Revelation M.R. DeHaan, 2015-05-07 Blessed is he that readeth and they that hear the words of this prophecy and keep those things which are written therein for the time is at hand Rev 1 3 Behold I come quickly blessed is he that keepeth the sayings of the prophecy of this book Rev 22 7 The author of the book of the revelation is Jesus Christ Rev 22 16 The Lord intended that this book should be read and studied especially by His people Rev 1 3 It is not a sealed book as many suppose but one which is open and easy to understand Rev 22 10 Bearing these facts in mind we find the study of Revelation to be fascinating illuminating and deeply profitable instead of difficult and confusing The messages in this volume constitute thirty five radio sermons which were preached first over the Mutual Network and by foreign and short wave stations around the world from August 1945 to April 1946 The response to these radio messages was so enthusiastic and the evident desire for light on the book of the Revelation so general that we soon decided to print these studies on one volume Hence this book No attempt has been made to present an exhaustive verse by verse exposition of the book but rather we have tried to present the general outline the basic structure and the framework We have dwelt at length on certain passages because they constitute the pillars of the book Our purpose is to present clearly the general outline and structure and then the details will fall naturally into their proper places If certain simple rules are followed in reading and studying it the book of the Revelation becomes clear logical and easily understood We present here a few rules which should be observed before studying the book 1 Revelation is not a dark book It is a revelation 2 It is not necessary for one to understand all the symbols and details if he is to gain a deeper knowledge of the book as a whole One need not be able to identify every tree in the forest to appreciate the

beauty of the forest as a whole 3 Observe the rule of literal interpretation The greatest curse of the Christian Church is the evil of spiritualizing the Bible Although there are many symbols and signs in the book as in every other book and in our daily conversation the context indicates whether a passage is to be interpreted literally or symbolically Interpret literally except where the context or grammatical structure clearly indicates that the reference is a symbol or a sign 4 Approach the Book with a fresh mind Try to forget the views you have held concerning the Book because others have declared it to be mysterious and beyond our understanding Thousands of believers never read Revelation but carefully avoid it simply because someone told them it is a dark book and impossible to understand Study the book for yourself 5 Read the book prayerfully realizing that the Holy Spirit who infallibly inspired the book is also the person Who must illuminate the book Never read a portion of scripture without first asking Him for light and guidance We submit for your help the following simple outline of Revelation Remember these five rules as you study it If you will memorize the outline thoroughly and keep it clearly before your mind you will have no trouble filling in the details Grand Rapids Michigan M R DeHaan **FCC Record** United States. thy sight Luke 10 21 The Bible is a book of hidden treasures purposefully designed so by our God Many of these hidden treasures are complex yet they can be understood by ordinary people Jesus likened this group of people to babes One of the meanings of babes in Greek is simple minded God desires to open the windows of heaven and reveal the secrets of His Holy Word to you If you consider yourself inept or too simple minded to understand then all the better You are just Gods type and yes Hes looking for you He will reveal to you even the hidden wisdom which God ordained before the world unto our glory 1 Corinthians 2 7 Need more proof Look at what God promises in Revelation 2 17 To him that overcometh will I give to eat of the hidden manna May you begin to eat of this hidden manna as you read Windows into the Third Heaven and may this book be graciously used by the Spirit of God to whet your appetite for more *RCN in Retrospect, 1910-1968* James A.

Boutilier, 2011-11-01 This tribute to a proud service surveys the history of the Royal Canadian Navy from its inception in 1910 to its demise in 1968 Although established as a declaration of Canada's independence from the imperial fleet the RCN was the child of the Royal Navy Its first ships were RN cast offs and for the next forty years officers trained in the British fleet their big ship time From these modest beginnings the book deals with such related issues as the problem of imperial defense the development of a naval service with a Canadian identity and the evolution of a Canadian naval engineering capacity Expanding dramatically during World War II the RCN gave convoy protection which proved crucial to the Allied victory at sea New documentation on Canada's role in the Battle of the Atlantic highlights such critical factors as the contribution of radio intelligence to anti submarine warfare against the deadly German wolfpacks the wartime operational relationship of the RCN to the Royal Navy and the United States Navy and the heroic role of Canadian sailors who served under fire Demobilization and the paying off of ships marked the postwar decline of the RCN This decline was intensified by a series of mutinies which demonstrated the need for a less rigid more democratic relationship between officers and ratings Despite these difficulties the RCN served effectively in coastal operations during the Korean War and in the establishment of Canada's presence in the Arctic The last chapter records the reaction of the RCN's senior officers to government policy during the Unification Crisis of the 1960s and their unsuccessful attempts to maintain the independent identity of the RCN It is ironic that on the eve of achieving its greatest measure of autonomy the RCN was overwhelmed by the forces of nationalism the same force which had acted as a catalyst in its formation Originally presented in 1980 at a conference on the history of the RCN the papers in this book range from the first hand recollections of ex RCN personnel to the examination of previously classified documents from German and Allied archives The RCN in Retrospect will serve to introduce many to Canada's naval heritage and will provide valuable new insights to all readers with an interest in naval history and lore **Genesis** Paul J. D.H. Lawrence and the Idea of the Novel John Worthen, 1979-06-17 Annotation This Seductive and Engaging Biography offers a bold reappraisal of a man who was deeply uncomfortable in his own skin Lawrence's fascination with the body and his determination to articulate its every experience brought about his notorious reputation and ultimately his literary

