*Intimacy* Ziyad Marar, 2014-09-11 The hope for intimacy lies deep within us all That moment of feeling uniquely understood the antidote to isolation is what gives us value validation and self belief But as Ziyad Marar shows in this fascinating and engaging study intimacy is a tricky business The prevalence of social media for example is a sign of our desire for human connection yet is a symptom of how little we truly achieve it Often confused with love intimacy is in many ways more important Marar's investigation and celebration of this elusive but profound human experience shows how intimacy is central to a life well lived But how do we spot the real thing Marar helpfully identifies a key set of ingredients reciprocity conspiracy heightened emotion kindness that when brought together enable the strongest experiences of intimacy Without these four characteristics in the mix we are experiencing something less or something else Drawing on a wide range of sources from key thinkers as well as telling examples from familiar films and novels Marar illustrates the subtlety and intricacies of intimacy and shows how closely it is bound up with notions of trust control risk and our own insecurities Intimacy argues Marar is a necessary component of a fulfilled life Yet we should not take for granted that we know what it is and how to get it A better understanding of this powerful experience and the many barriers to achieving it may just help us to brave the search for it For anyone bold enough to do so which should be all of us Intimacy is required reading

**Bio-Linguistics** T. Givón, 2002-12-19 Is human language an evolutionary adaptation Is linguistics a natural science These questions have bedeviled philosophers philologists and linguists from Plato through Chomsky Prof Givón suggests that the answers fall naturally within an integrated study of living organisms In this new work Givón points out that language operates between aspects of both complex biological design and adaptive behavior As in biology the whole is an adaptive compromise to competing demands Variation is the indispensable tool of learning change and adaptation The contrast between innateness and input driven emergence is an interaction between genetically coded and behaviorally coded experience In enlarging the cross disciplinary domain the book examines the parallels between language evolution and language diachrony Sociality cooperation and communication are shown to be rooted in a common evolutionary source the kin based hunting and gathering society of intimates The book pays homage to the late Joseph Greenberg and his visionary integration of functional motivation typological diversity and diachronic change [Island Genres, Genre Islands](#) Ralph Crane, Lisa Fletcher, 2017-02-03 *Island Genres Genre Islands* moves the debate about literature and place onto new ground by exploring the island settings of bestsellers Through a focus on four key genres crime fiction thrillers popular romance fiction and fantasy fiction Crane and Fletcher show that genre is fundamental to both the textual representation of real and imagined islands and to actual knowledges and experiences of islands The book offers broad comparative readings of the significance of islandness in each of the four genres as well as detailed case studies of major authors and texts These include chapters on Agatha Christie's islands the role of the island in Bondspace the romantic islophilia of Nora Roberts's Three

The Grammar of Causation and Interpersonal Manipulation Masayoshi Shibatani, 2002-05-31 This volume presents fifteen original papers dealing with various aspects of causative constructions ranging from morphology to semantics with emphasis on language data from Central and South America Informed by a better understanding of how different constructions are positioned both synchronically e.g. on a semantic map and diachronically e.g. through grammaticalization processes the volume affords a comprehensive up to date perspective on the perennial issues in the grammar of causation such as the distribution of competing causative morphemes the meaning distinctions among them and the overall form meaning correlation Morphosyntactic interactions of causatives with other phenomena such as incorporation and applicativization receive focused attention as such basic issues as the semantic distinction between direct and indirect causation and the typology of causative constructions *Context as Other Minds* T. Givón, 2005-07-22 Givón's new book re-casts pragmatics and most conspicuously the pragmatics of sociality and communication in neuro cognitive bio adaptive evolutionary terms The fact that context the core notion of pragmatics is a framing operation undertaken on the fly through judgements of relevance has been well known since Aristotle Kant and Peirce But the context that is relevant to the pragmatics of sociality and communication is a highly specific mental operation the mental modeling of the interlocutor's current rapidly shifting belief and intention states The construed context of social interaction and communication is thus a mental representation of other minds Following a condensed intellectual history of pragmatics the book investigates the adaptive pragmatics of lexical semantic categories the 1st order framing of reality what cognitive psychologists call semantic memory Utilizing the network

model the book then takes a fresh look at the adaptive underpinnings of metaphoric meaning The core chapters of the book outline the re interpretation of communicative context as the systematic on line construction of mental models of the interlocutor s current rapidly shifting states of belief and intention This grand theme is elaborated through examples from the grammar of referential coherence verbal modalities and clause chaining In its final chapters the book pushes pragmatics beyond its traditional bounds surveying its interdisciplinary implications for philosophy of science theory of personality personality disorders and the calculus of social interaction *Intimacy across the Fencelines* Rebecca Forgash,2020-08-15

