punto de vista el Derecho penal es entendido como la herramienta jurídica que determina la aplicación del ius puniendi en razón de que la pena es el recurso que utiliza el Estado para reaccionar frente al delito expresándose como la restricción de derechos del responsable. Por ello el Derecho que regula los delitos se denomina habitualmente Derecho penal no obstante en esta contextualización es necesario delimitar que la pena también se define como una sanción que produce la pérdida o restricción de derechos personales de un sujeto hallado responsable de la comisión de una conducta punible término que deriva del latín poena y posee una connotación de dolor causado por un castigo. Por lo tanto podrá decirse que la pena produce una serie de efectos en el conjunto de individuos que componen la sociedad siendo imperante por ende entenderla desde el enfoque de varias de sus teorías como son las subjetivas de la retribución planteadas por Kant las objetivas de la retribución planteadas por Hegel así como también la teoría de prevención general negativa la teoría de prevención general positiva la teoría de prevención especial negativa y positiva como criterios de legitimación que hacen referencia a la resocialización reeducación rehabilitación o reinserción social del delincuente y a su tratamiento y la teoría de la unión o mixta de la pena que nos ayudan a entender que el fundamento de la pena tiene ver no solo con la culpabilidad sino también con la peligrosidad. Teorías que se han ido desarrollando a lo largo de los años y que serán entendidas desde la definición de la pena planteadas en la presente obra misma que cuenta con un análisis esquemático no solo de las teorías sino también de las finalidades de la pena y de las formas de extinción de la misma. *Estado general de la Real Armada*, 1818