redemption What emerges in John Worthen's portrait is an intimate and absolutely compelling study of an individual in angry revolt against his class culture and country a man passionately struggling to live in accordance with his beliefs **David's Question** Edward Reaugh Smith, 2001 If ultimately there is only one reality then neither religion nor science can be fulfilled until they come together on a higher plane In this second volume of his authoritative anthroposophical commentary on the Bible Edward Reaugh Smith shows that there is no difference between true science and the divine intelligence sought by true religion The model for such a union of science and religion is the spiritual science developed by Rudolf Steiner In this union what the senses show us about the physical world when keenly observed and allowed to speak for itself instead of being abstracted into theories become images of the spiritual world As above so below Drawing on his extensive knowledge of the Bible the author shows us that anthroposophy provides unique insights into the biblical account Included are essays on Evolution Creation and Apocalypse The Four Elements As Above So Below Fire where Earth and Heaven meet Light the first form of corporeality from which all else follows Blood the meeting point of inner and outer worlds What Is Man how beings of the higher worlds work in forming the earthly vehicle for the human being Plus Numerous Charts Tables an extensive bibliography and an index of scriptures cited This is an important resource for anyone who wants to dig into the deepest meanings of biblical scriptures **Two Books, One Story.** Teddy Donobauer, 2021-05-07 Where would a Cuckoo and a Lobster be found in the proximity of Cancers and Rainbows Where would bread unleavened or puffed up shed light on life and sincerity in religious practice They meet within the pages of this latest book by Teddy Donobauer What appears natural in some aspects carries spiritual significance in many other A butterfly not only flutters by but cries to the soul learn from me The almost universal concern for the environment is on the lips of every man And we are blamed for virtually every evil What is not on the lips of all is the fact that our natural environment depends on the spiritual environment which precedes it and out of which it came Our sins against creation started as sins against the larger environment of the Creator It is our loss of correspondence with the Creator which has led to our disastrous behaviour in His world Creation and the Uncreated cannot be separated from each other as that which is visible is entirely dependent on invisible realities Creation and God cannot be separated and every physical thing is under Spiritual laws There are therefore two books to read The Bible and the Creation of which the Bible speaks in a multitude of ways What is true in the world is also true in the Spiritual world This book explores this double message in a few chosen areas The one eyed visions of the naturalist must be complemented with a spiritual second eye A stereo vision of the visible and the invisible together Seeing with two eyes and looking with eyes wide open on the world while it is still ours to live in It's salvation will still be the Creator's business **Applied Cryptography and Network Security** Tal Malkin, Vladimir Kolesnikov, Allison Lewko, Michalis Polychronakis, 2016-01-09 This book constitutes the refereed proceedings of the 13th International Conference on Applied Cryptography and Network Security ACNS 2015 held in New York NY USA in June 2015 The 33 revised full papers included in this volume and presented

together with 2 abstracts of invited talks were carefully reviewed and selected from 157 submissions They are organized in topical sections on secure computation primitives and new models public key cryptographic primitives secure computation II applications anonymity and related applications cryptanalysis and attacks symmetric crypto privacy and policy enforcement authentication via eye tracking and proofs of proximity malware analysis and side channel attacks side channel countermeasures and tamper resistance PUFs and leakage resilience and pseudorandomness

Rainbows in Channeling of Charged Particles in Crystals and Nanotubes Nebojša Nešković, Srdjan Petrović, Marko Čosić, 2017-07-27 This book discusses the effects modeling latest results and nanotechnology applications of rainbows that appear during channeling of charged particles in crystals and nanotubes The authors begin with a brief review of the optical and particle rainbow effects followed by a detailed description of crystal rainbows which appear in ion channeling in crystals and their modeling using catastrophe theory The effects of spatial and angular focusing of channeled ions are described with special attention given to the applications of the former effect to subatomic microscopy The results of a thorough study of the recent high resolution channeling experiments performed with protons of energies between 2.0 and 0.7 MeV and a 55 nm thick silicon crystal are also provided This study opens up the potential for accurate analysis of very thin crystals Also presented are recent results related to rainbows occurring in proton transmission through carbon nanotubes and a detailed quantum consideration of the transmission of positrons of an energy of 1 MeV through very short carbon nanotubes This process is determined by the rainbow effect The initial positron beam is represented as an ensemble of non interacting Gaussian wave packets and the principal and supernumerary primary rainbows appearing in the spatial and angular distributions of transmitted positrons are clearly identified They are explained by the effects of wrinkling concentration and coordination of the wave packets