*Intimacy Across the Fencelines* examines intimacy in the form of sexual encounters dating marriage and family that involve US service members and local residents Rebecca Forgash analyzes the stories of individual US service members and their Okinawan spouses and family members against the backdrop of Okinawan history political and economic entanglements with Japan and the United States and a longstanding anti base movement The narratives highlight the simultaneously repressive and creative power of military fencelines sites of symbolic negotiation and struggle involving gender race and class that divide the social landscape in communities that host US bases *Intimacy Across the Fencelines* anchors the global US military complex and US Japan security alliance in intimate everyday experiences and emotions illuminating important aspects of the lived experiences of war and imperialism *Islands Magazine* ,1996-01 **Love and Society** Swen Seebach,2017-04-21

Why does love matter *Love and Society* discusses the meaning and importance of love for contemporary society Love is not only an emotion that occurs in our intimate relationships it is a special emotion that allows us to relate to each other in a lasting fashion to create out of our individual pasts a shared past which enables us to project a shared future Bringing together the idea of Simmel s second order forms with theories of love this insightful volume shows that the answer to why love is so central to society can be found in the social transformation of the last two centuries It also explains how we can build our strongest social bonds on the fragility of an emotions thanks to the creation of special moments love rituals and intimate stories love myths that are central to the weaving of lasting social bonds Going to the cinema reading a book together or sharing songs are forms of weaving bonds of love and part of the cycle of love But love is not only shared between two people the desire and the search for love is something we share with almost all members of society With rich empirical data an analysis of love s transformation in modernity and a critical engagement with classical and contemporary theorists this book provides a lively discussion on the meaning and importance of love for today s society It will be of interest to undergraduate and postgraduate students and postdoctoral researchers who are interested in fields such as Sociology of Emotions Sociological Theory and Sociology of Morality *Educating for Sustainability in a Small Island Nation* Jane Spiteri,2023-01-19 This volume problematizes the intentions of early childhood education for sustainability ECEfS from two new perspectives the context of small island states and the bi directional intergenerational learning about the environment and sustainability that takes place in a variety of contexts including the family home and school It questions how belonging to

a small island and the children's home influence learning in the early years of life. In doing so, this book offers new insights and new theoretical perspectives into intergenerational environmental learning in the school, family, and beyond. Informed by consideration of the most recent literature in early childhood education and sustainability, this volume also looks at how these informal learning spaces provide young children with the opportunities to enhance further learning in the field, thus portraying the fluidity of intergenerational learning from different theoretical standpoints. It provides a deep insight into ECEfS and intergenerational learning about the environment and environmental issues in early childhood education from a perspective of a small island state by adopting a children's rights perspective. It additionally explores the relationship between early childhood theories, children's rights, and postcolonial theory.

**Islands of the Mind** Richard Pine, 2020-02-05  
 730 million people, almost 10% of the world's population, inhabit islands. One quarter of the states represented at the United Nations are islands. Islands constitute almost twenty percent of the total land area of Greece and exhibit more significant aspects of biodiversity than other global contexts. They are both occasions of triumph and occurrences of catastrophe. Islands are both open and enclosed communities, points of arrival and departure. Islands exert a fascination for the visitor and generate in the islander both positive and negative mindsets. The romantic fallacies about self-sufficiency and insularity of islands are constantly challenged. This collection of essays by scholars from some of the world's most compelling islands—Jersey, Ireland, Tasmania, Corfu, Ereikousa, Prince Edward Island, Malta—explores the psychology of islands, islanders, and their visitors; the literatures they stimulate; and the scientific, ethical, and biogeographical issues they present in an increasingly globalised world. Corfu, the home of Lawrence and Gerald Durrell in the 1930s and host to literary and scientific enquiry, is the place where this collection was conceived and occupies a central place in its discussions.

