

Skrå tyggegummi forbedrer hukommelsen

(Fra aviser, marts 2002)

Hjernen arbejder bedre efter tyggegummi, ifølge en undersøgelse præsenteret for den årlige konference for British Psychological Society.

Læge Andrew Scholey, neurolog ved University of Nothumbria (UK) har evalueret effekten på hukommelse af forskellige stoffer som ginseng, rosmarin og aromaterapiolier. Han har sagt, at tyggegummi forbedrer hukommelsen. Han baserer sin påstand på resultaterne af et eksperiment, han har udført. Han delte 75 frivillige i 3 grupper. Den første tyggede tyggegummi under forsøget, havde den anden gruppe ikke tygge noget, og den tredje tygget med noget i munden. Ord og billeder blev vist til dem på en computer og bagefter blev bedt om at huske ord og billeder. De, der tyggede tyggegummi huskede to eller tre ord eller billeder mere end dem, der ikke tyggede i gennemsnit.

Language and Culture

Pedagogy Karen Risager, 2007-01-01 Looks at the teaching of language and culture in a globalized world

Language and Culture

Karen Risager, 2006-01-01 The book presents a new theory of the relationship between language and culture in a transnational and global perspective The fundamental view is that languages spread across cultures and cultures spread across languages or in other words that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities

Critical Influences on Child Language

Acquisition and Development David J. Messer, Geoffrey J. Turner, 1993-03-15 The book identifies and assesses the importance of a range of influences on child language acquisition and development paying particular attention to situational influences Key issues are highlighted and recent research is succinctly presented There are five sections the deployment of speech during early development linguistic interaction and family background encoding the situation multidimensional aspects of language development and constraints on language development There are twelve chapters on these themes contributed by leading researchers in this area

From Here to Denmark Rajat M. Nag, Harinder S. Kohli, 2023-08-16 Here is a hypothetical place where governance is poor rule of law is not respected and justice is often denied Many particularly the poor and the marginalised suffer daily indignities big and small and live a life marked by fear and insecurity Denmark on the other hand is where good governance prevails and is reflected in predictable and accountable actions by others including the State The journey From Here to Denmark is essentially a quest of ensuring good governance Improving governance needs good strong institutions Time history culture leadership and yes luck all have a role to play in this journey But the experiences of several countries which have made this transition convincingly point to the overriding importance of human capital and an empowered citizenry who can actively participate in the affairs of their society in building strong institutions

Nature Sir Norman Lockyer, 1924

Nordic Narratives of Nature and the Environment Reinhard

Hennig, Anna-Karin Jonasson, Peter Degerman, 2020-07-06 Many contemporary environmental risks and global environmental changes occurring today are unprecedented in the history of human life on earth However the images and narratives through

which humans relate to these phenomena are built on existing cultural tropes and narrative models Cultural social and historical contexts strongly influence how we construct images and narratives of nature and the environment It is therefore highly important to study such narratives in works of literature film and other forms of cultural expression in relation to the specific circumstances from which they arise Nordic Narratives of Nature and the Environment is the first English language anthology that presents ecocritical research on northern European literatures and cultures The contributors examine specifically Nordic narratives of nature and the environment with a focus on the cultures and literatures of the modern northern European countries Denmark Finland Norway and Sweden including Sami which is the land traditionally inhabited by the indigenous Sami people Covering northern European literatures and cultures over a period of more than two centuries this anthology provides substantial insights into both old and new narratives of nature and the environment as well as intertextual relations the variety of cultural traditions and current discourses connected to the Nordic environmental imagination Case studies relating to works of literature film and other media shed new light on the role of culture history and society in the formation of narratives of nature and the environment and offer a comprehensive and multi faceted overview of the most recent ecocritical research in Scandinavian studies

