Capital and Ecology Rakhee Bhattacharya, G. Amarjit Sharma, 2023-08-28 This volume studies the intersection of capital and ecology primarily in one of the most sensitive geographies of the world the Eastern Himalayan region It looks at how the region has become a melting ground of neoliberal developmentalism and ecological subjectivities with the penetrating forces of global and state capitalism economic projects and complex power relations The essays in the volume argue that specific focus on energy infrastructure and energy production has pushed technology and capital towards asset building which has had an adverse effect on the environment labour relations indigenous knowledge systems and traditional livelihood practices in the area They look at assets like mega dams electricity transmission networks natural gas grids infrastructural and developmental projects and other alternative ventures which require interventions in the natural world and its resource deposits Interdisciplinary in approach the volume adopts a variety of lenses developmentalism state strategy indigenous voices geopolitics and environmentalism to provide a unique and alternative narrative on the various dimensions of the ecological risks and livelihood threats It will be of great interest to scholars and researchers of politics development studies indigenous studies and Asian studies

The Himalayas Makhan Jha, 1996 The present volume throws light on various dimensions of the Himalayan life and culture There are twelve chapters in the book Where various facets of the Himalayan culture viz the needed ethnographic researches institutions of polyandry cultural zones and frontiers of the Himalayas the sacred complexes of the Himalayan shrines urgent anthropological

researches environmental studies religion highland culture tribal stratification land holding pattern etc have been scientification discussed by the specialists and experts of the Himalayan studies Man and His House in the Himalayas Gérard Toffin,1991 Plant Ecology of Indian Himalaya Rajendra Mohan Panda,2022-09-28 This book discusses plant invasions and environmental impacts on the Himalayas through a novel procedure and helps to understand the influences of climate physiography soil and disturbance on plant richness in mountain systems Assessing invasion risks to mountain space under future climate change scenarios is highly significant for appropriate preparedness and this book details analytical and modeling techniques to assess the conditions of mountain ecosystem and ecology to better inform our preparation for future environmental challenges The book presents the state of the art understanding of the species environment relationships in a global biodiversity hotspot relatively unexplored areas for the Himalayan life form richness The book provides not only the academic but also the professional community and policymakers a review and update on modeling applications for determining interactions of the plant species with the environment of a subtropical mountain ecosystem across a climatic gradient Currently there is no book in the market addressing the implementation and applications of modeling in the Himalayan plant and environment continuum and most of the existing books cover the species richness pattern along the elevation gradient and basic ethnobotanical features of a mountain system Since the book covers the applications of novel methods and modeling for ecological analysis of mountain ecosystems it will also be significant for the professional market Therefore the book aims to fill the gap between scientists and professionals in the use of modeling strategies to monitor biodiversity in mountain systems for the formulation of conservation adaptation and mitigation principles **Tribes of Uttar Pradesh and Uttanchal** Sumedha Naswa,2001 **Ecology of Himalayan Treeline Ecotone** S P Singh,Zafar Ahmad Reshi,Rajesh Joshi,2023-02-21 This book brings together comprehensive multi disciplinary knowledge on diverse aspects of the Himalayan treeline ecotone which is considered one of the most sensitive ecosystems to climate change The contents of this book are based on the results of extensive research and provide a holistic understanding of the treeline ecotone in Himalaya The book will serve as an important reference manual and a textbook on treeline ecology The book is unique in the sense that it provides an engaging account of almost all the aspects of the treeline ecotone such as taxonomic functional and phylogenetic species diversity temperature lapse rates tree phenology water relations and stress physiology tree ring width chronology and climate relationships and the role of treeline ecotone in human sustenance in the Indian Himalayan region The treelines in the Himalaya being the highest in the Northern Hemisphere up to 4900 m are among the least investigated systems and hence this book is timely and fills all important knowledge gaps vis vis treeline shifts physiognomic structural and functional changes in mountain landscapes and ecosystems particularly under the changing climate This book for the first time summarizes evidence based knowledge about various aspects of treeline ecotone in Himalaya that was largely generated through a well coordinated a team science approach The book will be of interest to

ecologists climatologists dendrochronologists foresters plant physiologists and resource managers and policy planners for a better understanding of the organization and dynamics of this fragile ecosystem in relation to climate change and other anthropogenic stresses that are rampant in the Himalaya The book lays a solid foundation for further investigation of the ecology and dynamics of the treeline ecotone in the Himalayas and provides a rationale for pursuing a team science approach for macroecological investigations