**Love Skills** Linda Carroll, 2020-02-14  
 An incisive couple's workshop in a book for navigating the challenges of relationships and unlocking lasting love. Linda Carroll's first book, *Love Cycles*, describes the five stages of intimate relationships in detail, illuminating the behaviors associated with each stage and strategies for successfully navigating them. This companion workbook, *Love Skills*, is a practical guide to creating and maintaining a loving relationship. Exercises, activities, self-assessments, and other concrete tools allow readers to understand where they are in their relationship. Carroll addresses such thorny issues as the loss of sexual energy, why what once seemed endearing is now annoying, and the many ways that family history and personality type can wreak havoc in relationships. Her well-researched practices help keep love alive in the midst of seemingly intractable differences, and specific, effective solutions to couples' most common struggles provide a clear map for moving forward. Most important, Carroll's couple-tested techniques allow readers to deal with conflict without losing connection and show that conflict, when navigated properly, can lead to renewed closeness and unprecedented connection.

**Gender on the Edge** Niko Besnier, Kalissa Alexeyeff, 2014-12-31  
 Transgender identities and other forms of gender and sexuality that transcend the normative pose important questions about society, culture, politics, and history. They force us to question, for example, the

forces that divide humanity into two gender categories and render them necessary inevitable and natural The transgender also exposes a host of dynamics that at first glance have little to do with gender or sex such as processes of power and domination the complex relationship among agency subjectivity and structure and the mutual constitution of the global and the local Particularly intriguing is the fact that gender and sexual diversity appear to be more prevalent in some regions of the world than in others This edited volume is an exploration of the ways in which non normative gendering and sexuality in one such region the Pacific Islands are implicated in a wide range of socio cultural dynamics that are at once local and global historical and contemporary The authors recognize that different social configurations cultural contexts and historical trajectories generate diverse ways of being transgender across the societies of the region but they also acknowledge that these differences are overlaid with commonalities and predictabilities Rather than focus on the definition of identities they engage with the fact that identities do things that they are performed in everyday life that they are transformed through events and movements and that they are constantly negotiated By addressing the complexities of these questions over time and space this work provides a model for future endeavors that seek to embed dynamics of gender and sexuality in a broad field of theoretical import Rethinking Island Methodologies Elaine Stratford, Godfrey Baldacchino, Elizabeth

**The Routledge International Handbook of Island Studies** Godfrey Baldacchino, 2018-06-13 From tourist paradises to immigrant detention camps from offshore finance centres to strategic military bases islands offer distinct identities and spaces in an increasingly homogenous and placeless world The study of islands is important for its own sake and on its own terms But so is the notion that the island is a laboratory a place for developing and testing ideas and from which lessons can be learned and applied elsewhere The Routledge International Handbook of Island Studies is a global research based and pluri disciplinary overview of the study of islands Its chapters deal with the contribution of islands to literature social science and natural science as well as other applied areas of inquiry The collated expertise of interdisciplinary and international scholars offers unique insights individual chapters dwell on geomorphology zoology and evolutionary biology the history sociology economics and politics of island communities tourism wellbeing and migration as well as island branding resilience and commoning The text also offers pioneering forays into the study of islands that are cities along rivers or artificial constructions This insightful Handbook will appeal to geographers environmentalists sociologists political scientists and one hopes some of the 600 million or so people who live on islands or are interested in the rich dynamics of islands and island life

**Islands Magazine** ,1995-09 *Revival: The Mystic Rose (1960)* Ernest Crawley, 2018-05-08 All study of the origins of social institutions must be based on what ethnology can tell us of the psychology of the lower races and on the primitive conceptions of human relations which are thus established It is only in early modes of thought that we can find the explanation of ceremonies and systems which originated in primitive society and if ceremony and system are the concrete forms in which human relations are expressed an examination ethnological and psychological of human relations is indispensable for enquiry into human institutions The New Shape of Old Island Cultures Francis X. Hezel, 2001-05-01 The years since World War II have brought unprecedented social change to Micronesia Now drawing on more than four decades of experience living and working in the region Francis X Hezel assesses the most striking changes to have swept over the islands in the past fifty years His careful and comprehensive reading of Micronesian anthropology and history allows him to present insights into patterns of change touching the lives of not only Micronesians but people in other parts of the Pacific as well The broad range of topics covered include family structure land gender roles cultural treatment of life events birth marriage death sexuality political authority and demography and migration Hezel argues that the primary engine of social

change in Micronesia has been the dramatic shift from subsistence fishing and gardening to salaried employment in a cash economy. He makes the case that this fundamental change has fragmented the extended family, changed the way land is viewed, revolutionized gender roles, and paved the way for an ethics of individualism.
