Rafat Siddique,2007-11-13 Non hazardous waste materials and by products which are mostly landfilled can be used in making concrete and similar construction materials This book gives an summary of this usage one chapter is devoted to each material comprising an introduction chemical and physical properties usage potential and the impact of the material on the various properties of concrete The waste materials and by products covered in the book are granulated blast furnace slag metakaolin waste and recycled plastics scrap tire waste glass coal fly ash rice husk ash municipal solid waste ash wood ash volcanic ash cement kiln dust and foundry sand **Recycling and the Politics of Urban Waste** Matthew

Gandy,2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection Review Oak Ridge National Laboratory,1990 **Municipal Solid Wastes**

Robert E. Landreth,Paul A. Rebers,2020-07-26 Environmental scientists and engineers are faced with the challenge of how to manage increasing amounts of solid waste Furthermore waste management officials are constantly faced with the question Which option is the most appropriate one in this situation and how does it compare to other options For these individuals and for the general public Municipal Solid Wastes Problems and Solutions helps to answer this and other questions by presenting the issues of waste handling and disposal from general management concepts to specific techniques Each topic is carefully reviewed problems are presented and possible solutions are discussed Legislation that affects recycling and disposal is covered *Improving Recycling Markets* OECD,2006-11-13 Markets for many classes of recyclable materials are growing

but market failures and barriers are constraining some markets This report presents the case for the use of industrial policies which address such market failures and barriers Environmental Infrastructure Management J.J. Boland,M.E. Bell,Eugene Z. Stakhiv,2013-06-29 Environmental issues continue to burden governments and economies throughout the post communist countries of Central and Eastern Europe and the newly independent states of the former Soviet Union Severe environmental degradation is endemic to the region the existing environmental infrastructure is often inadequate significant new investment is perhaps decades away and there is little knowledge of advanced techniques for impact assessment project evaluation and project financing The first two papers of Environmental Infrastructure Management survey available cost

effective technology for solid waste treatment and air pollution control providing guidance for possible incremental additions to existing infrastructure There is also a discussion of transferable pollution credits as an instrument in regulating air quality The discussion of economic incentives also embraces user fees and other pollution control instruments A range of methods is presented for the evaluation and comparison of alternative projects where data are poor or scarce Canadian experience with specific capital budgeting techniques is given comprehensive attention Debt financing strategies are addressed in the context of present day Ukraine Finally an outline is given of a general framework for making decisions about environmental projects including the use of environmental impact assessments
