

Baker explores the possibility of linking proposed universal features of African pidgins with features in MC and HC. Some of these features, he suggests, are not readily explained "either in terms of the lexical source languages of the pidgins concerned, or in terms of the mother tongues of those who participated in the development of these pidgins" (252). But one feature he mentions in this connection is the position of the object pronoun following the verb in all known Bantu-based pidgins, in contrast to most Bantu languages, in which "the object pronoun precedes the verb" (Heine 1975:9). The suggestion that this positional switch is motivated by some cognitive universal rather than by the structure of the native languages of the pidgin originators strikes me as insufficiently supported here. The preverbal object pronominal in Bantu is a prefix, not a separate word. The dominant order of words in most Bantu languages is SVO, so it is not surprising that a full-word object pronoun takes the position of a full-noun object, though I would not necessarily predict that it would do so.

In spite of these and a few other soft spots in the historical arguments, the historical explanations proposed by Corne and Baker are on the whole quite reasonable. Baker argues (perhaps following Le Page; see e.g., Le Page 1977:236) that creole originators "would not be motivated to abandon the grammatical structures of their mother tongues except where these proved a barrier to communication" (246-47). Both Corne and Baker suggest that — at least when the people constructing RC, MC, and HC were forced to abandon their native-language structures — universally unmarked structures (maybe innate), French structures, and possibly also specific substrate structures and independent parallel innovations entered into the emerging creoles.

In sum, this is an important book. Anyone who wants to know how the Indian Ocean creoles fit into the general creole picture should read it.

This is not just another book about some rather obscure creoles which will only interest specialists. It is, in fact, a work that redefines the very boundaries and methods of sociolinguistics to achieve some quite remarkable results.

Degrees of Restructuring in Creole Languages Ingrid Neumann-Holzschuh, Edgar W. Schneider, 2001-02-12 Basic notions in the field of creole studies including the category of creole languages itself have been questioned in recent years Can creoles be defined on structural or on purely sociohistorical grounds Can creolization be understood as a graded process possibly resulting in different degrees of radicalness and intermediate language types semi creoles If so by which linguistic structures are these characterized and by which extralinguistic conditions have they been brought about Which are the linguistic mechanisms underlying processes of restructuring and how did grammaticalization and reanalysis shape the reorganization of linguistic specifically morphosyntactic structures commonly called creolization What is the role of language

 wider setting of linguistic theory this book bridges the gap between introductory material and primary material revising
 students knowledge of the field as well as acquainting them with key areas of debate in pidgin and creole studies The author
 provides a carefully balanced introduction to theoretical aspects of creolistics as well as an even handed discussion of

influences on pidgins and creoles which is well illustrated with rare examples of longer texts *Information Structure and the Dynamics of Language Acquisition* Christine Dimroth, Marianne Starren, 2003-01-01 The papers in this volume focus on the impact of information structure on language acquisition thereby taking different linguistic approaches into account They start from an empirical point of view and examine data from natural first and second language acquisition which cover a wide range of varieties from early learner language to native speaker production and from gesture to Creole prototypes The central theme is the interplay between principles of information structure and linguistic structure and its impact on the functioning and development of the learner's system The papers examine language internal explanatory factors and in particular the communicative and structural forces that push and shape the acquisition process and its outcome On the theoretical level the approach adopted appeals both to formal and communicative constraints on a learner's language in use Two empirical domains provide a testing ground for the respective weight of grammatical versus functional determinants in the acquisition process 1 the expression of finiteness and scope relations at the utterance level and 2 the expression of anaphoric relations at the discourse level Languages in Contact John Holm, 2003-12-18 There is widespread agreement that certain non Creole language varieties are structurally quite different from the European languages out of which they grew however until recently linguists have found difficulty in accounting for either their genesis or their synchronic structure This 2003 study argues that the transmission of source languages from native to non native speakers led to partial restructuring whereby some of the source languages morphosyntax was retained but a significant number of substrate and interlanguage features were also introduced Comparing languages such as African American English Afrikaans and Brazilian Vernacular Portuguese John Holm identifies the linguistic processes that lead to partial restructuring bringing into focus a key span on the continuum of contact induced language change which has not previously been analysed Informed by the first systematic comparison of the social and linguistic facts in the development of these languages this book will be welcomed by students of contact linguistics sociolinguistics and anthropology *Pidgin and Creole Languages* Glenn Gilbert, 2019-03-31 This book is for the memory of John E Reinecke a man whose humanistic activism and sharp hewn scholarship helped to shape the scientific study of pidgin and creole languages throughout much of the twentieth century Reinecke was both a social reformer and a leading sociolinguistic researcher working with creole languages and societies that derive from diverse groups of people thrown into close social contact Most notably Reinecke's keen sense of social justice has had a telling effect on the social history of Hawaii Along with his persistent efforts to obtain a fair and equal share for wage earners in sharply stratified societies his attention early became focused on their language By encouraging others to study what he called marginal languages he was able to bring to them and to the extraordinary issues theoretical and practical which they raise a measure of prestige both in the eyes of their speakers and in the increased attention accorded them by students of language and society The book presents a description of Reinecke's life and work the text of his own last paper on creolistics and

seventeen papers which reflect the range and vitality of the field that he did so much to open. Some of the papers reflect the issue which has come to dominate creole studies: the debate over the role of universals and of specific substrata as competing explanations of the amazing similarities that creoles and perhaps pidgins also exhibit across the world. Many describe the intense language contact within which language contraction and expansion occur; they do this either directly or by supplying new data which will eventually feed such descriptions, and some are our belated response to calls which Reinecke made in the 1930s. Fifty years ago he saw the need for the kind of comparative studies which are only now under way. In for example Hazel Carter's paper which represents a pioneering attempt to compare the suprasegmentals of English-based Creoles on both sides of the Atlantic. In his last years Reinecke strongly supported research on contact languages with non-European lexical bases. He thought this was the area from which future creole studies would derive the greatest theoretical and practical gain, and in this volume six papers answer his call by analyzing such pidgins and creoles.

The Oxford Handbook of the French Language Wendy Ayres-Bennett, Mairi McLaughlin, 2024-07-12. This volume provides the first comprehensive reference work in English on the French language in all its facets. It offers a wide-ranging approach to the rich, varied and exciting research across multiple subfields, with seven broad thematic sections covering the structures of French, the history of French, axes of variation, French around the world, French in contact with other languages, second language acquisition, and French in literature, culture, arts, and the media. Each chapter presents the state of the art and directs readers to canonical studies and essential works, while also exploring cutting-edge research and outlining future directions. The Oxford Handbook of the French Language serves both as a reference work for people who are curious to know more about the French language and as a starting point for those carrying out new research on the language and its many varieties. It will appeal to undergraduate and graduate students as well as established scholars, whether they are specialists in French linguistics or researchers in a related field looking to learn more about the language. The diversity of frameworks, approaches, and scholars in the volume demonstrates above all the variety, vitality, and vibrancy of work on the French language today.
