

EITHER/OR

Volume II

Søren Kierkegaard

Søren Kierkegaard (1813–1855), the Danish philosopher, is a major influence in contemporary existential philosophy. In his work he dealt with three levels of existence—the aesthetic, ethical, and religious—and the first two of these were his primary concern in his first great work, *Either/Or* (1843). This book, which appeared pseudonymously, purports to contain the papers of two men. One is a young man who, in aphorisms, essays, lyrical outbursts, and the famous “Diary of a Seducer,” brilliantly presents the pleasures of aesthetic life. The other is an older man, who writes letters discussing marriage and selfhood in which he tries to convince his young friend of the superiority of the ethical life. Kierkegaard indicates no choice between the two views; the reader is left to make his own decision.

Either/Or, published shortly after Kierkegaard had broken his engagement, a crucial event in his life, is an extraordinary self-portrait of a great thinker.

The Anchor Edition of *Either/Or*, like the original edition, is published simultaneously in two volumes, of which this is Volume II. The work was intended by its author to stand as a whole, although either part may be read separately.

The Ophthalmology Examinations Review Tien Yin Wong, 2011

With Contributions From Chelvin Sng National University Health System Singapore Laurence Lim Singapore National Eye Centre Singapore

Many new treatments and diagnostic procedures in ophthalmology have been refined or newly developed during the past four years a new edition reflecting these changes is most timely The scope and aim of the book will be consistent with the first edition which provides a broad review of the specialist ophthalmology examinations for final year ophthalmology residents and trainees The book deals primarily with key facts and topics that are important from the examination perspective Only information and facts that are considered relevant and critical to the exams are covered with topics that may be of scientific interest but are not commonly tested in exams specifically left out Time challenged readers will also benefit from the knowledge acquired from various other sources or textbooks that are now organized and synthesized in this book While not meant to replace the standard textbooks enough information is contained within the book to serve as the main revision text nearer the exams The style and format of this book is intentionally didactic with questions and short answers The answer includes a model opening statement followed first by a classification system to aid organization of facts and then the core explanation in concise short notes Exam Tips are inserted to provide an insight into techniques of answering different types of questions and when appropriate a Clinical Approach section is also included In the new edition topics such as new understanding of disease mechanisms e.g genetics of eye diseases new investigations e.g OCT and novel procedures and treatment e.g the use of antivascular endothelial growth factors new refractive surgical techniques are covered This book will be a valuable guide to the final year ophthalmology residents and trainees taking the specialist ophthalmology examinations particularly for exams with a strong oral or viva component Although primarily aimed at candidates attempting the British postgraduate exams FRCS FRANZCO MRCS MRCOphth and FRCOphth it is also useful for other examination systems e.g the American Boards Many junior residents in fact find the information handy during grand rounds
