yet this reductive framing of celebrity does not account for the ways that Indigenous people's own worldviews inform Indigenous engagement with celebrity culture or rather popular social and cultural forms of recognition. *Indigenous Celebrity* reorients conversations on Indigenous celebrity towards understanding how Indigenous people draw from nation-specific processes of respect and recognition while at the same time navigating external assumptions and expectations. This collection examines the relationship of Indigenous people to the concept of celebrity in past, present, and ongoing contexts, identifying commonalities, tensions, and possibilities.

North American Projectile Points - Revised Wm. Jack Hranicky Rpa, 2010-06

Witnesses to a Vanishing America Lee Clark Mitchell, 2014-07-14 Propelled across the continent by notions of rugged individualism and manifest destiny, pioneer Americans soon discovered that such slogans only partly disguised the fact that building an empire meant destroying a wilderness. Through an astonishing range of media, they voiced their concern about America's westward mission. Drawing on a wide variety of evidence, Lee Clark Mitchell portrays the growing apprehensions. Originally published in 1981, *The Princeton Legacy Library* uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press.

since its founding in 1905 **Anthropological Controversies** Gavin Weston,Natalie Djohari,2020-05-11 This book uses controversies as a gateway through which to explore the origins ethics key moments and people in the history of anthropology It draws on a variety of cases including complicity in human zoos Malinowski s diaries and the Human Terrain System to explore how anthropological controversies act as a driving force for change how they offer a window into the history of and research practice in the discipline and how they might frame wider debates such as those around reflexivity cultural relativism and the politics of representation The volume provokes discussion about research ethics and practice with tangible examples where gray areas are brought into sharp relief The controversies examined in the book all involve moral or practical ambiguities that offer an opportunity for students to engage with the debate and the dilemmas faced by anthropologists both in relation to the specific incidents covered and to the problems posed more generally due to the intimate and political implications of ethnographic research Ethnic Expositions in Italy, 1880 to 1940 Guido Abbattista,2024-03-22 Comprehensively analyzing for the first time the phenomenon of ethnic living expositions in Italy between the 19th and 20th centuries this book deals with the subject from a comparative European perspective and over the long term studying analogies and differences in precedents as far back as the early modern age The research which seeks to go beyond the simplistic concept of human zoos intends to highlight the intentions assumptions and mechanisms of realization of the exhibitions of exotic living humans and the reactions from both the exhibited subjects and the public exploiting a wide variety of heterogeneous sources capable of bringing out a kind of widespread popular ethno anthropological ideas and the elements of racism contained in it The book contributes to the understanding of Western mindsets and attitudes towards human diversity as they emerge from mass spectacular events that have over time become an international business The present edition refers to the second Italian edition containing an update discussing studies on the subject that have appeared between 2013 and 2021 Ethnic Expositions in Italy intends to fill a historiographical gap and to align Italian historiographies with European ones which have long since come to terms with this legacy of the past and have explored its various historical manifestations in depth This book is an excellent source for researchers and students alike as well as those interested in the mechanisms that have helped shape European ideas and sensibilities on race and ethno anthropological diversity *Einstein's Brain* Sal Restivo,2019-11-19 This book reviews the research on Einstein s brain from a sociological perspective and in the context of the social brain paradigm Instead of Einstein the genius of geniuses standing on the shoulders of giants Restivo proposes a concept of Einstein the social being standing on the shoulders of social networks Rather than challenging Einstein s uniqueness or the uniqueness of his achievements the book grounds Einstein and his achievements in a social ecology opposed to the myths of the I individualism and the very idea of genius Einstein is defined by the particular configuration of social networks that he engaged as his life unfolded not by biological inheritances *Handbook of Arts-Based Research* Patricia Leavy,2025-01-31 Bringing together interdisciplinary leaders in methodology
