The Aesthetics of Island Space Johannes Riquet, 2019-12-18 *Oxford Textual Perspectives* is a series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works *The Aesthetics of Island Space* discusses islands as central figures in the modern experience of space It examines the spatial poetics of islands in literary texts from Shakespeare's *The Tempest* to Ghosh's *The Hungry Tide* in the journals of explorers and scientists such as James Cook and Charles Darwin and in Hollywood cinema It traces the ways in which literary and cinematic islands have functioned as malleable spatial figures that offer vivid perceptual experiences as well as a geopoetic oscillation between the material energies of words and images and the energies of the physical world The chapters focus on America's island gateways Roanoke and Ellis Island visions of tropical islands Tahiti and imagined South Sea islands the islands of the US Canadian border region in the Pacific Northwest and the imaginative appeal of mutable islands It argues that modern voyages of discovery posed considerable perceptual and cognitive challenges to the experience of space and that these challenges were negotiated in complex and contradictory ways via poetic engagement with islands Discussions of island narratives in postcolonial theory have broadened understanding of how islands have been imagined as geometrical abstractions bounded spaces easily subjected to the colonial gaze There is

however a second story of islands in the Western imagination which runs parallel to this colonial story In this alternative account the modern experience of islands in the age of discovery went hand in hand with a disintegration of received models of understanding global space Drawing on and rethinking post phenomenological geocritical and geopoetic theories The Aesthetics of Island Space argues that the modern experience of islands as mobile and shifting territories implied a dispersal fragmentation and diversification of spatial experience and it explores how this disruption is registered and negotiated by both non fictional and fictional responses Islands of Space John W. Campbell,2020-02-16 As Earth's faster than light spaceship hung in the void between galaxies Arcot Wade Morey and Fuller could see below them like a vast shining horizon the mass of stars that formed their own island universe Morey worked a moment with his slide rule then said We made good time Twenty nine light years in ten seconds Yet you had it on at only half power Arcot pushed the control lever all the way to full power The ship filled with the strain of flowing energy and sparks snapped in the air of the control room as they raced at an inconceivable speed through the darkness of intergalactic space But suddenly far off to their left and far to their right they saw two shining ships paralleling their course They held grimly to the course of the Earth ship bracketing it like an official guard The Earth scientists stared at them in wonder Lord muttered Morey where can they have come from **Islands of Space** W. John Campbell,2007-07-01 **Islands of Space** Jr. John W. Campbell,2016-01-22 PROLOGUE In the early part of the Twenty Second Century Dr Richard Arcot hailed as the greatest living physicist and Robert Morey his brilliant mathematical assistant discovered the so called molecular motion drive which utilized the random energy of heat to produce useful motion John Fuller designing engineer helped the two men to build a ship which used the drive in order to have a weapon to seek out and capture the mysterious Air Pirate whose robberies were ruining Transcontinental Airways The Pirate Wade was a brilliant but neurotic chemist who had discovered among other things the secret of invisibility Cured of his instability by modern psychomedical techniques he was hired by Arcot to help build an interplanetary vessel to go to Venus The Venusians proved to be a humanoid race of people who used telepathy for communication Although they were similar to Earthmen their blue blood and double thumbs made them enough different to have caused distrust and racial friction had not both planets been drawn together in a common bond of defense by the passing of the Black Star The Black Star Nigra was a dead burned out sun surrounded by a planetary system very much like our own But these people had been forced to use their science to produce enough heat and light to stay alive in the cold black depths of interstellar space There was nothing evil or menacing in their attack on the Solar System they simply wanted a star that gave off light and heat So they attacked not realizing that they were attacking beings equal in intelligence to themselves They were at another disadvantage too The Nigrans had spent long millennia fighting their environment and had had no time to fight among themselves so they knew nothing of how to wage a war The Earthmen and Venusians knew only too well since they had a long history of war on each planet *Islands of Space* John W. Campbell,2020-02-08T02:09:11Z Though better known as the editor for authors such as

Isaac Asimov and Robert Heinlein John W Campbell also wrote science fiction under both his own and various pen names Islands of Space was the second in his Arcot Morey and Wade trilogy Originally published in the spring 1931 edition of Amazing Stories Quarterly it was later published in book form in 1957 After the events of The Black Star Passes Arcot Morey Wade and Fuller look for new challenges Creating a spaceship that can exceed the speed of light the four of them set out to explore other galaxies This book is part of the Standard Ebooks project which produces free public domain ebooks