Migration, Adult Language Learning and Multilingualism Anna-Elisabeth Holm, 2023-11-23 This book extends lines of inquiry at the nexus of migration adult language learning and multilingualism illuminating the lived experiences of migrants in the Faroe Islands and critical new insights into sociolinguistics from the periphery Building on recent epistemological shifts in research on minoritised languages this volume integrates threads from scholarship on migration studies new speakers and critical sociolinguistics in examining blue collar workplaces in the Faroe Islands In bringing greater attention to these contexts Holm showcases how these sites when analysed via an ethnographic lens reflect both the changing sociolinguistic landscape at the periphery in light of globalisation and adult language learners commitment to language learning as a form of personal and social investment In shedding light on the specific case of Faroese the volume critically reflects on the specific challenges involved in acquiring a small language in a bilingual context and on those impacting the sustainability of minoritised languages including the increasing use of English and the opportunities for stakeholders in language policy and planning to promote greater social inclusion for adult migrants This volume will be of particular interest to students and scholars in critical sociolinguistics linguistic anthropology language education migration studies and applied linguistics

Distributed Language, Affective Dynamics, and the Human Ecology Volume II Paul J. Thibault, 2020-12-13 Language plays a central role in human life However the term language as defined in the language sciences of the 20th century and the traditions these have drawn on have arguably limited our thinking about what language is and does The two inter linked volumes of Thibault's study articulate crucially important aspects of an emerging new perspective shift on language the Distributed Language view that is now receiving more and more attention internationally Rejecting the classical view that the fundamental

architecture of language can be localised as a number of inter related levels of formal linguistic organisation that function as the coded inputs and outputs to each other the distributed language view argues that languaging behaviour is a bio cultural organisation of process that is embodied multimodal and integrated across multiple space time scales Thibault argues that we need to think of human languaging as the distinctively human mode of our becoming and being selves in the extended human ecology and the kinds of experiencing that this makes possible Paradoxically this also means thinking about language in non linguistic ways that break the grip of the conventional meta languages for thinking about human languaging Thibault's book grounds languaging in process theory languaging and the forms of experience it actualises is always an event not a thing that we use In taking a distinctively interdisciplinary approach the book relates dialogical theories of human sense making to the distributed view of human cognition to recent thinking about distributed language to ecological psychology and to languaging as inter individual affective dynamics grounded in the subjective lives of selves In taking this approach the book considers the coordination of selves in social encounters the emergent forms of self reflexivity that characterise these encounters and the implications for how we think of and live our human sociality not as something that is mediated by overarching codes and systems but as emerging from the endogenous subjectivities of selves when they seek to coordinate with other selves and with the situations artefacts social institutions and technologies that populate the extended human ecology The two volumes aim to bring our understanding of human languaging closer to human embodiment experience and feeling while also showing how languaging enables humans to transcend local circumstances and thus to dialogue with cultural tradition Volume I focuses on the shorter timescales of bodily dynamics in languaging activity Volume II integrates the shorter timescales of body dynamics to the longer cultural historical timescales of the linguistic and cultural norms and patterns to which bodily dynamics are integrated

Information Structure and Language Change Roland Hinterhölzl, Svetlana Petrova, 2009 The volume presents new approaches to explaining word order variation and change in the Germanic languages and thus relates to one of the most prominent and widely discussed topics in the theory of language change and diachronic syntax The novelty of our approach consists in three main points First of all we aim at describing functional variety in the field of word order and verb placement in the early Germanic languages not as a result of language contact but rather as a language internal phenomenon related to stylistic and grammatical conditions in information packaging Second given that information structure is not directly accessible in texts from historical corpora that are available only in written form and bear no or little information on prosody and intonation it presents various methods of retrieving information structural categories in such texts Third it presents empirical studies on the relation between word order and information structure of the four main texts of the Old High German period and embeds these results in the wider picture of word order change in Germanic The volume will be of interest to students of German English and general linguistics as well as to researchers interested in diachronic syntax philology of Older German language change information structure discourse semantics language typology computational linguistics and corpus studies Influences of geographic environment Ellen Churchill Semple, 1911

The Danish Avant-Garde and World War II Kerry Greaves, 2019-03-18 This is the first book to focus on Helhesten The Hell Horse an avant garde artists collective active during the Nazi occupation of Denmark and one of the few tangible connections between radical European art groups from the 1920s to the 1960s The Danes deliberately unskilled painterly abstraction embrace of the tradition of dansk folkelighed the popular and its iterations of egalitarianism and consensus reform called for the political relevance of art and interrogated the ideologies underlying culture itself The group's cultural activism presents an alternative trajectory of continuity which challenges the customary view of World War II as a moment of artistic rupture
