Congress. Joint Economic Committee,1990      **The Future of Economics** M. Umer Chapra,2016-07-04 This profound book is a powerful yet balanced critique of mainstream economics that makes a forceful plea for taking economics out of its secular and occident centred cocoon It presents an innovative and formidable case to re link economics with moral and egalitarian concerns so as to harness the discipline in the service of humanity M Umer Chapra is ranked amongst the Top 50 Global Leaders in Islamic economics ISLAMICA 500 2015 and has been awarded with two prestigious awards for his contributions to the field Islamic Development Bank Award for Islamic Economics 1989 and the King Faisal International Prize for Islamic Studies 1989      *Studies in Islamic Economics* Ahmed Akgunduz,2009-06-26 This book contains two major subjects Firstly some academic papers about Islamic Banking The main characteristic of Islamic banking in comparison to traditional banking is that it is more concerned with the profitability and length of the proposed investment rather than collateral Projects with high profitability and low collateral that might otherwise be rejected can be funded through Islamic banking This leads to a banking behavior that is similar to development banks and microfinance institutions that have been very successful in many Third World countries Academic research shows that Islamic banking is not a negligible or merely temporary phenomenon Contributors Dr M Umer Chapra Dr Ahmet Akgunduz Arjen van Klink Drs Bastiaan A Verhoef and Ismail zsoy Secondly some research articles about religion and development Islam summarizes the root cause of the great social upheavals that have been suffered particularly in this century in two phrases One is So long as I am full what is it to me if others die of hunger And the other is You struggle and labor so that I can live in ease and comfort Islam demonstrates that if hunger and poverty are to be eradicated it will be through applying the Qur'anic injunction of almsgiving social assistance and mutual help vujudu zakat Being steadfast in performing prayers giving zakat and the prohibition against earning without working e.g. usury and interest hurmet i Rib God has permitted trade and forbidden usury Contributors Dr Ahmet Akgunduz Dr Arif Ersoy Dr Hamet Baar and Dr Bunyamin Duran      The Making of Islamic Economic Thought Sami Al-Daghistani,2022-01-06 Interrogating the development and conceptual framework of economic thought in the Islamic tradition pertaining to ethical philosophical and theological ideas this book provides a critique of modern Islamic economics as a hybrid economic system From the outset Sami Al Daghistani is concerned with the polyvalent methodology of studying the phenomenon of Islamic economic thought as a human science in that it nurtures a complex plenitude of meanings and interpretations associated with the moral self By studying legal scholars theologians and Sufis in the classical period Al Daghistani looks at economic thought in the context of Sharia's moral law Alongside critiquing modern developments of Islamic economics he puts forward an idea for a plural epistemology of Islam's moral economy which advocates for a multifaceted hermeneutical reading of the subject in light of a moral law embedded in a particular cosmology of human relationality metaphysical intelligibility and economic subjectivity      Islam and Sustainable Development Odeh Rashed Al-Jayyousi,2016-05-06 In Islam and Sustainable Development Odeh Al Jayyousi addresses the social human and economic

dimensions of sustainability from an Islamic perspective Islam is sometimes viewed as a challenge threat and risk to the West but here we are reminded that the celebration of cultural diversity is a key component in Islamic values Promoting common understanding between East and West this American educated Middle Eastern based author offers something broader and deeper than conventional Western ways of thinking about sustainability and presents new insights inspired by Islamic worldviews Drawing on his roles as both academic researcher and senior development practitioner Professor Al Jayyousi applies his deep understanding of Islamic values to contemporary environmental financial and social conflicts and crises and defines a framework for sustainability embracing local regional and global perspectives He also addresses how education might produce innovation knowledge creation and development to support a new paradigm for sustainability that re defines what constitutes good life beyond consumerism and the production of waste This book will interest policy makers development and donor communities funding agencies and banks in the Islamic World and beyond as well as those with a professional interest in planning and in environmental and conservation issues Scholars of Islamic and Middle Eastern studies and more broadly those with an academic interest in cultural and religious studies will find that this book in Gower s Transformation and Innovation Series is perhaps the most substantial work yet on sustainable development from an Islamic perspective
