Ecology For Environmental Professionals:

Ecology for Environmental Professionals Dorothy J. Howell, 1994 If as has been asserted everything in nature is connected to everything else it is a lesson yet to be reflected among environmental professions especially those serving law and policy Nowhere is the lack of integration more apparent than in the incorporation of sound ecological principles Yet comprehension of these principles is a prerequisite to establishing effective environmental programs whether local or global Ecology and environmental sciences range from cosmology to determining toxic effects in a biological system In short ecology is served by and is itself a manifestation of all the natural sciences Ecology is further manifested in the social sciences directly and indirectly In this book ecology and environmental sciences are presented to environmental professionals in terms relevant to all their endeavors Today s ecologies emerge from the venerable scientific endeavor Upon placing ecology in the hierarchy of natural sciences this volume centers on the wealth of dimensions in which ecology is expressed Extending beyond the three spatial dimensions and that of time ecology enters those of holistic and reductionist vantages the last reflected in abiotic and biotic detail Dimensions serving environmental professions include the experimental those arising from interrelationships with adaptation and evolution and that of human ecology Finally there is the intellectual dimension Ecology as one thread in the contemporary cultural tapestry into which environmental policy and law are being woven Scrupulously avoiding superimposition of political stance this unique volume serves anyone lacking scientific preparation who would take a stance professional or personal

Critical Skills for Environmental Professionals

Jennifer Pontius, Alan McIntosh, 2019-12-20 This textbook focuses on a set of skills based learning outcomes common among undergraduate environmental programs It covers critical scientific skills and ways of thinking that bridge the gap between the knowledge based content of introductory environmental textbooks and the professional skills students of the environment need to succeed in both their academic programs and professional careers This emphasis on skills is gaining more traction among academic programs across the country as they shift focus from knowledge delivery to learning outcomes and professional competencies The book features clear methodological frameworks engaging practice exercises and a range of assessment case studies suitable for use across academic levels For introductory levels this text uses guided practice exercises to expose students to the skills they will need to master At the capstone level this text allows students to apply the knowledge they have gained to real world issues and to evaluate their competency in key programmatic learning outcomes A detailed answer key with rubrics customized for specific questions and sample answers at various competency levels is available to verified course instructors Access to these answer key resources can be obtained by contacting the Springer Textbook Team at Textbooks.springer.com

Economics for Environmental Professionals

Frank R. Spellman, 2015-04-13 Environmental professionals are often called upon to find solutions to environmental degradation problems or to lead the way in planning to prevent them Because they come mainly from the environmental and science

disciplines most environmental professionals have limited training in the fundamentals of economics This book is designed to provide t

Ecological Identity Mitchell

Thomashow, 1996-07-25 Through theoretical discussion as well as hands on participatory learning approaches Thomashow provides concerned citizens teachers and students with the tools needed to become reflective environmentalists Mitchell Thomashow a preeminent educator shows how environmental studies can be taught from different perspective one that is deeply informed by personal reflection Through theoretical discussion as well as hands on participatory learning approaches Thomashow provides concerned citizens teachers and students with the tools needed to become reflective environmentalists What do I know about the place where I live Where do things come from How do I connect to the earth What is my purpose as a human being These are the questions that Thomashow identifies as being at the heart of environmental education Developing a profound sense of oneself in relationship to natural and social ecosystems is necessary grounding for the difficult work of environmental advocacy In this book he provides a clear and accessible guide to the learning experiences that accompany the construction of an ecological identity using the direct experience of nature as a framework for personal decisions professional choices political action and spiritual inquiry Ecological Identity covers the different types of environmental thought and activism using John Muir Henry David Thoreau and Rachel Carson as environmental archetypes but branching out into ecofeminism and bioregionalism issues of personal property and consumption political identity and citizenship and integrating ecological identity work into environmental studies programs Each chapter has accompanying learning activities such as the Sense of Place Map a Community Network Map and the Political Genogram most of which can be carried out on an individual basis Although people from diverse backgrounds become environmental activists and enroll in environmental studies programs they are rarely encouraged to examine their own history motivations and aspirations Thomashow s approach is to reveal the depth of personal experience that underlies contemporary environmentalism and to explore interpret and nurture the learning spaces made possible when people are moved to contemplate their experience of nature

The Professional Practice of Environmental Management Robert S. Dorney, 2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader discern and implement man s stewardship of our environment and the world s renewable resources For we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents Each book in this series will shed light on the fundamental and

applied aspects of environmental management It is hoped that each will help solve a practical and serious environmental problem

Materials for a Healthy, Ecological and Sustainable Built Environment Emina K. Petrović,Brenda Vale,Maibritt Pedersen Zari,2017-03-23 Principles for Evaluating Building Materials in Sustainable Construction Healthy and Sustainable Materials for the Built Environment provides a comprehensive overview of the issues associated with the selection of materials for sustainable construction proposing a holistic and integrated approach The book evaluates the issues involved in choosing materials from an ecosystem services perspective from the design stage to the impact of materials on the health of building users The three main sections of the book discuss building materials in relation to ecosystem services the implications of materials choice at the design stage and the impact of materials on building users and their health The final section focuses on specific case studies that illustrate the richness of solutions that existed before the rise of contemporary construction and that are consistent with a sustainable approach to creating built environments These are followed by modern examples which apply some if not all of the principles discussed in the first three sections of the book Provides a holistic and integrated approach to the issues associated with the selection of materials for sustainable construction Provides a thorough understanding of ecosystem services based on ecology research for built environment design Provides an original review of the impact of materials on human health Provides case studies to illustrate the points above

Environmental Problem Solving Alan Miller,2013-12-01 Human influences create both environmental problems and barriers to effective policy aimed at addressing those problems In effect environmental managers manage people as much as they manage the environment Therefore they must gain an understanding of the psychological and sociopolitical dimensions of environmental problems that they are attempting to resolve In Environmental Problem Solving Alan Miller reappraises conventional analyses of environmental problems using

lessons from the psychosocial disciplines He combines the disciplines of ecology political sociology and psychology to produce a more adaptive approach to problem solving that is specifically geared toward the environmental field Numerous case studies demonstrate the practical application of theory in a way that is useful to technical and scientific professionals as well as to policy makers and planners Alan Miller is Professor of Psychology at the University of New Brunswick

The Routledge Handbook of Urban Ecology Ian Douglas, David Goode, Michael C. Houck, David Maddox, 2010-12-21

The birds animals insects trees and plants encountered by the majority of the world's people are those that survive in, adapt to, or are introduced to urban areas Some of these organisms give great pleasure others invade, colonise and occupy neglected and hidden areas such as derelict land and sewers Urban areas have a high biodiversity and nature within cities provides many ecosystem services including cooling the urban area, reducing urban flood risk, filtering pollutants, supplying food and providing accessible recreation Yet protecting urban nature faces competition from other urban land uses The Handbook of Urban Ecology analyses this biodiversity and complexity and provides the science to guide policy and management to make cities more attractive, more enjoyable and better for our own health and that of the planet This Handbook contains 50 interdisciplinary contributions from leading academics and practitioners from across the world to provide an in depth coverage of the main elements of practical urban ecology It is divided into six parts dealing with the philosophies, concepts and history of urban ecology followed by consideration of the biophysical character of the urban environment and the diverse habitats found within it It then examines human relationships with urban nature, the health, economic and environmental benefits of urban ecology before discussing the methods used in urban ecology and ways of putting the science into practice The Handbook offers a state of the art guide to the science, practice and value of urban ecology The engaging contributions provide students and practitioners with the wealth of interdisciplinary information needed to manage the biota and green landscapes in urban areas
