Global Pension Challenges Patrick J. Ring, Jonquil Lowe, Lien Luu, 2024-03-25 National pension systems face a range of tough social and economic demands and pressures. These are complex to navigate especially in a twenty first century world that has ushered in global uncertainty and pressing challenges even threatening the planet's very sustainability with implications for pensions that policymakers, financial services providers and individuals themselves must address. This book probes and unpacks what pension systems aim to achieve, the uncertainties they face and how they are attempting to resolve them. Analysing pension provision from the systemic, political economy and individual perspectives, it sets out and contextualises commonalities and differences in pension systems across the globe looking at current developments in both public and private pension provision structures and regulation. Moreover, the reader is encouraged to question how national pension systems can best serve their populations and ensure the sustainability of later life incomes in the light of today's global pension challenges.
