*Issues in Feminism* Sheila Ruth, 2001 This best selling text reader offers 65 interdisciplinary readings drawn from work in the humanities and the social sciences Classic and contemporary selections represent both feminist and anti feminist viewpoints in an examination of women's lives and the ways in which women can effect alternatives to traditional gender roles Extensive chapter introductions place selections in context define and explain concepts and terminology and provide a cohesive framework for the collection Teaching Introduction to Women's Studies Carolyn DiPalma, Barbara S.

Winkler, 1999-10-30 This edited collection addresses the institutional context and social issues in which teaching the women's studies introductory course is embedded and provides readers with practical classroom strategies to meet the challenges raised The collection serves as a resource and preparatory text for all teachers of the course including experienced teachers less experienced teachers new faculty and graduate student teaching assistants The collection will also be of interest to educational scholars of feminist and progressive pedagogies and all teachers interested in innovative practices The contributors discuss the larger political context in which the course has become a central representative of women's studies to a growing although less feminist identified population Increased enrollments and changes in student population are noted as a result in part of the popularity of Introduction to Women's Studies courses in fulfilling GED and diversity requirements New forms of student resistance in a climate of backlash and changes in course content in response to internal and external challenges are also discussed Evidence is provided for an emerging paradigm in the conceptualization of the introductory course as a result of challenges to racism heterosexism and classism in women's studies voiced by women of color and others in the 1980s and 1990s Sensationalist charges that women's studies teachers including those who teach the Introduction to Women's Studies course are the academic shock troops of a monolithic feminism are challenged and refuted by the collection's contributors who share their struggles to make possible classrooms in which informed dialogue and disagreement are valued

**Handbook of Feminist Research** Sharlene Nagy Hesse-Biber, 2012 The second edition of the *Handbook of Feminist Research Theory and Praxis* presents both a theoretical and practical approach to conducting social science research on for and about women The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies methodologies and methods that have had a significant impact on feminist research practice and women's studies scholarship The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible It continues to engage readers with cutting edge debates

in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change.

***Gender and Sexuality*** Chris Beasley, 2005-04-19 This accessible introduction to gender and sexuality theory offers a comprehensive overview and critique of the key contemporary literature and debates in feminism, sexuality studies and men's studies. Chris Beasley's clear and concise introduction combines a wide-ranging survey of the major theorists and key concepts in an ever-growing and often passionately debated field. The book contextualizes a wide range of feminist perspectives including modernist, liberal, postmodern, queer and gender difference feminism and in the realm of sexuality studies covers modernist liberationism, social constructionism, transgender theorising and queer theory. In men's studies, Chris Beasley examines areas of debate ranging from gender and masculinity to questions of race, ethnicity, imperialism and gay masculinities. Interconnections between the subfields are highlighted and Beasley considers the implications of body theory for all three. Key theorists covered include Altman, Brod, Butler, Califia, Carbado, Connell, Dowsett, Grosz, Halberstam, Hook, Jackson, Jagose, Nussbaum, Rich, Seidman, Spivak, Stoltenberg, Weeks, Whittle, Wolf, Wollstonecraft. The only book of its kind to draw together all the important strands of gender analysis. *Gender and Sexuality* is a timely and impressive overview that is invaluable to students and academics taking courses on gender and feminist theory, sexuality and masculinity.

***In (M)other Words*** Andrea O'Reilly, 2024-04-30 Dr Andrea O'Reilly is internationally recognized as the founder of Motherhood Studies 2006 and its subfield Maternal Theory 2007 and creator of the concept of Matricentric Feminism: a feminism for and about mothers 2016 and Matricritics: a literary theory and practice for a reading of mother-focused texts 2021. With this collection, O'Reilly continues the conversation on the meaning and nature of motherhood initiated by Adrienne Rich in *Of Woman Born* close to fifty years ago. In *In Mother Words*, O'Reilly shares 25 of her chapters and articles published between 2009-2024 to examine the oppressive and empowering dimensions of mothering and to explore motherhood as institution, experience, subjectivity and empowerment. The collection considers the central themes and theories of motherhood studies including normative motherhood, feminist mothering, maternal regret, matricentric pedagogy, young mothers, academic motherhood, matricentric feminism, matricritics, motherhood and feminism, the motherhood memoir, the twenty-first century motherhood movement, mothers and daughters, mothers and sons, pandemic mothering and the motherline.

***Beijing and Beyond*** Florence Howe, 1996 This extra-large double issue of *WSQ* combines two themes related but distinct: a report on the largest United Nations-sponsored gatherings of women in history at Beijing and Huairou and a series of national reports on women's studies.

***An Introduction to Women's Studies*** Inderpal Grewal, Caren Kaplan, 2002 This anthology for first and second year students introduces them to the history of key ideas in the modern period related to

sexual difference gender race class and sexuality While most introductory Women s Studies textbooks focus on the United States even if they add multiculturalism to the discussion this book looks at the history of important differences between women in diverse locations around the world and continually challenges students to think through the issues that are raised This transnational approach to understanding gender brings Women s Studies into an era of globalization and connects women s issues in the United States to women s issues elsewhere The book shows how colonialism and imperialism as they spread across the world shaped ideas about gender as much as other modern phenomena It addresses issues of power and inequalities and focuses on links and connections rather than commonalties The readings are truly interdisciplinary drawing upon scholarly work in many disciplines and interdisciplinary fields as well as non scholarly sources
